PRESIDENT WILSON GOING INTO EXCLUSION AFTER MARCH 4. Washington, Feb. 7.—President Wilson plans to go into virtual seclusion for a time after March 4.

Mr. Wilson is understood to have received a number of invitations to spend part of the summer out of Washington, but because of his delight with the pleasant weather here last summer, the first which he has spent in this city, it is regarded as unlikely that he will accept any of the invitations.

For possibly six months, friends of the president believe, his life will be wholly taken up with recreation. His chief diversion since his illness has been reading. He is said to have practically exhausted the field of detective stories, of which he has always been especially fond, and more recently has taken up novels and light stories. He also has given some time to reading political and historical works, and poetry.

Since his resumption last week of his old custom of attending the theater, the president is expected to continue as his health improves to find scenes more and more to avail himself of this form of recreation. He also is expected to continue his daily automobile rides.

"The More Shortening the Richer the Cake"—A Common Misunderstanding in Cooking. Equal to Butter in richness, but you use 1/3 to 1/2 less Mazola, and why.

ONE great fault with many cooks is to use too much shortening in their cakes and pastries. This very often causes cakes to become heavy and indigestible, and pie crusts soggy and pasty.

And the corn bread, muffins, bran or Graham gems, and cookies and puddings you can make with Mazola are a source of pride to even the experienced housewife.

For the Finest French Pastry The finest French pastry is now being made with Mazola. It is more delicate in taste, and with a greater richness than any other pastry; for Mazola gives richness and avoids soggy.
