

DARKEN GRAY HAIR, LOOK YOUNG, PRETTY Grandma's recipe of Sage Tea and Sulphur dyes so naturally that nobody can tell.

Hair that loses its color and lustre, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmothers made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old-time recipe.

and prosperity of the weaker and less advanced nations. The confraternity of all nations, strong and weak, civilized and savage, in order of trusteeship, purged of the spirit of exploitation and loyal to the ideals and governments of the society of nations, must work out the federation of the world and the parliament of man, because of the very fundamental and inextinguishable facts, which the world has been awake by this war, of community interests as paramount.

Out of this tragic life or death struggle, with its appalling and unappreciable cost, daily renewed and increasingly grew to paramount importance the community idea and ideal, as against particular dynasties, sovereignties, nationalities. For even groupings of these for particularistic aims and mutual aid and defense of sovereign rulers, classes or claims.

The war was clearly envisaged at least as far as the limits of its duration, of the enleagued free peoples for the common, elemental and sovereign rights and well-being of the masses of the people, in its nationality and class, against all the forces which were bent upon exploitation and rulership of peoples.

Transportation. Transportation means more than the keeping of rates of tariff and the checking of bills of lading. It means the speed, improvement and extension of all means of getting goods to market—railroads, electric roads, motorways and highways. In equipment it means motor trucks as well as cars and boats. Your committee on transportation is now studying the means of getting goods to market from a trail to a highway or railroad.

Welfare of Individual. Having looked after production, industry, commerce and transportation, we come to the welfare of the individual. It is not enough to increase business and provide it with facilities. The very foundation of good business is the welfare of the people. We must have a city plan, we must have a simple, we must look ahead and plan for the future as well as present.

Committee Work. Having defined the functions of a Chamber of Commerce and adopted a programme of activities the next step is to appoint committees to carry out the programme. Your Chamber of Commerce is a great organization. Your committees should be selected with due consideration of their ability to carry out the projects. They should be composed of men who have demonstrated their ability and whom the public has confidence in.

From War to Peace Conditions. The American people during the past two years have learned to do more than to produce and to consume. They have learned to do more than to consume and to produce. They have learned to do more than to produce and to consume.
