THE CONFERENCE.

The San Francisco *Examiner* is commencing a series of articles on the Republican conference to be held in New York next month. It thinks there will have to be a great deal of crow-cating in order to bring about unity. Let not our Democratic contemporary be distressed; the Republican conference has no such issues to settle as stand between the wings of the Democracy in California. The unity of the Republican party will be accomplished in ample time to meet and defeat the Democratic hosts.

Is lieu of business activity, and to break the monotony of commercial dullness, San Francisco is about to hold a crazy-quilt exhibition. Now let the cholera come.

CONTEMPORARY EXPRESSION.

One thing more is needed to enlarge the profits of fruit culture in this country, and that is the California and Oregon Railway. It will open up a fair market that our horticulturists can enjoy without rival or competitor for several years to come, and will lead to a vast and speedy rail communication with British Columbia, and will put our fruit into Winnipeg, via the Canada Pacific, seven days from the tree and vine—(Oakland Times).

The San Francisco cable has sent President Cleveland a crazy-quilt made out of Cleveland and Hendricks campaign buttons. This is about as close proximity to the senior member of the firm as Mr. Hendricks needs to get nowadays.—(Pocahontas Tribune).

Hereafter, when colored men are refused an equal participation in hotel and other like places in Illinois, they will have a chance to get the message of the present conditions. There is a law similar to that in force in Massachusetts.—(Boston Globe).

We fear the Administration has made a serious mistake in the appointment of M. W. R. Roberts to the office of register. He is, in many respects, a man of much more than ordinary ability, and is much mistaken, he is the W. R. Roberts who was very prominent in promoting the Fenian invasion of Canada in 1866, and was arrested by the United States authorities in New York. It is difficult to say whether the crime of folly of that enterprise was more marked.—(N. Y. Evening Post).

CHRISTIAN love is gentle, and not demure. It is meek and lowly, and not vain. It is charitable, and not censorious.—(The Interior).

DOMESTIC NEWS.

Condition of General Grant.

New York, April 15th.—A. M.—General Grant enjoyed a refreshing sleep of eight hours last night, and his pulse, which had been very low, is now normal. He is inclined to be cheerful and chatty. He has at present no pain in his throat.

REMARKABLE RECOVERY.

New York, April 15th.—When Dr. Shady left Gen. Grant's house on the consultation to-day, he said in answer to a question that the general condition of the patient was improving. He said that the general condition of the patient was improving. He said that the general condition of the patient was improving.

THE GENERAL THINGS HE WILL GET WELL.

During the consultation this afternoon, General Grant said to his physicians: "The doctors outside, I am informed, are writing about my case in a very sensational and some of them seem to think they know more about it than you gentlemen do, but it is like a tin of snuff, and at home they know more about it and how to do it than the general who is on the field fighting." He said that the general condition of the patient was improving.

PLAIN STATEMENT OF THE CASE.

That the public may be enabled to thoroughly understand the case as it is, and form reliable opinions, the following abstract of the facts as given by the general and personal judgment: General Grant is not greatly emaciated, and about the body he has lost some flesh, but how much he has lost is not known. His face is not much changed, but it has a somewhat sunken appearance. The skin is swollen on the right side, and the swelling outside varies more or less than there is more or less swelling on the inside. The swelling on the right side is not time larger than a hen's egg, and from that down to the size of a pigeon's egg. It is located at the angle of the right jaw. It is not very tender, and appears since it came months ago. The swelling is, first, to the irritation of the growth, and finally to the irritation of the case in the glands themselves. There is no positive evidence at present that the glands have become active. The glands, however, are presumed to be that they are diseased. The disease does not extend to any of the processes of the general case. The disease does not extend to any of the processes of the general case.
