above the determined foundation will be removed. The cells will then be filled with concrete, making a solid pier from the level of the foundation material.

The new bridge will be a five-span structure, with bascule type of lift. This was chosen because of the saving in time required for opening and closing to permit vessels to pass up or down stream, as compared with the time consumed in opening and closing a draw span of the swing type.

STRIKES ANOTHER SNAG IN CIVIL SERVICE. Chief Clerk of Labor Bureau is Protected by Law.

Labor Commissioner William S. Hyde has struck a snag in his attempt to make a change in the incumbency of the office of chief clerk in the labor bureau.

Henry P. Wright, secretary of the civil service commission, says that the office of chief clerk in the labor bureau is under the civil service law and that as long as it remains under the commission could not make a change until he had filed with the civil service commission a written statement of the reasons for discharging the incumbent, Miles B. Roberts.

DETAILS OF NEW THAMES RIVER BRIDGE. Serious Engineering Problems Had to Be Solved in Connection With the Plans.

Many items have been printed in regard to the new bridge which the New Haven road is to build across the Thames, a project in which there is much interest.

The work of constructing a new bridge over the Thames river by the New York, New Haven and Hartford Railroad Co., is now actively under way.

The new Thames river bridge will take the place of the present structure, which was built in 1888 and 1889.

When the present bridge is finally abandoned by the New Haven it will be given to the state of Connecticut for use as a highway bridge.
