A person who saw the collision summoned Dr. William Tyler Browne, who found that Mr. Crumb had wrenched his back and had a bad bump on the head. In the United States district court on Wednesday the case of the Estate of Morton F. Plant against James J. Walsh, Internal revenue collector, an action in which the plaintiff seeks to recover amounts paid the government for income tax and which it is claimed was illegally assessed was heard.
The plaintiff seeks to recover from the government certain real estate and some farms on which he had cows, chickens, swine, sheep and raised vegetables. It is the claim of the estate that expenses incurred by Mr. Plant in raising and caring for these animals and crops are considered a part of the income and the government contends that Mr. Plant was not engaged in farming as a business but for pleasure and that the loss in farming on the Plant property in 1917 was 200 per cent. more than the receipts and 100 per cent. more in 1918.

FOR STATE RESERVOIRS
For some months water companies in the state have been busy in securing shipments of chlorine for the purification of water and last month with the outbreak of the railroad strike the situation looked critical. Approximately a million pounds of chlorine are dependent upon chlorine for safe drinking water and the knowledge that the state would be deprived of its supply at a time of the year when chlorination is most necessary has caused the department of health to take energetic action. A small supply of chlorine was secured by motor truck and after considerable difficulty a special permit was secured for the shipment of a carload from Niagara Falls to Hartford.

HOW FRUIT GROWERS ASSURED POTATO CROP
Pittsburgh, Pa., June 10.—With the appearance of new potatoes in the market, growers and consumers are realizing what would have happened to the supply and to prices if prompt action had not been taken to relieve Florida growers whose early plantings were rotted by the rail strike. The United States depends, to a large extent, upon Florida for its supply of early potatoes.
During the last six days of January, growers in the Hastings district, Florida, faced disaster. A large portion of a 20,000 acre planting was already in the ground. On Jan. 26, heavy rains set in and continued until the last of the month. Rot resulted. It appeared to individual growers that all their investment in seed potatoes, in fertilizer and in labor had been wiped out in six days. About 4000 acres of this tract were held in joint contract by American Fruit Growers, Inc. Realizing the short supply and price disturbances that would result if the Hastings crop were not available to the summer market, this organization negotiated for the shipment of fifty cars of seed from the state of Maine, from Boston, New York and Cincinnati. On the basis of 100 bushels to the car, this action represented an investment of about \$200,000. The seed arrived in time to permit replanting the damaged acreage, not only that controlled by the company but the lands of all growers whose crops had suffered rot.

Vienna, June 9.—The Hungarian cabinet headed by Alexander Simonyi Sembeny, premier and minister of the Interior, has resigned. The resignations, Budapest advisers say, were caused by inability of the ministry to cope with the situation created by terrorists.
