DEMOCRACY HAS DEFECTS BUT IS NOT THE FAILURE SAID COLLEGE MAN

Democracy is not a failure—not yet, but the world needs a great leader to bring democracy to its full fruition, and when he arrives he will be the hero of the age. This was the conclusion reached by Prof. Henry W. Lawrence, Jr., of the department of history at Connecticut college, in an address he made Monday night before the meeting of the Brotherhood of the United Congregational church, following their supper at the Community house on Church street.

Prof. Lawrence's address was a searching discourse upon democracy in the course of which he remarked that the general strike and the dictatorship of the proletariat, two not unfamiliar terms before the meeting of the Brotherhood, were each a threat of the disintegration of democracy.

He summed up his talk of an hour and a half by giving some of the defects of democracy and what it had failed to accomplish in the course of its history. He pointed out the experience of the seven principal democracies, the United States, Great Britain, France, Canada, New Zealand, Australia and Switzerland.

Among the defects he mentioned instability of the executive government owing to frequent changes, this not applying so much to the United States, but particularly to France and England. Another defect he said was the failure of the executive to maintain law and order, shown in the United States by the recent lynching, and in Australia and Canada by the administrative extravagance, in which the United States is the worst for financial reasons.

He also pointed out the failure of democracy to bring about a more just distribution of wealth, and the fact that it has failed to bring about a more just distribution of wealth, and the fact that it has failed to bring about a more just distribution of wealth.
