TREATY RESERVATIONS

Will President Wilson squarely join issue with the senate and say that the proposed reservations to the League of Nations are neither wise nor patriotic?

The senate foreign relations committee has met his challenge by presenting definitely framed reservations, as it affects the interests of the United States. They intend only to safeguard the future of the country.

Does anyone find in these formal statements of policy and principle anything that endangers the peace of the world? Do they contain any element of threat against another country? Are they not in form and in fact expressions of the interests of the United States? They intend only to safeguard the future of the country.

Harvard football huskies recently have the physical qualifications for wearing nightsticks.

The man on the corner says: The profiteer is all modesty when it comes to proclaiming his deeds.

Rumania says she trusts the United States but at the same time proceeds to do her own map making.

Brooklyn praises the weather clerk for this cool spell. The city was just on the edge of an ice famine.

There should be no delay in Norwich in providing the money needed for the Welcome Home celebration.

Senator La Follette is still strictly up to form. He used thirteen hours the other day in talking on one subject.

New York schools have opened with 40,000 on part time basis. Even the metropolis can't keep up with school needs.

What would a good American husband be worth if women in Russia are paying \$200 for husbands not worth 30 cents?

Well, anyway, President Wilson's tour ought to boom Paris styles in no longer a war, it is cold civilization, premeditated destruction, the victory of might over right, the debasement of human nature, a defiance of humanity.

RECORD OF THE A. E. F. It is doubtful if any force of 2,600,000 men in military service in a foreign country could have come out with as clean a record as has been shown by the American expeditionary force in France.

A Fifth avenue milliner just returned from Paris says that American soldiers have married so many of the little French dressmakers that there is a great shortage in that line of labor.

Berger says all he got out of being a member of the national executive committee of the national socialist party was a twenty-year prison sentence. And he knows of that only by hearsay so far.

It takes vigilance to beat the profiteer. In New York it has just been discovered that army food has been bought by wholesalers and resold at a profit of 25 cents.

Carranza declares that if Americans want to go into the Tampico district they must look out for themselves. And then he wonders why foreign countries complain because Mexico doesn't protect subjects of other countries.

The president says that if the treaty is accepted our soldiers will never go over the seas again. Yet they are telling us it will take 100,000 American soldiers to police the nationalistic parts of Turkey and Americans are wanted to aid in giving protection at Flume.

of unusual conditions there was no greater number of serious transgressions.

FIVE HOURS AND GOAL

President Wilson's plea that this is no time to attempt a cure of the high cost of living by the remedy of increased wages has evidently fallen upon deaf ears as far as the mine workers are concerned.

Such a declaration, according to prediction, will be sent to Buffalo where the convention is to be followed by a conference later in the month. It is to be supplemented by the recommendation that necessary what is termed a continent-wide strike be called.

Prices of coal, it will be generally agreed, are factors in the high cost of living, and some are not to be dissociated with cost of production. How the mine workers propose to reduce the high cost of living by adding to coal prices through a 30-hour working week is certainly a relevant question.

OPENING UP ALASKA

One more of the lands of romance which were to be sought only by hardy adventurous spirits, is to be made available to any one with the price of a railroad ticket when the new government railway to Alaska is completed.

The old Alaska of winding trails, towering mountains, roaring cataracts, and impenetrable forests was closed to all but the hardiest of the race who were drawn by the lure of gold and the pioneering spirit; yet it drew men by the thousands. Alaska will be far enough away to appeal to the sterner and more progressive spirit.

Alaska has miles of awe inspiring scenery, thousands of acres of agricultural and timber land, great mines and still greater mineral deposits to be developed, millions of tons of coal untouched and extensive and richly paying fisheries.

The government road, when finished, will connect Seward, at the extreme south of Alaska, with Fairbanks, some four hundred miles to the north. The total cost of the road is about \$45,000,000.

With the new railway completed, the adventure of Alaska will offer reasonable assurance of good business returns.

EDITORIAL NOTES

Harvard football huskies recently have the physical qualifications for wearing nightsticks.

The man on the corner says: The profiteer is all modesty when it comes to proclaiming his deeds.

Rumania says she trusts the United States but at the same time proceeds to do her own map making.

Brooklyn praises the weather clerk for this cool spell. The city was just on the edge of an ice famine.

There should be no delay in Norwich in providing the money needed for the Welcome Home celebration.

Senator La Follette is still strictly up to form. He used thirteen hours the other day in talking on one subject.

New York schools have opened with 40,000 on part time basis. Even the metropolis can't keep up with school needs.

