Home and School Garden Work Starts in Earnest—Supervisor to be Appointed as Soon as Suitable Person Can be Found—Bulletins to be Distributed to Members.

Norwich, Thursday, May 18, 1916.

Home and School Garden Work Starts in Earnest—Supervisor to be Appointed as Soon as Suitable Person Can be Found—Bulletins to be Distributed to Members.

Up to Wednesday afternoon over 300 children of the Norwich public schools had enrolled as members of the Home and School Garden club which is being organized by County Agent F. C. Warner through the co-operation of Edward J. Graham, superintendent of schools, and already many of the children have started their garden plots.

The superintendent will be appointed by the board of education as soon as someone well qualified for the position can be secured. The work on the garden plots has already begun and many of the pupils have finished planting their plots.

Superintendent Graham has asked the principals of the schools to send in reports of the number of pupils who have entered, their names and addresses, so that the supervisor's work will be carried on easily.

After the school day is finished and during the long vacation period millions of American children are idle. Without proper occupation these future citizens of the United States are thrown on their own resources for amusement until school begins again.

The bureau recommends that there should be in each school throughout the country at least one teacher who knows gardening both scientifically and practically.

THE WONDERS OF GAS What You Can Do With Gas

Gas is ready any minute of the day or night, in any quantity and in any part of the house. You don't have to carry it about. No smoke, no ashes, no disagreeable odors, no heavy and clumsy apparatus, and a gas company handy who will see that your appliances are working properly if you ask them to do so.

You can cook with gas, heat water for washing, do the laundry work, light your house, take the chill from rooms on cold days; why, if you wanted to, you could have a gas engine pump the water for you if that was necessary.

It would take a larger space than that occupied by this advertisement to enumerate all of the many things that may be done with gas, and as space is rather expensive, we would suggest that you call at our office and see for yourself how many things may be done.
