Edward Lambert, Joseph Simoneau, Rudolph Lambert, Charles W. Charon, SALTS IF BACKACHE AND KIDNEYS HURT

Drink lots of water and stop eating meat for a while if your bladder troubles you.

When you wake up with backache and dull misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys, their effort to filter it from the blood and they become sort of paralyzed and loggy.

When your kidneys get sluggish and leg you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells, sour stomach, sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to cleanse and stimulate sluggish kidneys; also to neutralize acids in the urine so it no longer irritates, thus ending bladder weakness.

Jad Salts is a life saver for regular seat eaters. It is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink.
