The Bulletin Told of Buckingham Drowning.

William L. Buckingham, father of the boy who probably was drowned in Cayuga Lake, N. Y., July 23, received the first notice of his son's fate when he saw the account in the Bulletin in the papers. Trevor C. Buckingham went canoeing on the lake with Miss Emily Buckingham of Waterville, N. Y., Sunday afternoon and this was the last seen of the canoeing couple. The next day the canoe was found floating about, and up the lake was immediately dragged for the bodies but up to Tuesday evening nothing had been found. The father drove the lake dotted with boats Sunday afternoon no one saw the canoe overturned and both the young people were supposed to be good swimmers.

After leaving the post office, where he had read the first account of his son's probable death, Mr. Buckingham went to the railroad station to go to his work as railway mail clerk. Upon arriving at the station he saw a telegram awaiting him confirming the dispatch in the papers. Mr. Buckingham immediately wired his brother, who resides in Utica, N. Y., to go to the lake and make all necessary arrangements for the care of the body when found. The father drove the lake but did not go to New York state.

Young Buckingham was well known in Willimantic, having been graduated from Willimantic high school in the class of 1914. He has since been a student at Cornell university. Trevor Buckingham was very popular in the young people of Willimantic. He was a member of the Greek club of the Congregational church, and was also a member of his high school football team, playing tackle during his senior year. His father is survived by an invalid mother and a brother Earl, of Pittsburgh, Pa.

The land on which the house is to be built was purchased by money raised by the King's Daughters.

The new building will be constructed on Windham road of 90 feet and a depth of 40 feet. It will be a two-story structure with basement. The masonry

starts and living room are to be on the first floor and 10 rooms for the inmates on the upper floor. The kitchen is to be in the basement.

DESCRIPTION OF BRITISH SYSTEM OF BLOCKADE

Presented to the Members of the American Luncheon Club.
London, July 25.—The most detailed description of the British system of blockade which has been framed was presented to the members of the American Luncheon Club by Sir Frank Lawrence, in an address delivered at the last meeting of the club. Sir Frank is the head of a great publishing house, and his father, who is a member of the Royal Volunteer Naval Reserve, and is acting as Assistant Secretary of the Committee on Detention of Neutral Ships presented by Lord Peel.

Sir Frank called attention to the fact that the blockade was not established until the Order of Council of March, 1915, was issued, and that the total stoppage of Germany's enormous trade, all done through neutrals, was a gigantic and difficult business. He remarked: "It has been the desire of the British government in carrying out an effective blockade of Germany to interfere as little as they possibly could with the trade between neutrals, and in fact they have been strongly criticized at home as having considered the interests of the neutrals too much."

REPORT OF PROGRESS OF

DENTAL RESEARCH INSTITUTE

Made at Annual Convention of National Dental Association in Louisville

Louisville, Ky., July 25.—A report of the progress of the Dental Research Institute was made tonight by Dr. Weston A. Price, of Cleveland, Ohio, before an evening session of the annual convention of the National Dental Association. The home of the Dental Research Institute is at Cleveland, Ohio, where a building was recently purchased at a cost of \$50,000. The Institute is supported and controlled by the National Dental Association, and its investigations are conducted at the laboratories in Cleveland and in eight other leading cities under special grants.

Dr. Price presented a report of researches on the differentiation and identification of mouth infections. He cited reports of cases treated at the Institute and of cases of cases partially or totally bedridden for months or years, who are now quite recovered or greatly improved in condition, after correction of their mouth infections. He also made a report of studies on electric medication of root canals and dental abscesses, demonstrating some fundamental principles relative to the distribution and behavior of electric current in effect on micro-organisms and on tissue cells; also on physical properties of tooth root filling material.

Supplementary to his special report, Dr. Price made some remarks on essential necessities for success of the progressive clinic plan at the convention. The plan recommended provides that the dental audience can be divided into groups, which groups will simultaneously see clinics or hear clinical lectures by different experts. The arrangement also provides that the lecture or the audience move forward at stated intervals, a new lecture or new audience taking the place.

ENGLAND TO SHUT OFF COTTON SHIPMENT TO HOLLAND

Unless Dutch Merchants Discontinue Supplying Neutral Nations.
The Hague, July 25.—England has decided that unless the shipment of cotton by Dutch merchants to neutral countries is discontinued, no further supplies of cotton will be permitted to Holland. Announcement to this effect by the British legation has caused some stir throughout Holland. It is generally believed that no room is left for doubting the success of Germany in receiving supplies of cotton, in a round about way from Holland through neutral countries. The Amsterdam Telegraph says that quantities of cotton goods are regularly exported by fraudulent dealers to fictitious addresses in Rumania and Switzerland and ultimately destined for Germany.

DIVISION OF THE SOCIALIST PARTY IN FRENCH CHAMBER

Said to Foreshadow a Complicated Conflict in That Party.

Paris, July 25.—The division of the Socialist party in the Chamber of Deputies on the question of peace and the proposed economic war foreshadows a complicated conflict in that party.

The revolutionary Socialists demand an immediate armistice, while the more moderate voted the war appropriations because they are in favor of peace only through the final victory of the Allies. The moderate socialists declare, however, that they will not accept a prolongation in an economic war of the disasters of the European conflict. In that, the moderate are again divided since they had in their ranks Jules Guesde, Minister of State without portfolio, Marcel Sembat, Minister of Public Works, and Albert Thomas, Under Secretary of War, who, as members of the government, are committed to the policy of economic measures against the central empire after the war.

Eighty-seven of the 106 Socialists of the Chamber signed the statement in favor of continuing the war and against a subsequent economic conflict. Henri Brisson, Alexandre Blanc and Raffin Duguesne, all of them former school teachers and members of the professed school teachers union, voted against the appropriations and demanded an immediate peace.

Three more, in the cabinet, are committed to both war to a finish and an economic battle afterwards.
