NEW YORK, January 26th. - The locality known as the "Rock of Sebasteopol," in Forty-second street, between Second and Third streets, has been blown in police records as a resort of thieves and ruffians of the most desperate type. It is a high rock, that traverses the entire block. Shanties are built over the rock, in which thieves live, and where they hide their plunder. Little lanes give the place the appearance of a small village. Directly opposite Sebasteopol, at Nos. 23 and 25 East Forty-third street, is the large silk factory of Frowen, Bro. & Co. Between midnight and daybreak on Sunday a daring and successful burglary was committed on the premises, and silks and ribbons valued at \$3,000 were stolen. The burglary was discovered about 7 o'clock Sunday morning by one of the proprietors, who immediately went to the Nineteenth Precinct station-house and informed Captain Mount of the fact. Captain Mount reported the robbery to Superintendent Walling at the police headquarters, and detectives McGowan and Cuff were detailed to work the case up. The burglars had climbed over a high stone wall that bounded one side of the yard of the factory on the Forty-third street side. They then proceeded a heavy door that led into the basement of the factory, and from the basement they made their way to the second floor, where the goods of the factory are stored. By means of baskets they carried off the silks and ribbons, and the detectives secured a clue which they followed up on Monday, on Tuesday they arrested Richard Taylor and Thomas McQuire, both of them members of a notorious gang known as the "Saboteur gang." The detective also ascertained that Peter McQuire, another member of the gang, assisted in the burglary. On Tuesday, just before they were taken to the cells, the officers visited several shanties on the "Rock," and in a hot in search of the burglars, they discovered two large Saratoga trunks containing the greater part of the stolen silks and ribbons. They also searched the shanty of McQuire, and found a large quantity of dark lanterns, which were taken possession of and brought to the station-house. The police believe that the robbery was planned by McQuire, and that Taylor and Cuff were merely looking around the factory on Saturday night in company with Maguire and Taylor. Delaney was arrested a short time ago on an immediate peace with or without trial, and is held in the County Jail. He is now in the Tombs, and was locked up. Domestic.

WASHINGTON, January 26th. - The Treasury Department has sent Collectors of Customs the regulations recently framed in accordance with the opinion of the Attorney-General to regulate the passage of Chinese laborers across the continent, en route from foreign countries to China. Senator Miller says he has made special inquiry into the subject, and he does not think any apprehension need be felt that the law regulating Chinese immigration will be violated. Miller regards the granting of permission to Chinese laborers to enter the country only for the purpose of traveling home as contrary to the letter of the law, but he grants it may not be opposed to the State Department's interpretation of the spirit of the treaty. In conversation with your correspondent, Miller said: "I do not think there are so many Chinese in Cuba today as it is commonly reported. About 10,000 Chinese laborers originally went there, but numbers of them who entered under old contracts have either returned to their homes or have come to the United States. The actuation for permission to allow them to enter the country was largely for the purpose of transportation contracts. So far as I can learn, no contracts for sending these laborers through the United States have been made. I am informed that the Chinese can be taken in sailing vessels around Cape Horn to China for \$300 apiece. It would cost in the neighborhood of \$100 apiece to bring them to Cuba to New York, and then thence to San Francisco, and take them thence to Hongkong. Possibly the rate might be a little less via New Orleans and Panama. The Chinese can compete with the direct water route. The railroads were led to believe that they could get business by letters written to them by agents in Cuba asking them to transport them. If any attempt should be made to evade the law detection will be certain. The Treasury Department has informed me considerable number of Chinese are landed here, an inspector will be sent with them to see that the law is not violated. Of course, upon the first discovery of any such violation, the ability of the Attorney-General's opinion will be raised and decided in the Courts."
