

Daily Meteorological Record—Signal Service United States Army.

Table with columns for Station, Date, Time, Direction, Force, etc. for Sacramento, Nov 27, 1886.

Weather Probabilities. Sacramento, November 27th—midnight. Indications for northern Pacific coast region: Partly cloudy weather, with occasional rain.

ADVERTISING MENTION. A. O. U. W.—Union Lodge No. 1018. Strophodon Vices—Presbyterian Church.

Business Advertisements. J. C. Rasmussen—City Baths, K street. J. W. Water—Hall, Lads & Co., agents.

LOCAL INTELLIGENCE. POLICE COURT.—In the Police Court yesterday cases were disposed of as follows: Jesse Slaughter, charged with committing an assault with a deadly weapon, throwing the brick in the Railroad Saloon with which he hit O'Langley upon the head and de-

mailed brandy bottles and tumbler, charged reduced to larceny and the prosecuting witness appearing and stating that he had received full satisfaction, requested that the case be dismissed; so ordered. Ah Coy, charged with larceny, and charged with stealing clothes and overcoat from the Pacific Ocean House; examination held, and he was bound over to the Superior Court in the sum of \$2,000. Col. Martin, common drunkard, pleaded guilty and was sentenced to confinement in the County Jail for a term of 60 days. Wilson Wilcox, charged with larceny, was discharged upon payment of costs and acknowledged full satisfaction from defendant. Charles Burns pleaded guilty to two charges of petty larceny—one for stealing the set of harness of Dr. Dixon and the other for stealing the harness of Israel Luce. Burns is to appear for judgment to-day. George M. Parr, arrested for petty larceny, case continued till December 1, 1886, and defendant allowed to go on his recognizance until that time. The case of Mrs. Helen Regan was continued till December 4th. The examination of Giovanni Brindani, upon charge of grand larceny in stealing \$35 of money from a house on L street, took place. He was held to answer, with bail fixed at \$2,000. Charles Burns was also examined upon the charge of petty larceny—stealing the China building and stealing blankets, in September last—and was held to the Superior Court, with bail at \$2,000. The Court then adjourned.

Results of the Elections.—All the returns of the Electoral College being now filed in the office of the Secretary of State, that officer has aggregated the totals with the result given below. On the 23rd the official canvass will be made, and that will result in a variation of four or five votes in three or four cases, owing to errors in addition made by clerks in preparing the returns prior to corrections to be made after publication.—John F. Miller, 80,282; Henry H. Leonard, 30,348; J. C. Shaver, 30,277; Charles N. Fox, 30,225; W. W. McKim, 30,212; Thomas R. Bard, 30,252; Terry Brown, 30,418; J. C. Shaver, 30,420; L. F. Del Valle, 30,443. This gives the Democratic Electoral College, comprising D. N. Terry, a plurality, and one of the Republicans, comprising Henry Edgerton, a plurality. Neither group received a majority or popular vote. The votes of Del Valle, Edgerton, Clark and Winchester, being the highest on either of the four Electoral tickets run, aggregate 164,245 as the vote of the State as shown by Electoral votes. The other Electoral tickets received these votes: Greenback—F. P. Dunn, 3,382; J. E. Clark, 3,335; James Kinney, 3,379; J. H. Leonard, 2,331; G. George, 3,384; T. J. McQuiddy, 3,389; B. K. Low, 3,381. Prohibition—George Bramall, 3; G. M. Webb, 4; G. W. Caldwell, 54; W. O. Clark, 48; M. G. Winchester, 50; John Wood, 52. There were 25 votes cast "scattering," i. e. regular Electoral tickets were scratched, and one name in each case of some other person than a candidate inserted in lieu of the scratched name.

MERCHANDISE REPORT.—The following freight for Sacramento passed Ogden on the 24th: For L. L. Lewis & Co., 1 case hardware; C. H. Gilman, 1 case cloths; T. Harper, 2 case boots and shoes; Whittier, Fuller & Co., 1 case books; Gardner, Ross, 4 boxes ocean; Central Pacific Railroad Company, 125 bundles fruit; 2 cases hats; C. H. Gilman, 1 case household goods; A. E. Ryan, 44 barrels whisky; Hall, Lads & Co., 20 cases mackerel, 25 barrels hams, 25 cases mackerel, 50 cases lard; Lucks & Laverson, 3 rolls carpet; Baker & Hamilton, 4 cases hatches; Parsons, Kilgour & Co., 1 case dry goods; P. H. Russell, 2 cases machinery; James I. Bell, 1 case hats; W. D. Conrath, 1 case chairs; Booth & Co., 10 crates extracts; Weinstein & Lubin, 1 case corsets; Mrs. S. A. Carmichael, 1 case corsets; Adams, McNeill & Co., 7 cases mustard; Standard Oil Company, 270 cases oil; R. Stone & Co., 7 crates stimpers, 2 cases salubry; A. & C. S. Houghton, 1 case paper; S. H. Davis, 3 cases axes; Huntington, Hopkins & Co., 3 cases axes, 2 cases hardware, 3 cases tools, 2 cases machinery, 3 cases machinery; C. H. Knobs & Co., 1 case household cloths.