What would a good American husband be worth if women in Russia are paying \$200 for husbands not worth 30 cents?

Well, anyway, President Wilson's tour ought to boom Paris styles in no longer a war, it is cold civilization, premeditated destruction, the victory of might over right, the debasement of human nature, a defiance of humanity.

RECORD OF THE A. E. F. It is doubtful if any force of 2,600,000 men in military service in a foreign country could have come out with as clean a record as has been shown by the American expeditionary force in France.

Carranza declares that if Americans want to go into the Tampico district they must look out for themselves. And then he wonders why foreign countries complain because Mexico doesn't protect subjects of other countries.

MODERN COURTSHIP

"There go two more of 'em," the tall, lank householder said indignantly, parting the vines shading his front porch from the street.

"You are more wrought up over this than you ever were over the dear old Pheny-across-the-street," declared his wife anxiously.

"Never," mourned the tall, lank householder. "The boys of the present day and the girls have absolutely no use for each other. Why, you never see 'em roaming around together, regular procession of pretty pink and white creatures in fluffy organdy gowns going to the movies together, eating ice cream soda together, discursively promenading the streets together trying to pretend they are having a perfectly good time and aren't wondering a bit where on earth all the boys are—and where are the darned boys? Teasing by at fifty miles an hour in father's car, whooping it up and quite indifferent to the procession of deserted maidens."

"The only excuse a boy that age has for encumbering the earth is taking some girl and making her happy. That's what they are for and I am pained and surprised at the way they do it. When you see a young man things were different. If only I had a multiple personality and were you at the same time, I could see these girls who wander by here with sadness in their hearts, though they are smiling and making eyes and the best brand of face powder."

"Why, several of my friends are dowered with blooming daughters and I never see 'em committing matrimony today as there ever were."

"Maybe," admitted the husband, "but their courtship is over. I guess they must just ring up on the phone the girls they have picked out and say they will be married soon to marry 'em. That's exactly what the young soundrels do doggone 'em!"—Exchange.

IN THE DAY'S NEWS

The Island of Yap. In connection with the announcement by President Wilson that the island of Yap may be acquired by the United States as a reparation for the sinking of the Lusitania and as a wireless and cable station, the following information is given by the National Geographic Society:

"Yap, the westernmost of the Western Caroline Islands, is situated about 500 miles from the Philippines, 100 miles east of the island of Mindanao and 100 miles from the Philippine group. It has a population of about 100,000. The island was the administrative center for the Western Carolines, the Pelew and the other islands of the group, and had made plans to locate a wireless station there but was prevented when Australian troops captured the island."

"Yap is strangely old and strangely up to date. Its inhabitants are still in the stone age, and progress and copper is almost the only export, but there are features in their life that seem to have been in the latest socialist doctrines."

"On the island of Yap, the natives are strict prohibitionists, made so by the missionaries of the German and Munich famous. Children belong to the community, are frequently adopted, and the practice of infanticide is common. The Yap dress suit cannot be bought but is rented to the young men who desire to show off. And since food and drink and clothes are all on credit, where any one can secure them, the money of the island represents value rather than gold or silver. But one can better understand the meaning of the burden of wealth when one hears that the average man of the island sometimes weighs hundreds of pounds."

"Yap, or Yap, when translated means 'the land of the only man' and many of the islanders know, although many a native from this island has been known to travel through the world from his home and returned without chart or compass among islands where the natives speak a language which is an attol but is itself of volcanic origin. The only good harbor is Tomli Bay."

"Married and unmarried men alike belong to the club which maintains a fine fallu or bachelor house, the access of which must be secured by force or cunning from some distant tribe. There she lives under a patriarchal system where no man is jealous and the wives of the village never object to their husbands' evenings at the club. If one of them eventually marries the hostess he sets up a new home for her, but the tattooed hands and legs which distinguish her as a misl or 'queen of the club' remain to prove in her weakened old age that she was the darling of the club. It is the custom of the club, that member is told to seek other fields for his social graces and the party goes on without any bad feelings."

"The chief decoration of the male is a string of pink shells made into a necklace, and since no man is rich the shells are treasured for such a period as the wearers may choose to be dressed in the height of fashion. As there are no clothes, the man may wear two bouquets in each—a sort of corsage bunch in a large hole in the lower 'lobe and a small boutonniere in a smaller hole higher up in the ear. Shell cuffs made of conchids add the finishing touch to the correct dress of the male."

"Yap women do not wear the veil. Their only dress is a voluminous skirt made of leaves or fibre and composed of four or five thicknesses. Although one month is average life expectancy, the women are said to be beautiful and healthy."

