

A LOVE SONG TO A WIFE.

'Tis the beautiful love-breathing glowing hour,
And the breeze is rocking each slumbering
lover.

MARRIED IN HASTE.

The night before my wedding day,
I was ever night so full of dreamy reveries,
seemed to crawl after each other through
its dead, cold gloom.

It was, by my own consent, to be
my wedding day to-morrow. I had said it;
I had not only said it, but I had said I should
never repent.

As the early dawn breaks through
the gloom of night, I hear the old clock in the
farm-yard give a dismal howl preparatory
to the first crow of the new day.

One—two—three—four—five—six—seven—
eight—beats of the tall old clock on the
starboard outside my door, and I jumped
wildly to my feet.

I had only one hour—only one hour to be
Nora's bride.

I look at it in a kind of fear as I draw
my old kid glove over it before leaving the
house into which Nora, Glennie had gone
a few minutes ago, and out of which now
white, startled woman is issuing—Nora's
bride.

Once more my hands are clasped in his,
We say no words, only launch through
the sleepy streets till we enter the dingy
office, where, by some strange method, we
are made man and wife. All is a dream to
me.

OUR YOUNG FOLKS.

"Ah!" I said, "he has never married."
"No," she laughed, "I do not say so."
He had called her by that name, and I
was left alone to cultivate a conversation
between old Jenkins and Betty, who, being
both deaf, were talking over the same matter
in the kitchen.

"I know that he's about, never you
tear. Do not think for a moment as though
you don't know anything about it, for it is the
only way of preventing a marriage between him
and the North."

"I have little she knew we were married
only yesterday, under her very nose, as it
were. So far I had deceived him, and the
few other people I knew—deceived him
through his own stupidity. So far as I was
concerned, I would have had him, only I
knew, and my husband knew, that my
sudden shock would, in all probability, kill
him."

"I cannot describe the insolent sneer with
which he looked at me. He said, 'You
made him will the 27th of this month, my
dear lady, deceiving it so. When were you
married?'"

"I was married the day before," Boston
Globe.

HEALTH NOTES.

A liniment of equal parts of oil of winter-
green and olive oil, or soap liniment, is
the best to apply to almost instant relief from
pain in acute rheumatism.

The British Medical Journal says: "We
often hear a great deal about the dampness
of our climate as a cause of disease, of the
death rate and the amount of rainfall do
not appear to stand in any definite relation-
ship, whereas a spell of cold weather
usually brings on a more or less epidemic of
croup, whooping cough, and measles."

The population of Russia.
By the census of 1870 Russia contained
ten individuals to the square mile; in
Europe she had nearly 80,000,000 inhabi-
tants, and she contained more than the
United States; in Asia she had only 7,000,000
inhabitants, making her total population
some 85,000,000 of people, which is
about equal to Great Britain and the
United States, or a little less. The most
populous provinces of Russia are not in
the north, as St. Petersburg, but in the
interior, where there is a State called
Tambov, between the Don and the Volga,
with 2,250,000 of people; and the next
State below that on the Don has over 2,000,000
people. The population of the Kingdom
of Poland is within a few hours of the
Caucasus. These States somewhat correspond to
our Mississippi and Alabama. Little Russia,
which is situated in the south, has a State called
Black Sea, or a little to the north of it, is
composed of four States, which are as popu-
lar as New York and Pennsylvania
altogether. The population of the Kingdom
of Poland is within a few hours of the
Caucasus. There are three million and a half
there are 6,000,000 Poles in Russia, nearly 2,000,000
Finns and over a million and a half
Germans, and the remainder are of the
Caucasian race. Beyond the Caucasus mountains,
in the new conquests of Russia, called Trans-
Caucasia, there live 3,500,000 more. In
the Caucasus mountains, there are three
Caucasian districts, namely, the base
of the mountains, the mountains, and over
the mountains, they have 1,000,000, then
over 700,000 people, and is therefore hardly
bigger than Chicago. Moscow is about
the population of Brooklyn, or 600,000; and
Warsaw, the third city, is no bigger than
New York. Odessa is about as large
as Newark, N. J., or 162,000.

Men Think

They know all about Mustang Liniment.
Few do. Not to know is
not to have.

It affords me pleasure to assure you that after
using Dr. J. C. McLean's celebrated Pills for
more than twenty years in my family, that I re-
gard them as being superior to any I have ever
used, or have seen used. I have not had them
constantly, and had to try others, and I have
tried a good variety, but I have never had any
child so promptly, profitably and nicely as Mc-
Lean's. I have the most healthy child.

There is a large sized nugget of truth in this from Dr. J. M.
Buckley's series of "Letters to Young
Men." Benjamin Franklin told
the truth when he said that the best knowledge
a man could give to his son was his own
experience of a good trade. Such a man is a
millionaire.

There was once a tailor who had a very
high temper. Being in bad humor one
day, and in haste to finish some promised
work, he was asked, "What is the matter?"
"Account of forgetting to put the knot in
the end of his thread. His little child
came into the room and began to tease him
with its feet. He was so angry that he
tried to kill the child. It was with
biting teeth that he repeated his deed,
but too late to save either his own life or
his child's. He was asked, "What is the
matter?" "Account of forgetting to put the knot in
the end of his thread. His little child
came into the room and began to tease him
with its feet. He was so angry that he
tried to kill the child. It was with
biting teeth that he repeated his deed,
but too late to save either his own life or
his child's. He was asked, "What is the
matter?"

Well, father, the story-teller,
"father always wanted a horse, because
the folks in Greene lived scattered, and he
had to go far to attend funerals and wed-
dings and visit sick friends. He never felt
as if he could afford to buy one.
But one day he was coming about from Hill-
ditch, and a stranger asked him to ride
with him to a handsome horse he
was driving. I should like to own such
a horse myself."

Well, father, the man says,
"father always wanted a horse, because
the folks in Greene lived scattered, and he
had to go far to attend funerals and wed-
dings and visit sick friends. He never felt
as if he could afford to buy one.
But one day he was coming about from Hill-

MISCELLANEOUS.

less than the average by nearly one-half.
Olive oil is exported to the average value
of \$250,000, and the only other exports of
importance are zinc, zinc ash, and lead.
The average gross values of imports and ex-
ports amount, roughly speaking, to \$4,000,000
and \$2,000,000, respectively. Sixty-two
per cent of the whole population are en-
gaged either in agriculture or in the care
of flocks and herds; but the inhabitants
are too few to extend the area of cultiva-
tion and to power to make the most even
of the land occupied. The soil, which is
rich in many parts, would easily support
double or treble the present number if
the methods of agriculture were improved
and more capital put into the land.
