What is Going On Tonight
Watts Laundry Machinery Company
Applies for Incorporation Papers.

NEW INDUSTRY FOR CITY.
There was a meeting at the Board of Trade rooms Wednesday evening of the subscribers to the stock of the Watts Laundry Machinery company, at which practically all of the fifteen or so subscribers were represented, and plans for the commencement of business were discussed.
The company has been formed with a capital stock of \$25,000, \$10,000 of which is paid in, but at the meeting it was voted to increase the paid in stock to \$12,500, and a committee of three was appointed to act with Timothy Watts of South Windham, the inventor of the machine which it is proposed to manufacture, in placing the 50 shares of stock remaining unsubscribed for to make up the total paid in capital. This committee consists of the temporary treasurer, John E.

Brick, together with William P. Jordan and H. A. Bugbee.
The machine is of the mangle type, and is said to be the latest word in that regard. Mr. Watts, who was formerly a traveling machinist in the employ of the Smith & Winchester company of South Windham, has been working for several years on the machine, which will sell for upwards of \$2,000, and has already placed four or five machines. It is said that this is the first machine made which will launder underwear and garments of that nature without removing the buttons.
Plans are under way for the starting of active business soon after the first of the year. At the start the company will make use of the cement building on the property of the Vanderman company, on Mansfield avenue, and it is likely that in the future that company concentrates all of its work at the one plant, the Watts company may remove to the building now used as an office by the Vanderman company on Valley street. Incorporation papers have been applied for and the company will be finally organized soon.
