This is the season of the year when a "safety first" campaign among children should be seriously waged by parents. but this concern also met with financial reverses and the property passed into the hands of Mr. Kapstein. Among other things he had installed a new boiler in the plant very recently and was just ready to begin operation, but a water-gate rushed up from Providence in his machine when informed of the fire. The exact amount of insurance on the mill could not be ascertained Sunday night, but it is understood that the plant, machinery and stock was covered for not less than \$15,000. December continued during Sunday to behave like a spring man. No one appears to know what the secret is, but it appears there is some connection between the high temperatures and the high price and scarcity of coal. This is a situation in which the public figures chiefly as an onlooker. If December decides tomorrow morning to turn in a below zero temperature, all predictions and forecasts are discounted.
