THE COAL STRIKE SETTLEMENT.
With most of the bituminous coal mines actively engaged in production to such an extent that the strike in that branch of the industry is virtually over much relief will be felt by the consumers.

LABOR DAY.
Labor day is a holiday set aside for the benefit of the workingman, a day for the giving of increased attention to the dignity and importance of labor.

TO TEST COCOANUT.
In selecting the kind of cocoanut you are going to use regularly in your home you should exercise care.

POP CORN.
Popcorn usually is popped to be eaten at once, or it may be made into popcorn balls, or other forms of popcorn confection.

HEALTH AND BEAUTY.
It is said that often disagreeable medicine will not taste so bad if a piece of ice is held in the mouth a few seconds before taking.

TURPENTINE TIPS.
Grained wood-work should not be washed with soap and water, but cleaned and polished at the same time by rubbing with a clean cloth dipped in turpentine.

MARKING YOUR LINEN.
All the household linen should be carefully and plainly marked. This is most important when the household washing goes to a big laundry, for a personal mark as well as the laundry mark is a double safeguard against loss.

WATERPROOF BOOTS.
One way of making boots and shoes waterproof is to melt together two parts of beeswax and one part of mutton fat.

CAPE FOR AUTUMN.
The smart little cape for autumn will be a separate garment, of velvet or some serviceable fabric.

DICTATES OF FASHION.
In the advance fall styles the use of back is retained and many models in crepe broadcloth and chiffon are combined with axes.

from the harvest we are now told that large quantities of the grain in the Ukraine are to be exported. That is a part of Russia that has ordinarily engaged in a large export trade, but the idea of sending out of the country grain which may be needed during the coming winter doesn't strike outside observers as a good policy.

Instead of exporting grain, which from all indications is being sold for the purpose of paying tribute to the soviet government the need would appear to be to so distribute it that any section which is likely to have a repetition of the horrible conditions experienced last winter might avoid it.

LABOR DAY.
Labor day is a holiday set aside for the benefit of the workingman, a day for the giving of increased attention to the dignity and importance of labor.

TO TEST COCOANUT.
In selecting the kind of cocoanut you are going to use regularly in your home you should exercise care.

The smart little cape for autumn will be a separate garment, of velvet or some serviceable fabric.

DICTATES OF FASHION.
In the advance fall styles the use of back is retained and many models in crepe broadcloth and chiffon are combined with axes.

WOMAN IN LIFE AND IN THE KITCHEN

SUGGESTIONS FOR THE HOUSEWIFE
The bathing cap may be kept in condition for another year by sprinkling it thickly inside and out with talcum powder or talcum powder.

Long fringes are caught with rhinestones and bead work is posed on streamers of ribbon. Satin and velvet appliques are seen on the crepe.

Many sleeves are made narrow at the top with wide bands at the bottom. Metal cloaky and velvet like wool velour are among the impressive fabric novelties.

For evening wear many soft draped chiffons register in grays and beige. A number of full length circular tweed capes are worn by Americans abroad.

Little roses made entirely of tiny triangles of colored galathite are seen this season. The leaves are made in the same manner.

One of the season's most agreeable and likeable sport fabrics may be its appearance under the name of cross-patch. In making its entry at this late date it may well be likened to a horse.

Wide sleeves of almost cloak-sleeve proportions characterize some of the advance models in autumn coats. There is usually a band of fur around the cuff or pool as a panel down the center edge of the sleeve.

Always spread all the pattern on the material before attempting to cut any of it. In this way the material may be economized and the best results obtained.

Weight the pattern down on the material so that it does not move while cutting. A good plan is to chalk a line around the pattern before cutting.

All the household linen should be carefully and plainly marked. This is most important when the household washing goes to a big laundry, for a personal mark as well as the laundry mark is a double safeguard against loss.

There are different methods of doing this of course, the most artistic but unfortunately the most expensive way is to have the initials or monogram embroidered on the linen.

The smart little cape for autumn will be a separate garment, of velvet or some serviceable fabric.

In the advance fall styles the use of back is retained and many models in crepe broadcloth and chiffon are combined with axes.

ANNOUNCEMENT OF TRADE COURSES

STATE TRADE SCHOOL, Putnam
TEXTILE: Study of textile machinery, weaving, designing, cloth analysis, yarn calculations, mathematics, drafting, machine shop practice.

DRAFTING: Shop mathematics, lettering, drafting room conventions, projections, revolutions and developments; mechanical calculating, free hand sketching, machine and tool designing, drafting room systems.

CARPENTRY: Bench, lathe, milling machine and floor work, drawing, mathematics, tool making, hardening and tempering.

MACHINE: Bench, lathe, milling machine and floor work, drawing, mathematics, tool making, hardening and tempering.

ELECTRICAL: Elementary electricity and magnetism, storage batteries, generators, machine work, woodwork, drawing, mathematics, motors, transformers, wiring.

A Good Beginning Is Half of Success. Start Right by Training for the Job. STATE TRADE SCHOOL, Putnam THOROUGHLY PRACTICAL.
