THANKSGIVING IN THE EAST.

FOREIGN NEWS.

NEW ADVERTISEMENTS.

During the coming year, and commencing December 1st, the WEEKLY UNION will publish three original stories.

THE ORIGINAL STORIES. During the coming year, and commencing December 1st, the WEEKLY UNION will publish three original stories.

NEWS OF THE MORNING. Silver in London yesterday, 11 1/16; consols, 100 1/16; 5 per cent. United States bonds, 104 1/4.

At Liverpool yesterday wheat was quoted at 10 3/16 for No. 1, and 10 1/16 for No. 2.

An unknown man was found dead near Yuba City yesterday.

As will be seen by our dispatches, Thanksgiving Day was well observed in all directions.

The rain indications are gone, and clear, cold weather is generally reported.

Fire at Walla Walla, W. T. M. V. Owens was thrown from a wagon near Knoxville, Napa county, Wednesday night, and had a leg broken.

It is now certain that 200 lives were lost in the marine catastrophe on the Italian coast.

A tow barge reported lost in Lake Huron, with all hands.

A firemen's tournament took place at Watonsville yesterday, and was a successful affair.

A bicycle tournament was held yesterday at San Francisco, at which twenty wheels participated, and the best time on the Pacific coast was made.

At Alma, Cal., Wednesday, J. E. Dunn was carried 4,000 feet down the mountain side by a snow slide and killed.

Hanlan will not row Lockwood, and will leave England for home December 2d.

Abdullah, the Kurdish chief, has crossed into Turkey.

It is denied that there is any trouble between the Argentine Republic and Chile.

Four inches of snow fell at Cincinnati yesterday, and two at Chicago; snow also fell at New York.

Richard J. Schriener committed suicide in New York yesterday.

The Socialists expelled from Hamburg are beginning their year ending August 31st operations in corn and wheat were the largest ever known in Cincinnati.

A fire occurred yesterday in the Penitentiary at Alcatraz, San Francisco.

A cotton-linen steamer has put into St. Johns, N. S., with her cargo on fire.

The recent gales on the coast of Nova Scotia were the most destructive ever experienced in that locality.

The Government is about to complete a number of branch railway lines throughout Germany.

A company has been formed in Paris to establish a cable line from the Mediterranean to the North Pole.

During the past week specie in the Bank of France decreased 9,700,000 francs in gold and 3,919,000 francs in silver.

A propeller, loaded with grain, was cut through by ice at Toronto yesterday and sunk.

HOLIDAY ISSUE.

Following the custom first established by this paper the RECORD-UNION will on the 1st day of January, 1891, issue a mammoth edition containing valuable statistics, business review of Sacramento, and interesting special articles.

The superior value of the New Year's edition of this paper is already so well known as to require no detail of the prospectus. The editions of this special issue have often reached 30,000 of the daily circulation of the RECORD-UNION, thus reaching the widest and most general circulation.

THE RECORD-UNION and WEEKLY UNION are the only papers published outside of the metropolis having a general circulation.

The WEEKLY UNION has over TEN TIMES the circulation of its local contemporaries, and the largest and most general circulation of any weekly published on this coast.

THE NEGRO EXODUS.

General T. W. Conway, who probably understands more about the causes of the negro exodus from the South than any other man in the country, is said to believe that the movement is about to begin again on a larger scale than before.

He says that there are at least one hundred thousand negroes in different Southern States, organized in bands, and possessing means with which to purchase land. This money is the savings of the thrifter and more fortunate negroes since the failure of the Freedmen's Bank. It is further intimated that some Northern men have recently formed a company to sell lands to the negroes, and for that purpose have bought 700,000 acres of land in New Mexico, which they propose to offer on easy terms to colored immigrants.

New Mexico seems a long way off, but in a short time it will be brought within easy reach by railroads, and it is natural resources which if properly worked must establish the future of its settlers. If, therefore, the Southern negroes are industrious, steady and patient, they ought to succeed, and judging from what they have been able to do in Kansas, we have no doubt that they will come out all right.

