Let New England's Users Answer Your Questions

It May Not be New to You

this pipeless method of heating a whole home, church, or store, from a single register—perhaps you've heard a lot about the excellent service it gives its users—the great saving in fuel—the moderate cost for old or new places—and its many other advantages in use. You may be very favorably impressed with what you've heard—

But you should plan to attend Manufacturer's Display at

O'NEIL-McGRORY'S FLECTRIC STORE, Franklin Square

As the Round Oak Appears In Use

ROUND OAK PIPELESS HEATING SYSTEM

Guaranteed by the Round Oak Organization and J. P. Barstow & Co.

Besides the interesting display of the Round Oak itself, you should see the collection of New England photographs showing homes, churches, stores, and buildings of all kinds in which the Round Oak has given unusual satisfaction in coldest winter weather. You should also read the letters many of these users have written—and no matter how long you think it will be before you can have a new heating plant—

You Should KNOW the Answers to These Four Questions

1. Can your place be heated satisfactorily with the Round Oak Pipeless Heating System?
2. Where would the register be located in case the Factory Engineers find it is adapted to this system?
3. What size plant would be needed to make sure of abundant warmth in coldest weather?
4. What would be the exact cost for your place—all ready to use—without extra charges for material and labor later?

READ

THESE EXTRACTS FROM LETTERS OF ROUND OAK USERS

Their Names and Addresses Will be Given On Request

Does It Heat the Whole House?

"The Round Oak you installed in our house last Fall has done all you claimed for it. Every room up and down-stairs is warm and comfortable." Letter No. 507, January 20, 1920.

Is It Clean?

"It stands for comfort and economy and is absolutely dustless, which makes it a great pleasure for the housewife." Letter No. 500, Nov. 15, 1920.

Is It Simple to Operate

"I always plan to have enough coal in the fire pot to run the heater till the next regular time for adding fuel, with the result that last winter no one except me ever had to make a trip to the cellar to see the heater. The women, and even the children, open or close the drafts as occasion demands, by merely going to the regulator. I failed to realize how completely free from care of the heater the women were, till some months after it had been in use my mother was showing it to someone and I heard her say, 'This is the fire pot door but I have never opened it.'" Letter No. 509, Nov. 15, 1920.

Does It Save Fuel?

"We have had weather from freezing point to 18 degrees below zero. The amount of fuel used is very little more than what we formerly used in one stove in our sitting room, whereas now we have the whole house warmed on approximately the same amount of fuel." Letter No. 507, Jan. 20, 1920.

Is It a Good Investment?

"I think it is a good paying investment for anyone whose home has a Round Oak, and let me tell you, I recommend the Round Oak to many in You have sold about ten through me." Letter No. 513, Oct. 25, 1920.
