GLASS OF HOT WATER Before Breakfast a Splendid Habit

Open sluices of the system each morning and wash away the poisonous, stagnant matter. Those of us who are accustomed to feel dull and heavy when we arise; splitting headaches, stuffs from a cold, foul tongue, nasty breath, acid stomach, lame back, can, instead, both look and feel as fresh as a daisy always by washing the poisons and toxins from the body with phosphated hot water each morning.

We should have breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to flush from the stomach, liver, kidneys and bowels of the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening, purifying the entire alimentary tract before putting more food into the stomach.

The action of limestone phosphate and hot water on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, wastes and acidity and gives one a splendid appetite for breakfast and it is said to be but a little while until the roses begin to appear in the cheeks. A quarter pound of limestone phosphate will cost very little at the drug store, but is sufficient to make anyone who is bilious, nervous, constipated, stomach trouble or rheumatism a real enthusiast on the subject of flushing the system.

It is and you are assured that you will look better and feel better in every way shortly.

You can enjoy it in soups and stews. It is very tasty with fruit or tomatoes—and it is especially delicious prepared like a potato with grated cheese and tomatoes.