Buttermilk Creates Beauty Overnight

Delightful New Vanishing Cream Contains Pure Buttermilk Makes You Look Years Younger in Money Back.

The first application of Howard's Buttermilk Cream creates beauty almost like magic, but the most wonderful thing about it is the fact that while it turns the duldest and most lifeless complexion to radiant beauty and makes the rough arms snowy white, yet there is not the slightest sign of its use upon the face. It actually vanishes from the skin and the most heated atmosphere will not be perceptible to the skin.

There is no doubt about the result—it is just common ordinary Buttermilk in the form of a wonderful cream gently massaged with the finger tips around the corners of the eyes and mouth.

To prove this to your complete satisfaction, obtain a small quantity of Howard's Buttermilk Cream from your druggist or any toilet goods counter on the money-back-if-dissatisfied plan. The directions are simple and it costs less than any girl or woman can afford it.

MAN-OF-WAR TOSSED ABOUT BY EARTHQUAKE

"Dispatches received from the Pacific fleet were shaken by an earthquake off the coast of Mexico recalls an amazing incident in which a United States man-of-war was carried three miles up the coast, leaving a rudder at each end, and was quite flat-bottomed—a conformation which, while it did not aid her seaworthiness, enabled her to carry a large battery and crew, and eventually saved our lives in the catastrophe which was soon to come upon us."

"In 1881 I was attached to the U. S. S. Waterer, then on duty in the South Pacific in one of a class of boats built at the close of our Civil War to ascend the narrow tortuous rivers of the South; she was termed a double-ended rudder, having a rudder at each end, and was quite flat-bottomed—a conformation which, while it did not aid her seaworthiness, enabled her to carry a large battery and crew, and eventually saved our lives in the catastrophe which was soon to come upon us."

"While the anchorage was an open roadstead of almost any size, it was partly protected from the prevailing winds by Akaran Island, small and apparently a lump of rock broken off from the shore. The men-of-war of the town and possibly half a mile distant."

"I was sitting in the cabin with our commanding officer, about 4 p. m., when we were startled by a violent trembling of the ship, similar to the effect produced by letting go the anchor. Knowing it could not be that, we ran on deck. Looking shoreward, our attention was instantly arrested by a great cloud of dust rapidly approaching from the southeast, while a terrible rumbling grew in intensity, and before our astonished eyes the hills seemed to nod, and in ground swayed like the short choppy waves of a troubled sea."

"Our prudent commander, however, gave the necessary orders to prepare for any emergency. The men-of-war were let go, hatches battened down, guns secured, life lines rove fore and aft, and for a few minutes all was the orderly confusion of a well-disciplined man-of-war preparing for action. Many hands made short work, and in a few moments we were prepared for any emergency."

"But our troubles then commenced. We were startled by a terrible noise on our bottom, as if a tremendous roller of muslin, lasting several minutes. Again the trembling earth waved to and fro, and for a few minutes all was the orderly confusion of a well-disciplined man-of-war preparing for action. Many hands made short work, and in a few moments we were prepared for any emergency."

"From this moment the sea seemed to defy the laws of nature. Currents ran in contrary directions, and we were borne here and there with a speed we could not have equaled had we been of course destroyed by the first irregular intervals the earthquake shocks recurred, but none of them so violent as the one which was the first to strike the man-of-war. The Peruvian man-of-war America said to be the fastest ship in the world at that time, had hastily gotten up steam and attempted to get to sea. She was well out when the receding water left her partly afloat and broke her back, causing her to sink. The man-of-war was then rapidly setting in toward the Morro, as if intending to help her. Lieutenant Commander Jere, commanding the 'Fredonia' saw the man-of-war, and thinking the 'America' was coming to their aid, and that a nearer approach would only involve them both in destruction, ran on the poop and hailed the approaching ship."

"The morning sun broke on a scene of desolation seldom witnessed. We found ourselves high and dry in a little cove, or rather indentation, in the eastern base of the mountain, some 3 miles up the coast and nearly 2 miles inland. The wave had carried us over the sand dunes bordering the coast, across a valley and over the railroad track, leaving us at the foot of the sea-coast range of the Andes. On the near side of the mountain, the marks of the tidal wave, and by measuring found it to have been 4 feet high, not including the comb. Had the wave carried us 200 feet further, we would inevitably have been dashed to pieces against the mountain side."

Had the wave carried us 200 feet further, we would inevitably have been dashed to pieces against the mountain side."

