Each year the necessity arises, to emphasize certain lessons, and it is these lessons, these problems on which we are working in school, which are not in the text books, but in the curriculum which I believe to be so important and which I would have you know about.

First of all, it is the lessons, thoroughly emphasized, that are the lesson of Service. We have continued to serve, we have regularly spent some time on working for the Junior Red Cross. The children have made many little things which will gladden the hearts of those less fortunate than they. We have again sent the required amount of money to our orphan, Celine Hamer, money contributed by the children from their own savings. We have still kept up buying thrift stamps, we have continued our custom to play Santa Claus to children who need it.

So we have proved our belief in Service—trying to impress upon the children continually that Service is our one great duty, that he in the curriculum who serves not only in war, but also in peace; and that he serves his country best, who makes of himself a good citizen who learns how to build character.

We all know we need leaders. I sincerely hope, that each one of these children may become a leader in her or his line, that is, a human being which can face a reality, understand a problem, and have the courage to value it.

**FINDING ANNOUNCED IN PUTNAM MAN'S CASE**  
A finding and award have been announced by Compensation Commissioner James J. Donohue in the case of Barney Clancy, No. 249 Main street, Putnam, claimant vs. H. Wale Lines Co., of Meriden. The claimant appeared in person at the hearing which was held at the commissioner's office in this city, on Friday morning, June 4th. The finding was announced Thursday.

July 26th, 1919, while in the employ of the respondent in Putnam, the claimant was injured, his injuries consisting of a fracture of the left forearm and lacerations to the shoulder.

The commissioner has awarded the claimant compensation from April 27th, to and including June 9th, the date on which the claimant agreed to resume work at 4 o'clock. The total compensation which is at the rate of \$12.15 per week, amounts to \$74.64.

**CHILDREN'S SUNDAY TO BE OBSERVED ON JUNE 13TH**

Children's Sunday, June 13th, seems to be a very appropriate occasion to call attention to the work of this commission. It is a statement in a letter which has been sent by Professor H. P. Fairchild, executive secretary of the Connecticut Child Welfare Commission, to the clergy of Connecticut Child Welfare Commission, to the clergy of Connecticut, in view of the activities of the commission.

Progressive circular letters were sent to every Protestant minister in the state, and 250 copies were forwarded to Bishop John G. Murray, for distribution in the Catholic churches.

"Since legislation can never progress far in advance of public sentiment and opinion, the success of the commission depends upon the thorough understanding and sympathy with this work on the part of the people of the state," says Mr. Fairchild, in explaining that the first step in obtaining this result is to acquaint the people at large with the work of the organization.

The commission, which was authorized by the legislature and appointed by Governor Bruce, is now in the progress of making a thorough study of child welfare conditions in Connecticut. It has been doing its work for the last six months. A code of laws in relation to child welfare work will be submitted to the general assembly at its session next year.

After a careful examination of the broad field which the law opened up in the commission, it was decided to concentrate the work for the present on certain phases of the problem which was of the greatest importance in their field, and on the activities of the children and also most appropriate for immediate legal regulation. These matters include the care of dependent and neglected children, the handling of cases of delinquent children, the treatment of defective, the regulation of street trades and the care of children under four years of age, in addition to which the commission plans to recommend legislation covering certain matters which do not require intensive investigation of Connecticut conditions.

Recognizing the need of thorough-going investigation of all activities dealing with children, the commission is working upon the solution of that problem.

The value of the work which is being done by the organization made possible by action of the legislature at the last session will be commented upon from many pulpits, Sunday, in response to the appeal sent out by the commission.

**WILL COST MORE TO RIDE ON GROTON FERRY**  
A five cent fare on the municipal ferry between New London and Groton will be in effect July 1, instead of the present rate of three cents, as the result of action taken at the annual meeting of the board of ferry commissioners.

Superintendent of Ferry George W. Sisson, in giving out the information Thursday, stated that the vote of the commission was unanimous.

The increased fare was made necessary by the increased cost of operation of the ferry for some time have been in excess of the operating receipts and Superintendent Sisson stated that if it were not for the fact that the ferryboat Nathan Hale had been sold at a profit of \$15,000 the commission would have been forced to borrow money from the city of New London. The commission decided that it would not be fair to ask for an increased tax on the whole city to meet the deficit and accordingly decided to advance the fare.

The question of the attitude of the merchants was discussed and it was suggested that if Groton's trade shows a falling off as the result of the increased rate business men might remedy the situation by offering a rebate with sales to encourage patronage from across the river.

Despite the fact that the pay roll has been kept as low as possible, Mr. Sisson says that the increased cost of operation coupled with the opening of the new highway bridge has materially affected the ferry returns. In going over the situation the commission saw wherein it would be made worse off next year than this, if it continued at the present rate.

Under a previous contract, which expired July 1, it has been able to buy coal for \$7.50 a ton. Three thousand tons were purchased at this figure last July and now coal costs in the neighborhood of \$15 a ton, and other things have advanced in equal proportion.

While the legislative character of which was granted by the ferry law, it provides that only three cents shall be charged, a precedent has been established in favor of a five cent fare. The shipping board has been charging five
