MYSTIFYING CIRCULAR LETTER. Announcement That Postmaster is to Be Selected as Result of Competitive Examination.

Circular letters, bearing a Washington date line of May 18, have been addressed to a number of Danielson business men. The letters come from a federal civil service school and make this announcement:

Under a presidential order, the postmaster general has directed the holding of a competitive examination for the selection of a postmaster to serve at your office and notice will soon be given there stating the date and place of examination. Applicants—both men and women—must be citizens of the United States, actually residing within the delivery of the district in which the vacancy occurs and be between the ages of 21 and 65. The postmaster general shall submit to the president the highest qualified eligible for appointment.

These letters bring the first intimation relative to the subject discussed and comes as a surprise to the majority of the people here.

It was stated here Friday that nothing is definite as to what was contained in the circular letters is known about the subject here at least publicly.

The letters come from a school that has a course of instruction to sell. Heretofore the postmastership of Danielson has been filled by appointment with the guests of Mr. and Mrs. John Greely of Academy street.

A member of the common council stated that the pump received here a short time ago had been connected up and had worked so efficiently that it was possible to fill the standpipe on Oak Hill and to stop the engine them for a period of four hours, something that it has not been possible to do before for a long time.

Flea Beetle Appears. The flea beetle has made its appearance in potato patches in towns in this county. It is stated Friday by County Agent B. W. Ellis, and other warned farmers, and particularly home gardeners, to be on the lookout for the pest.

Mr. Ellis says that the little beetle, which hops about like a flea, bores holes through the young potato leaves and eventually practically destroys them.

A protection against the pest is to spray the plants with a solution of arsenate of lead or other such effective mixtures. The spraying must be done thoroughly to be effective, Mr. Ellis points out.

The spray should be mixed on the basis of two teaspoons of powdered lead, or four teaspoons of paste lead, to a gallon of water. This may be applied with the usual spraying apparatus or may be put on with a whisk broom.

Those who wish to use the spraying mixture in larger quantities may mix two pounds of powdered lead or four pounds of paste lead to 50 gallons of water.

Fighting this little pest is necessary if one wishes to save his prospective potato crop.

Preferring to enlist of their own accord rather than go into the service eventually through the operation of the selective service law, a goodly showing of young men who are to reach or have reached 21 years of age before June 5 are inquiring about enlistment privileges and several already have gone into the army or navy.

The next day is next Wednesday and arrangements have been completed here to register all young men in the towns of Putnam, Killbuck, Thomaston, Woodstock, Eastford and Ashford who have become 21 years of age since June 5 of last year. The local board will have the assistance of Putnam men in carrying out the registration work.

CANTERBURY PLAINS. Able Addresses at Prohibition Meeting—Why the Saloon Must Go.

At the recent W. C. T. U. free will offering for the purchase of the new building for the church, Mrs. J. J. Fields of Norwich and Rev. A. T. Barwick of Plainfield, Mrs. Field is well known throughout both Norwich and Windham counties for her L. T. L. work in supervision and was most happy in her able presentation of this subject.

Rev. Mr. Barwick based his address on it. He indicted the liquor traffic, dwelling on its menace to health, industry and morals. The saloon is a bar to all forms of good and a door to all evils on the way to hell. There is no question before our nation today of greater importance than that of prohibition and an allied question of what is to be had as substitutes by those addicted to liquor. Some real good must be done in the construction of plans must be made by each community to fit its own needs.

Mr. Barwick emphasized the possibility of bettering the school buildings being used aside from hours of school and of worship as places inviting and helpful, with suitable aids to this work, especially in cities where often families are crowded as in a case instance, where chalk marks were being put on the walls for families and one family had the middle of the roof and no walls.

A quartette from Mr. Barwick's training choir, with fine voices, gave several selections during the evening, adding greatly to the success and pleasure of the meeting.

"That was a mighty clever retort you made, my dear," said the low-brow.

"Who told you?" replied Miss Fresh.

"I heard you say it."

"Yes, but who told you it was clever?"—Illustrated Sunda-Magazine.