HABES CORPUS CASE DECIDED.—In the Superior Court yesterday the habes corpus case in relation to Minnie Mayhall Bell was decided by Judge Danson. A statement in relation to the case was published a few days since, wherein it was remembered an attempt was made by the mother, when it was given the child to Mrs. Bell when it was two years of age, to now obtain it from her and take it to Maryland. By the decision of the Court Mrs. Bell is awarded the continued care and custody of the child. The result of the case met with unanimous approval by all except the defendant, who heard the testimony.

NOTICES.—The Governor has appointed the following Notaries Public: F. Briendebach, Snomas; Alonzo Rhodes and Wm. M. Gibson, Stockton; Niles Seales, Nevada City; J. W. Thompson, San Diego; C. E. Macy, Iowa Hill; O. T. Redford, Madera.

REMEMBER, on next Tuesday morning we shall place on our counters some of the rarest bargains in fancy and dry goods ever offered to the Sacramento public. Those who have profited by our former announcements will know the importance of coming bright and early. Mechanics' Store, Weinstein & Lubin, proprietors.

SELLING AUCTION RUBBISH is the most ready method of inducing the unwary to believe that they are getting good value. Don't believe it. Experience proves the contrary to be the true state of the case. Those in search of good value in goods that are legitimate should visit the removal sale of Hale Bros. & Co.

MEN'S CALF BOOTS, half double and top sole; all grades. Red House.

MEN'S OVERCOATS, with cape, \$4. Red House.

PORT-FIVE ARCH, all wool cashmere moose cloth for 60 cents at L. Ben's, Eighth and J streets.

NO AUCTION RUBBISH at Hale's.

NEW STOCK-YARDS.

Improved Facilities for Receiving and Shipping Stock. The new stock-yards of the Central Pacific Railroad Company, which have been under construction during the past fall, in the north part of the city, are now nearly completed and have been opened for the receiving and shipment of stock. They are located upon the south side of the railroad, in the block between Fourteenth and Fifteenth, B and C streets. The entire square is owned by the company and to be used for this purpose. The yards extend from Fourteenth to Fifteenth streets, and about two-thirds of the way back from B towards C, and the remaining part of the square is divided into lots, plans, and yards will be extended over that portion as soon as the demands so require. The levee and railroad at this point crossing the levee directly by an act of the legislature, has been laid along the south side of the levee, commencing at Thirteenth and extending to Sixteenth street, for stock cars. The platform, which is upon a level with the floor of the stock cars, extends along the entire front of the yards a distance of 240 feet, and is 20 feet wide. The platform floor is laid with concrete three inches in thickness, upon pine joists, 3x12 inches, placed closely together, and which are supported with cast iron upon heavy, slotted stanchions. Running back from the platform are three unloading shoots 8 feet wide, and two loading shoots 3 feet and 6 inches in width. The platform is divided into sixteen yards or pens, twelve of which are 42x72 feet, and four 58x68 feet. There are two gangways 12 feet in width, running back from the front, between these yards, and one from east to west. The fencing which the whole is inclosed and divisions made, is composed of posts six inches square, set four feet in the ground and standing eight feet above. Upon these are spiked eight pieces of Oregon pine, running horizontally, eight inches wide and 1 1/2 inches thick. A white wash has been given the woodwork, giving it a clean and neat appearance. The yards and gangways are being paved, part with granite blocks and the balance with cobble. Trenches for water pipes, supplied from the city water pipes, are provided in each yard, and places for feeding are to be constructed.

The ground upon which the yards are built was raised and graded specially for this purpose. It is made four feet above the adjoining level in front and descending by two feet at the back side. Slopes are also given from the sides to the gangways, and these slopes to the rear of the square, thus giving perfect drainage. A barn, 31 by 16 feet, is to be constructed on the west side of the grounds and standing within the square. This will contain an office, several stables, and storage room for hay and feed. It will be built with 16 foot posts, sided with rustic, and neatly painted. This gives Sacramento facilities for handling and shipping live stock as complete if not superior, to any to be found elsewhere on the coast.

