WHAT KIND OF SOAP FOR A WASHING MACHINE

I always think of soap as the partner of a washer. Some soaps are lazy partners, others do their full share of the work. Soaps that do not dissolve completely, that give light, frothy suds without substance, make a washing machine do more than its share of the work.

Rinsos, the new kind of soap, helps the washer do its best work. Every grain is so pure and perfectly balanced that it loosens all the dirt. It prepares the way for the efficient operation of the machine. When you use Rinsos you don't have to rub at all. Whether they have a washing machine or not, women the country over are using Rinsos in place of bar soap at every step of the family wash.
