Turning food into Beauty

That's what this girl does—Can you equal her? The glow of rich, red blood coursing through your veins, the response of muscles resilient with strength, a spring in your step and a light in your eye— In short, "up and at 'em." That's what perfect health means. The body draws its supply of health from the food you eat. You can calculate to a nicety the reserve you are building up for your future needs—work or pleasure. The greatest demand of the body is for an energy food, fuel for the human engine, quickly converted into power. Equal with this is the necessity for keeping up repair, building the stuff that forms the very fiber and framework of the body. Bread-and-Milk is the perfect food for both these uses. It contains the carbohydrates that supply energy for the immediate use of the body and leave a reserve of strength for protection. It also contains the rebuilding material for muscles and tissues—the bone-building substance. Bread-and-Milk eaten together form a perfect, balanced food. It supplies the body with energy and carries new materials to the parts in constant need of repair—all with no tax on nerves or digestion. One meal a day of Bread-and-Milk — and your best gift—good health—your chief asset in the business of living, is insured against the inroads of poor nutrition. For keen, abounding health, eat one meal each day of Bread-and-Milk.

Dear Uncle Jed: In a little village on the banks of the Quinebaug river, lived a little girl named Jane. Her mother, the little girl was about five years old, and her name was Jane. Jane's mother always told her not to go near the river. One day her playmate went to see her aunt, and she had no one to play with. Jane forgot what her mother had told her, and went down to the river, and got into a boat. She didn't know that the boat wasn't tied to anything and soon she was floating down the river. She was enjoying her ride very much, when all of a sudden she saw a dam. When she saw it she started to scream. A man heard her and went to her rescue as fast as he could. He just got her out of the boat when she was yards from the dam. The man who rescued her was her uncle, and she didn't know who he was as she was so excited. Jane's mother was her proud aunt, that she would never disobey her again. MARY McDERMOTT, Age 12, Jewett City. Going to a Ball Game. Dear Uncle Jed: One Sunday morning my brother, three of my friends and I went swimming. We swam for about an hour. Then my brother said "Let's go to South Coventry." We had to walk three miles to get there. We had to go through the woods. When we reached there we went into a candy store and bought some candy. We walked a little way and stayed there for a little while. Then we started back. On our way we met a boy who said that there was a baseball game. My brother asked who was playing ball and he said "Willimantic was playing against South Coventry, and he showed us where it was. We went to the game and saw the game. They had nine innings and they