THIEVES ARRESTED.—About 9 o'clock yesterday morning two young fellows, strangers in the city and who gave their names as George Clark and Charles Small, went into the second-hand clothing store of M. Wilson on K, between Sixth and Seventh streets, and while the person attending the store stepped into a back room for a moment, they provided themselves with an extra coat each, and hastily walked off. They were suspected by parties who saw them go away, and inquires being made at the store, the property was discovered and pursued. The fugitives passed around the Capital Hotel and down the alley between K and L towards Sixth street, when they were seen by the parties following and a lively effort at pedestrianism took place. Both the stolen coats were dropped in the alley by the thieves during their flight. Local officer Nash having heard the cry of "Stop this!" joined the race, and with the aid of citizens, soon had the two thieves in his power. One of the number, who was taken in a house on the corner of K and L streets, and they saw they were likely to be arrested, one of them threw away a bunch of keys and the other a small four-shooter pistol, a dirk knife and a collar, upon which was marked the name of Rogers. These were afterwards found by Nash, and taken to the police headquarters, where Clark and Small were located on the 24th inst. and his revolver and other articles taken. This led to an examination of the revolver thrown away by Small and a collar, upon which was marked the name of the one stolen from Mr. Hunt. Two other houses in Woodland were also entered by burglars on the same night, and it is probable that the other articles which the prisoners were anxious to get rid of may connect them with these or other robberies. They will be held a few days for developments before their examination.

CHINA WEDDING CELEBRATION.—There was a wedding celebration last night at the residence of the parties chiefly interested, Mr. and Mrs. C. H. Krebs, on J street, near Seventh. The occasion was the "china wedding" of the couple, being the twentieth anniversary of their union. There was a large assemblage of friends, appropriate presents, happy speeches, merry songs, social interchanges, telling toasts and a B of wit and wine. During the speaking it was stated that the husband has been twenty-seven years in the city, and has lived in it twenty-five years in the residence where the celebration was held. During the evening Rev. Dr. Taubner christened the youngest child of the couple and was given the name Henry Garfield. It was the first baby named after the new President in Sacramento, having been given the name a few days after General Grant's nomination. About 10 o'clock the company adjourned to Fisher's banquet hall, where an elegant supper was spread, fifty-four covers being provided. After the banquet dancing was ordered upon and continued until a late hour.

PRIZES ATTACHED.—There was quite a scramble at the close of the Carnival Thursday evening and yesterday on the part of those who had bills against the manager, as he claimed a shortage, which was unpleasant to those who had been paying money substantially. Several attachments upon the prizes were obtained, and various methods taken to secure payment, but it is quite evident all bills will not be paid in full. The prizes cannot probably be held in most cases by the attaching parties, as the title passed to the winners previous to the action being brought.

SOCIAL PARTY AT GALT.—A social party and dance was given a few evenings since in the new barn of Bart Daniels, near Galt, in which a large company took part. A free supper was among the items of the occasion. A lady correspondent states that a young lawyer was present from this city, who would teach the country boys some Sacramento style, but they rather got away with him.

CHANGE OF TIME.—There have been rumors for several days past that the overland timetable was to be changed, to take effect on the 1st of January next, so as to shorten the time between San Francisco and Sacramento. The railroad officers in this city state that no announcement of such change has been made.

A POPULAR HUMBURG.—The greatest humbug of the age is the idea that good value can be found in auction goods. Any house that considers its trade worth holding, but gets stuck with poor goods through an error, sends such goods to auction and in the moment they are purchased by those who have their claim to popularity rest upon the fact that they are sold in presenting auction trash and that all bills will not be paid in full. The removal sale of Hale Bros. & Co., where auction rubbish does not find favor.

To facilitate the rush and to accommodate the public on next Tuesday an extra force of packers, cashiers, cash boys and salesmen will be provided. There will also be two extra wagon deliveries. Weinstein & Lubin, proprietors Mechanics' Store.

BLANKETS AND COMFORTERS are cheap at the Red House.

LADIES' CLOAKS AND ULSTERS at the Red House.

AUCTION TRASH cannot be found at the removal sale of Hale Bros. & Co.

EARLY CLOSING.—Hale's Clothing closes at 9 o'clock each evening during their removal sale.

LADIES' GOWN BALS, \$1.25. Red House.

NO AUCTION RUBBISH at Hale's.

MEN'S ULSTERS only \$7. Red House.

