

THE CAPITAL.

LIVELY TILT BETWEEN STEWART AND COCKRELL.

Views of a Democratic Congressman on the Political Situation—Tariff Debate.

HOW THEY STAND.

California Congressmen Vote to Place Certain Fruits on the Free List.

WASHINGTON, June 29th.—Representative McKenna yesterday moved that figs be struck off the free list in the tariff bill.

The clause affecting figs was reached in the morning when the bill was taken up. McKenna made a speech in favor of removing figs from the free list.

Mr. Biggs' speech in favor of keeping figs on the free list. He had voted in favor of keeping figs on the dutiable list.

Mr. McKenna's motion would have been carried. Mr. Biggs, however, refused to vote to maintain the tariff on figs, and put himself on record in favor of free figs.

Mr. Biggs' vote today illustrates how strongly he is in favor of free figs. He has saved all California figs from being placed on the free list, or from being a strenuous effort to do so.

CONGRESSIONAL PROCEEDINGS.

The Senate.

WASHINGTON, June 29th.—Senator Stewart introduced in the Senate today a petition from the citizens of the State of California testing against the reduction of the tariff on raisins.

The bill was then resumed consideration of the tariff appropriation bill, the pending question being Hawley's amendment offered yesterday.

Gorman did not believe the terms of the amendment sufficiently guarded to protect the interests of the country. He moved to place the whole \$5,000,000 in the hands of the Ordnance Department, general and special.

Hawley said the amendment merely proposed to do for the army exactly what had been done for the navy.

Butler said if the Senator from Maryland had been a member of the Committee on Military Affairs, he would soon have come to the conclusion that those Ordnance officers were not to be trusted.

After further debate the discussion was suspended to let the business be transacted.

Allison reported back the joint resolution extending the appropriation for the present fiscal year for thirty days from June 30th in the departments for which the appropriation bill for the next year shall not have become laws, and the conference resolution was passed without division.

The Senate then resumed consideration of the army appropriation bill, the question being again on Hawley's amendment.

Hawley said, in reply to a question previously asked him, that the conference bill of five million dollars 270 guns would be constructed, but that it would take five or six years to make the guns.

Mr. Stewart said that the men who argued against the policy of providing guns would be the losers if the conference bill upon the mountains to fall upon them.

The English themselves were surprised at the carelessness of the United States in regard to war preparations, and asked was there ever such a happy-go-lucky reliance on luck since the world began.

Mr. Stewart said that the country, with its six millions of people, with its monstrous mass of potential power, but against modern steel guns it was no more effective than a dead man.

Stewart spoke of the United States as being a good fast rooster to be plucked by any nation that had a good army.

of all combined; that it bid them defiance, and that the talk about the necessity for protection was only a ruse to keep the children. The Senator from Nevada had no fear. He would never see a foreign power levying contributions on San Francisco, New York, Charleston, Mobile, Galveston, nor any other city in the United States.

Mr. Stewart fired the parting shot. "If boosting," he said, "with direct reference to Cockrell, could send Great Britain, there would be no more money for the United States having either army or navy."

Without having come to a vote on the bill of amendment, the Senate adjourned until to-morrow.

The House. WASHINGTON, June 29th.—After a lengthy discussion of the District of Columbia appropriation bill, the conference report on the tariff bill was taken up.

Hodge moved to strike from the free list figs, and to place them on the dutiable list. McKenna moved to place figs on the free list.

Mr. McKenna's motion would have been carried. Mr. Biggs, however, refused to vote to maintain the tariff on figs, and put himself on record in favor of free figs.

A DEEP MYSTERY.

HAVE WE ANARCHISTS AND BOMB-THROWERS IN OUR MIDST?

Attempt on the Lives of the Family of F. G. Soale, Three Miles South of This City.

ONE OF THE MOST DASTARDLY ATTEMPTS AT MURDER AND THE DESTRUCTION OF PROPERTY THAT HAS BEEN HEARD OF IN THIS STATE IS THAT REPORTED TO THE RECORD-DRIVER (THE RECORD-DRIVER) BY A GENTLEMAN WHOSE VERACITY CANNOT BE QUESTIONED, STATED THAT FOR SOME DAYS PAST UNKNOWN PARTIES HAD BEEN FIRING DYNAMITE BOMBS AT THE RESIDENCE OF H. G. SOALE, WHICH IS SITUATED ONE-HALF MILE EAST OF THE LOWER STOCKTON ROAD, ABOUT THREE MILES SOUTH OF STOCKTON.

His Station was of such a character that a Record-Driv'er reporter was immediately dispatched to the scene.

To ascertain all the facts in this most remarkable case. On his arrival at the farm he ascertained that Soale's family consisted of an aged couple and two grown sons. The two latter were found plowing in a strawberry patch near the entrance to the orchard, and the residence standing back in the distance. The orchard was a fine one, and the yard distant. Without stating that he was a newspaper reporter engaged them in conversation.

REGARDING THE OUTRAGE. And they immediately told him all they knew about it. He was then accompanied to the house, where the mother verified their statements. He then went to the orchard some distance away, and called on the aged couple, who were unacquainted with the matter.

Briefly stated, the story told by them are as follows: About two weeks ago, at 12:30 p. m., they heard what they sounded like THE SHRIEK OF A SHELL. Passing through the air, which was immediately followed by a terrific explosion. On investigation it was found that a dynamite or some other highly explosive bomb had struck a stump in the rear of the house, and had exploded, blowing the wall down, and the roof of the house down, and the windmill, a height of forty feet, which they were broken.

THE ENTIRE HOUSE SHOOK. As if by an earthquake. Loose boards in the blacksmith shop some thirty yards away were torn off and thrown some distance. The entire family were very much frightened. A thorough search of the premises was made, but no dynamite was discovered. Several bombs were exploded in close proximity to the house that night, and the explosion of the bomb which was thrown upon the roof with such force that they were broken.

REMARKS. The explosion of the bomb which was thrown upon the roof with such force that they were broken.
