Camping in the Rockies. The camp ground established at Barthol park, Rocky Mountain National park, last year, will become accessible this season by the completion of the automobile road, and a second camping place located. The great park-like valleys lying east of the Snowy range are well adapted for accommodating multitudes of recreation seekers, not only in the numerous hotels and lodges, but under their own canvas.

In these days when motorists are rapidly increasing numbers are carrying tents and camping outfits of their own into other national parks, a demand has shown itself for similar privileges here where nature has provided so excellent an opportunity. With the accessibility of the Rocky Mountain National park to Denver and greater centers of population beyond, it is predicted that many besides motorists will pitch tents in the shadow of the Snowy range.

Barthol park is well on the way to some of the grandest scenery in the Rocky mountains.

Both Ends (Producer and Consumer) Against The Middle (The Packer) The consumer wants to pay a low price for meat. The farmer wants to get a high price for cattle. The packer stands between these conflicting demands, and finds it impossible to completely satisfy both. The packer has no control over the prices of live stock or meat, and the most that can be expected of him is that he keep the difference between the two as low as possible. He does this successfully by converting animals into meat and distributing the meat at a minimum of expense, and at a profit too small to be noticeable in the farmer's returns for live stock or in the meat bill of the consumer. Swift & Company's 1917 transactions in Cattle were as follows: Average Per Head Sold meat to Retailer for \$68.97 Sold By-products for 24.09 Total Receipts \$93.06 Paid to Cattle Raiser 84.45 Balance (not paid to Cattle Raiser) \$ 8.61 Paid for labor and expenses at Packing House, Freight on Meat, and Cost of operating Branch distributing houses 7.32 Remaining in Packers' hands as returns on investment \$ 1.29 The net profit was \$1.29 per head, or about one-fourth of a cent per pound of beef. By what other method can the difference between cattle prices and beef prices be made smaller, and how can the conflicting demands of producer and consumer be better satisfied? 1918 Year Book of interesting and instructive facts sent on request. Address Swift & Company, Union Stock Yards, Chicago, Illinois. Swift & Company, U. S. A. Local Branch, 7 Commerce St., Norwich, Conn.

Twelve tobaccos drawn into one flavor NO one tobacco has everything you want in a cigarette. To get the flavor that has made Mecca the favorite cigarette of over a million smokers, it takes twelve tobaccos—five Turkish and seven American. One tobacco is chosen for fragrance, another for smoothness, another for body—and so on. Each tobacco adds its own peculiar quality. Not just mixed but "still-blended" These tobaccos are not just mixed. They are placed in the blending-still, and moist heat is passed through the twelve tobaccos until all the different flavors are drawn into one, much as the full flavor of tea is drawn out by steeping. Only in this way can be obtained the true Mecca flavor. Guaranteed by The American Tobacco Co. 9750,855 MEN ARE REGISTERED FOR THE NEW NATIONAL ARMY In less than one day enough Mecca cigarettes are made to supply every one of them with a smoke.

ALADDIN'S MAGIC HAS NOTHING ON THIS OHIO WIZARD Discovers drug which loosens sore, touchy corns so they lift out You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told to use a drug called frezone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all lifts out with the fingers. This new other drug is the recent discovery of a noted Cincinnati chemist. It is a sticky substance which dries the moment it is applied and is said to simply shrivel the corn without inflaming or even irritating the surrounding tissue of skin. It is claimed that a quarter of an ounce of frezone will cure very little at all of the drug stores, but is sufficient to open the pores of every hand or foot corn or callus. You are further warned that putting a corn in a surgical habit.

Something New in Town From "The Land of the Long Leaf Pine" A Remarkable Treatment From North Carolina That Relieves Croup and Cold Troubles Without the Necessity of Internal "Dosing"—Applied Externally, It is Inhaled as a Vapor and Also Absorbed Through the Skin. Local Druggists Are Selling 25c Jars on 30 Days' Trial—No Charge If Not Delighted With the Results. Every year thousands of people suffering from various forms of lung trouble, make a pilgrimage to the pine barrens of North Carolina, "the land of the long leaf pine." The reason lies in the warm, dry air, perfumed with the spicy odor of the pine. Local druggists, however, have recently received a treatment that is almost as good as a trip South. This is Vick's VapoRub, the invention of a North Carolina druggist. VapoRub comes in saline form and when applied over the throat and chest, the body heat releases medicinal vapors that are inhaled with each breath, through the air passages, to the lungs, loosening the phlegm and soothing the inflamed membrane. In cases of severe chest colds, bronchitis, tonsillitis or incipient pneumonia, first apply hot wet towels to open the pores. VapoRub is then absorbed through and stimulates the skin, taking out that tightness and soreness in the chest. One rubbing with VapoRub usually relieves croup within 15 minutes and an application at bedtime prevents a night attack. For head colds, hay fever, catarrh or asthmatic troubles, VapoRub can either be applied up the nostrils or a little melted in a spoon and the vapors inhaled. To the progressive druggists here are anxious that their customers should try this new treatment, and are therefore offering VapoRub on 30 days' trial. NO ADVANCE IN PRICE—25c, 50c, \$1.00