BRIEF NOTES.

Z. T. Cowdry, for eight years connected with the establishment of H. C. Kirk & Co., in this city, has purchased the Golden City Drug Store at San Jose, and takes possession next week.

Thirty car-loads of cattle passed through yesterday from Woodland for market yards at Oakland. Also twenty car-loads to Madera, Fresno county.

Prof. A. O. Gregory will give a stereopticon exhibition next Monday evening at the Westminster Presbyterian Church.

The Philharmonic Society will hold its next rehearsal at Grand Army Hall next Thursday evening.

There are messages at the Western Union Telegraph office for Alice Clark and Merrick Williams.

Forty-seven car-loads of barley were shipped to the East by rail yesterday.

No immigrants will arrive from the East to-day.

FREIGHT MOVEMENTS.—The following car-loads of freight were received in this city yesterday: Nine of coal, 1 of steel rails, 1 of horses and mules, 8 of wood, 4 of wheat, 6 of wool, 1 of hay, 1 of canned goods, 47 of merchandise, 3 of oil, 1 of sugar, 1 of whisky, 1 of fruit, 1 of scrap iron and 1 of ground barley. Also through car-loads East of wheat, 1 of canned goods, 1 of sugar, 3 of barley, 3 of beans, 1 of hops, 1 of wheat, 1 of coffee, 1 of shells, 3 of merchandise and 1 of salmon.

RELIEVED TO BE STOLEN.—Night before last a man was arrested for malicious mischief (breaking in a screen door) and upon being searched a broken Masonic gold ring was found in his possession which the police believe is stolen property. There is a shield plate upon the top of the ring upon which is engraved a square and compass, trowel, spade and mallet and other emblems. It is retained by the Chief of Police for an owner.

AUCTION SALES.—Martin Pflug & Co. will sell at 10:30 this morning, at 1016 Fourth street, one span large work horse, one saddle horse, one buggy horse, two express wagons, two sets single harness and two saddles. Also a large variety of household goods, including furniture, stoves, carpets and comforts. Sale room, No. 253 K street.

POLICE ARRESTS.—Arrests were made in the city yesterday as follows: Charles Brooks, malicious mischief and disturbing the peace, by Chief Prater; Ed Folger, disturbing the peace, by same officer; George Clark and Charles Small, petit larceny, by local officer Nash; Charles English, malicious mischief, by Chief Prater; Campbell; Uncle Jimmy, drunk, by officer Smith.

WESLEY CHAPEL SOCIAL.—A church social was given last evening by the ladies of Kingsley Chapel, at which there was a good attendance. A pleasing programme was presented, in which Misses Bloss and Patrick, Messrs. Coates, Belmont, Davis, Atchard and Burnett took part. Refreshments were afterwards served and a good time enjoyed by all present.

BUSINESS CHANGE.—J. George Kerth, the tobacconist, has removed his place of business from J, between Ninth and Tenth streets, to 412 K street, between Fourth and Fifth, where he has fitted up a fine store.

COMMERCIAL.—Since last report the steamer Relief arrived from San Francisco with barge Thomas, having lumber for W. P. Frazer. The steamer Cora passed up with barge Lizzie Patterson, both light.

TRAINS LATE THIS MORNING.—The overland train from San Francisco to Sacramento, which left at 10:30 this morning, owing to delays upon the Union Pacific.

PATENT GRANTED.—A patent was yesterday granted Thomas C. Churchman of this city for a harness.

PHONES.—Phones for deaf people and a variety of devices are advertised for sale, many of which fail to afford the promised aid. The audiphone is a very great comfort to deaf persons whose nerves have the power of comprehending sounds through the teeth. A new invention called the earphone was marketed in this city. It is made in four sizes to suit different degrees of deafness, the power increasing with size; the larger the person the more the earphone, and all being neat and compact. A deaf man's advice to deaf people is not to buy anything that is advertised without first examining its utility. H. E. Matthews, No. 609 Montgomery street, San Francisco, offers to send various sorts for which he is agent, on trial before purchase. Satisfaction or money back. He recommends deaf persons to send him for the best information and advice.

NO AUCTION.—No auction-room placed its trash in the hands of Hale Bros. & Co. for disposal to a confiding, but deluded, public. Instead of having such stuff to offer the people, Hale's Criterion presents its visitors with a display of goods bought from the best houses and such as no auction-house can get hold of to sell for what they may fetch.

FREE LECTURE, by Dr. Shinn, on "Faces," at the Congregational Church, on Monday night next.

