POMFRET'S FIRE PROTECTION. To Be Decided Upon When Summer Residents Return—Plan to Have Chemical Truck.

A meeting that was to have been held at Pomfret, to take action on providing fire apparatus to give the town adequate protection against disastrous losses, has been adjourned until such time as the summer residents return. It has been decided to hold the matter of buying apparatus and other equipment in abeyance until the return for the season of non-residents owning valuable property in the town. Such an expression of their opinion as to what is needed can be secured.

John Aah is one especially interested in the plan to get fire apparatus for Pomfret. Mr. Aah said Friday afternoon that a motor-driven chemical truck with ladders, hose and other special equipment has been talked of. Such a vehicle could be used as a pump from its station in any section of the town. It is proposed to organize a company of firemen and a Boy Scout auxiliary to watch the town.

In the outline of the general plan is the installation of a fire signal system. This would be worked out by installing bells from which the fire alarm could be run to church bells, which would sound the alarm.

At present Pomfret is without a fire department. It has within its borders some of the most valuable pieces of property in the county. The necessity of providing some protection against the destruction of property has been borne in upon many residents recently. It is believed that all of Pomfret will favor the plan of getting apparatus to protect the town.

The plan, which is to put into effect will cost a considerable sum of money, can be worked out better during the summer season, when the town is in session.

A chemical truck is favored for Pomfret, where there is no hydrant system, because it seems to be the most effective kind of apparatus for use there.