STORIES OF THE WAR

From Prison to Presidency. (Correspondence of The Associated Press.)—One of the men who were arrested by Austrian authorities after the assassination of Archduke Franz Ferdinand in 1914, is now president of the provincial government of Bosnia, Herzegovina and is recognized as one of the leaders in the new kingdom of Jugoslavia. He is Atanasije Shola. He was kept in prison at hard labor during the war.

In his office in what was formerly part of an Austrian prison, Mr. Shola described his arrest at that time and subsequent rise to power. He is a Herzegovinian, forty-two years old and considered one of the ablest of the Jugoslavs. "On hundred and fifty-six of us were placed under arrest in July, 1914," he said. "There was no proof that I was in sympathy with the Jugoslav propaganda, but the authorities suspected what was in my heart. Sixteen of the men were put to death before we were condemned to death. The death penalties were not executed, because of the removal of the King of Spain, but the prison sentences were all made effective."

"I went to prison on July 28, 1914. My cell was small and in a concrete cage, and I was kept at hard labor. In October of 1918, the people of Bosnia, Herzegovina and other provinces of the Austro-Hungarian Empire, anticipated the debacle of the empire, and organized the National Council for the conduct of affairs. As soon as the Austrian army fled this council came into full executive power and the men wrongly imprisoned were liberated."

"I was released from prison on November 1918, and almost immediately was chosen to be president of the government of Bosnia, Herzegovina and other provinces of the Austro-Hungarian Empire, anticipated the debacle of the empire, and organized the National Council for the conduct of affairs. As soon as the Austrian army fled this council came into full executive power and the men wrongly imprisoned were liberated."

A Voice From Sioux City, Iowa, says

WORTH ITS WEIGHT IN GOLD

You cannot mistake the words of Mr. W. W. Northrup, of 988 Fourth Street, Sioux City, Iowa. He is enthusiastic about his present health and the merits of PE-RU-NA and wants everyone to know it. Here is a recent letter from him:

"PE-RU-NA is worth its weight in gold and then some. I used to think it only a man's remedy but have changed my mind. I had a cough, especially in the morning, and it was very annoying. PE-RU-NA was a much better. I would cough up clouds of phlegm and mucus, my eyes tickled and bothered me. Judging from the symptoms given back at home it was catarrh. My stomach is in much better condition since using your medicine."

"Use this treatment, if you wish. Don't hesitate to describe the results of PE-RU-NA." (Signed) W. W. NORTHRUP.

There are thousands just like Mr. Northrup, skeptical at first but convinced by a trial of PE-RU-NA. DON'T BE AN UNBELIEVER. If your trouble is of a catarrhal nature, try PE-RU-NA, then tell your friend. It is fine after an attack of grip or Spanish flu.

Sold Everywhere Tablets or Liquid FOR CATARRH AND CATARRHAL CONDITIONS

Bosnia-Herzegovina. He said that the people generally were in sympathy with the central Jugo-Slav government at Leigrade.

Troops to Remain in Germany. (Correspondence of The Associated Press.)—Composition of the final permanent peace of American troops in Germany has just been announced. According to the terms of peace the American troops are to be reduced to the best barracks formerly occupied by the German army.

The Eighth Infantry, as has previously been announced, will form the main body of combat troops. A crack cavalry detachment of two troops has been organized and will be under command of Colonel J. M. Wainwright. This mounted unit will be used for the guard of the American zone in the occupied territory and as a headquarters guard. The two companies of the Seventh machine-gun battalion, members of which claim the distinction of being the only American unit which ever fought in the city of Charleston, S. C., will form part of the United States garrison on the Rhine.

The Seventh machine-gun battalion and the Eighth Infantry, which was instrumental in stopping along the Marne the last great German drive on Paris. The list of units in the permanent garrison as announced at the Coblenz headquarters follows: Commanding general, Major General Henry T. Allen and staff; headquarters field clerks; one certified headquarters and police company; the Eighth Infantry regiment; the Seventh machine-gun battalion; two companies, one supply and one medical, of the permanent repair shop; the first field signal battalion; Company A, first engineers; the headquarters of the headquarters and bakery unit; ordnance detachment; the Second battalion, Sixth Field artillery and a medical department. The forces will consist of between 7,000 and 8,000 officers and men.

MAN-OF-WAR TOSSED ABOUT BY EARTHQUAKE. "Dispatches received from the Pacific fleet were shaken by an earthquake off the coast of Mexico recalls an amazing incident in which a United States man-of-war was carried three miles up the coast, leaving a rudder at each end, and was quite flat-bottomed—a conformation which, while it did not aid her seaworthiness, enabled her to carry a large battery and crew, and eventually saved our lives in the catastrophe which was soon to come upon us."
