ARIZONA.

Tombstone, November 31.—Messrs. Culler and Berry, who just arrived from Nacazari Canyon, Northern Arizona, state that on leaving Tombstone, October 27th, they received news that the hostiles who recently broke out at San Carlos were camped at a point called Cape de Jalis to the number of 250 warriors with their families. They were trying to make peace with the Mexican authorities there. General Terreros was notified of the news, and he was awaiting the arrival of Colonel Noyah with 105 more troops from Bavispa, as supposed here, to attack the Indians before they can get to the mountains. The authorities, as a bluff, were holding out inducements to the Indians still they were ready to attack. It is reported that Jali's band of eighty Indians have left the main band, and are making a canyoneer into Sonora. It was also reported that in a company which has been formed had all left for the Guaymas mountains, and if this is true it is said the Indians cannot be subdued for years to come. The people of Sonora pray to God this year is not

The Debris Question.

MARYSVILLE, November 31.—Petitions addressed to Attorney General Hart have been sent from this city for circulation and signature in the counties of Yuba, Sutter, Butte, Colusa, Yolo and Nevada. The petitions, after describing the condition of the rivers as affected by mining debris, read as follows: "The situation is now so grave, the danger so imminent, that it is considered by all who have given the subject attention that in the near future one of two results must be reached—either hydraulic mining as now carried on must be stopped, or our rivers be so choked with debris that the hydraulic mining lands deposited into deserts. Large commercial interests and millions of valuable property are at stake, on which thousands of our citizens depend for their daily bread, and from which the State derives large revenues. In view of these facts, delay results in damage irreparable. Our petitioners are fully aware that several mines have been begun and injunctions served against the hydraulic mines, but to avoid a final decree, and meantime allow other mines to throw their debris into the water,