The fact that those who are now contemplating emigration have succeeded in saving money at the South, despite the difficulties in the way, is in itself a sufficient guarantee for their firmness of purpose and perseverance.

A STUPID AND INEXCUSABLE BLUNDER.

It appears that the Republicans have lost an election in Indiana, though a blunderer was elected.

Notwithstanding the experience of the last Presidential election, notwithstanding the law, the Indiana Republicans actually placed a Federal officer-holder upon their electoral ticket, and only discovered the mistake on the eve of election.

The result was that though they substituted an eligible candidate they had so marred the situation as to defeat that portion of their ticket, and so Hancock gains one vote in Indiana. Such stupidity and carelessness is very explicable, and not less astonishing.

The National Republican Committee we know sent the plainest instructions to every State concerning the qualifications of Electors, and therefore there was no apology for ignorance. But in political campaigns these phenomenal exhibitions of imbecility always appear, and we suppose it is useless to protest against them.

SMALL NOTES AND COIN.

The Comptroller of the Currency recommends the calling in of small notes, as necessary to the absorption into the circulation of gold and silver coin.

No doubt the calling in of the small notes will result in a large amount of gold and silver coin to be taken up, but we fail to see what benefit would accrue from encouraging the absorption of the present silver dollars.

The small notes are worth one hundred cents on the dollar, and apparently on good grounds, and therefore are worthy of their absorption in large amounts would be to raise prices, and consequently to diminish the purchasing power of wages. To substitute gold and silver for small notes is desirable, but only on condition that the coin which is substituted shall be full value. Give us such coin, and we shall be in favor of calling in the small notes without further delay. Until we have such coin, however, the proposed measure would be a jumping out of the frying-pan into the fire.

We have been looking to the Southern press since the election for some expression which might justify a hope that the people of that section had at last perceived the folly and futility of the political attitude which they had assumed. But so far as our observation extends, there is as yet no such expression. It is as if they were still in a dream, and as if they were still in a dream, and as if they were still in a dream.

It is said that the Irish Land League is extending the methods applied to Captain Boycott in such a way as to revolutionize society. Local attorneys who had been serving processes on behalf of their landlord clients have been called to account by agents of the League, and threatened that unless they abandon all such business they will be ostracized and starved out, if not worse. It is evident that if this policy is pursued it must result in a complete disintegration of society.

Washington, November 25th.—(Clarence King, Director of the United States Geological Survey, has completed his first annual report on the geology of the United States. The report is a masterpiece of scientific and practical geology, and is the result of the work already accomplished during the past year. It contains a full and complete account of the geology of the United States, and is a valuable contribution to the science of geology.

October 17th, and abruptly observed, 'Well, I guess we have got you now.' 'An what? You mean that because that's the way that Gardie's will raise the dose with him, and lose him pretty nearly every Northern vote? The idea that any letter will be genuine or bogus, would effect that result, but he responded, as he walked away with an air of expressed confidence, 'You'll see you'll see.'

THE TROUBLE IN IRELAND. LONDON, November 25th.—The Manchester Guardian's London correspondent, referring to the importance of to-day's meeting of the Cabinet, says: 'The state of affairs in Ireland since the initiation of the pro-secution against the Land Leaguers increases the expectation that the Government will not much longer delay in reaching a decision on the law with a strong hand, and there will be a short session before Christmas, solely to meet such a crisis. It is not probable that Chamberlain and Spencer will undoubtedly make a strong effort to defer the assembling till January, when remedial legislation could be introduced.'

DUBLIN, November 25th.—Applications were made to-day in the Queen's Bench Division for an attachment against the Rev. Francis M. Doyle, for articles in the Dublin Freeman and Journal, published on the 17th and 18th inst., in which he had attacked the Government, and had called for the resignation of the present distribution of the Government.

LONDON, November 25th.—A. M.—The morning papers to-day report an attempt to shoot Captain John Mitchell, a large landowner in Roscommon, an attempt to shoot a Protestant, and a Catholic, and the possession of sixty acres in the west part of the county, and the shooting of a man named Mitchell, who was shot in the chest by a man named Mitchell, who was shot in the chest by a man named Mitchell.