A FIT IN GARMENTS means satisfactory wear. Anderson & Johnson, Seventh street, between J and K, have no superiors as merchant tailors. Their winter stock of fine dress goods should be examined by every gentleman. The firm is confident that every one who calls will find it to their advantage.

BUSINESS HOURS from 9 A. M. to 6 P. M. at Hale Bros. & Co. during their removal.

NO AUCTION GOODS at Hale's.

Those who have spare cash will do well to hold on thereto until they see the uncommon bargains in fancy and dry goods we shall lay out at the removal sale of Hale Bros. & Co. Weinstein & Lubin, proprietors Mechanics' Store.

Don't Buy Dumb cloths made out of half cotton cloth at exorbitant prices, when you can get good cloth, far trimming, clasp and pattern for \$13 or \$14 at L. Ben's, Eighth and J streets.

FROM 9 A. M. to 6 P. M. are the business hours of Hale Bros. & Co. during their removal sale.

It will pay you handsomely to hold on to your coin until you see the uncommon bargains in fancy and dry goods we shall lay out for next Tuesday. Weinstein & Lubin, proprietors Mechanics' Store.

FROM 9 A. M. to 6 P. M. are the business hours at Hale Bros. & Co. during the removal sale at the Red House.

BLANKETS AND COMFORTERS are cheap at the Red House.

LADIES' CLOAKS AND ULSTERS at the Red House.

HOW THE PYRAMIDS WERE BUILT.

Brugsch Bey, the eminent Egyptologist, says in his work on Egypt: "From the far distance you see the giant forms of the pyramids, as if they were regularly crystallized mountains, which the ever-creating nature has called forth from the rock, to lift themselves up toward the vault of heaven. And yet they are but tombs, built by the hands of men, which have been the admiration and astonishment alike of the ancient and modern world. Perfectly adjusted to the cardinal points of the horizon, they differ in breadth and height, as shown by the measurements of the three oldest, as follows: 1. The Pyramid of Khufu—height, 450 7/8 feet; breadth, 746 feet. 2. Pyramid of Khafra—height, 447 1/2 feet; breadth, 690 7/8 feet. 3. Pyramid of Menkara—height, 203 feet; breadth, 352 7/8 feet.

The construction of these enormous masses has long been an insalubrious mystery, but later generations have succeeded in solving the problem. According to their accounts, the pyramids were built of stone, while they still soared in height and spirits, where ever mindful to turn their looks to the region where the departing Ra took leave of life, where the door of the grave opened, were the body, well covered and ready for the resurrection, to rise again to a new existence, after an appointed time of long, long years, while the soul, though bound to the body, was at liberty to leave the grave and return to it in the daytime, in any form it chose. In such a belief, it was the custom betimes to dig the grave in the form of a deep shaft in the rock, and above this eternal dwelling to raise a superstructure of sacrificial chambers—sometimes only a hall, sometimes several apartments—and to adorn them richly with colored writings and painted sculptures, as was becoming to a house of pleasure and joy. The king began to work from the summit of the pyramid, while the Pharaoh still lived in the bright sunlight. A second covering was added, stone by stone, on the outside of the kernel; a third to the second, and to this even a fourth; and the mass of the giant building grew greater as the covering gave orders to a nobleman, the master of all the orders of his land, to plan the work and set the stone. The kernel of the future edifice was laid on the limestone soil of the desert, in the form of a small pyramid built in steps, of which the well-constructed and finished interior formed the king's eternal dwelling, with his stone sarcophagus lying on the rocky floor. Let us suppose that this first building was finished while the Pharaoh still lived in the bright sunlight. A second covering was added, stone by stone, on the outside of the kernel; a third to the second, and to this even a fourth; and the mass of the giant building grew greater as the covering gave orders to a nobleman, the master of all the orders of his land, to plan the work and set the stone. The kernel of the future edifice was laid on the limestone soil of the desert, in the form of a small pyramid built in steps, of which the well-constructed and finished interior formed the king's eternal dwelling, with his stone sarcophagus lying on the rocky floor. Let us suppose that this first building was finished while the Pharaoh still lived in the bright sunlight. A second covering was added, stone by stone, on the outside of the kernel; a third to the second, and to this even a fourth; and the mass of the giant building grew greater as the covering gave orders to a nobleman, the master of all the orders of his land, to plan the work and set the stone. The kernel of the future edifice was laid on the limestone soil of the desert, in the form of a small pyramid built in steps, of which the well-constructed and finished interior formed the king's eternal dwelling, with his stone sarcophagus lying on the rocky floor.
