The workmen's compensation act of Rhode Island differs materially from the Connecticut law, and that's a reason why Judge Barrows has been hearing for the past week the case of Thomas L. Donohue vs. the Sherman Sons company, brought under the compensation act. Decision was reserved for the Rhode Island cases are all tried before a judge of the superior court, as there are no compensation commissioners such as are provided for in the Connecticut law.

The Donohue case was followed by that of Antonio Priori against Louis Dufole, who was his employer on October 30 last, when injured by a premature explosion while engaged in blasting rock at Watch Hill. Priori was treated at Backus hospital for two weeks, and was subsequently attended by Dr. R. B. Smith. His left hand, right arm and left eye were injured. This case was on when court adjourned.

## STONINGTON

Steady Progress on State Road—Preparations for Arrival of Summer Residents—D. of H. to Observe Anniversary.

Barring the thriving industries, the busiest place in Stonington is at the corner of Elm and Cutler streets, where employes of the Vicksburg and Groton-Thompson are busy in the construction of a reinforced concrete roadbed 32 feet in width, and which when completed will be a fine highway. The way in the state. This modern road will extend from the east line of the borough to the west line of the town, a distance of 2 1/2 miles, and form a part of the main highway between Groton and Westerly, connecting at either end with fine macadam roads. This section of the state highway, extending from the Thames to the Pawcatuck river, will be about 19 miles in length and will compare favorably with any road of like distance in the state.

That part of the concrete road from the borough line through Cutler to Elm street is practically completed and it is here where the steam concrete mixer is in operation, which seems to be the magnet that draws the citizens' committee to supervise and comment upon the work as it progresses, although preparatory work is being done all along the line. As the Groton and Stonington State highway tracks from Westerly to Groton operated in the past, the company has been put to great expense in the charge of roads and related to the work to conform to the newly constructed highway.

**CATARRH GERMS EASILY KILLED**

By Breathing Into Throat, Nose and Lungs Pure Antiseptic Air.

If you have catarrh and want to get rid of it you must kill the germs which cause it.

The best known way of destroying catarrh germs is to breathe into the nostrils and lungs the pleasant, penetrating air of Eucalyptus.

Eucalyptus is made from purest oil of Eucalyptus combined with other powerful healing and antiseptic germicidal ingredients. You breathe it through a little pocket inhaler which Lee & Osgood and other leading druggists in Norwich and vicinity are furnishing with every complete treatment.

Every time you inhale the sweet, fragrant air of Eucalyptus through this little device you are drawing into your system a medicated air which will not only reduce all the swelling and inflammation and open your clogged nose and stopped-up air passages, but will absolutely and positively destroy every trace of Catarrh germs it reaches.

Druggists are so sure of the blessed, healing effect of Eucalyptus that they sell it invariably on the positive guarantee that money will be refunded if successful results are not secured from its use.
