MARSHALLS MONUMENT.

It will be Completed in a Few Weeks—For a Monument to the Men of the Revolution.

One of the Marshall Monument Commission visited Coloma last week to look after the work of the monument. He reports as being more than pleased with the progress made, and the substantial character of the work so far completed.

A discharged employe circulated a report some weeks ago, to the effect that the work was not being done according to contract, and that the material was being used in its construction. The Commission has since made a personal inspection, and denounces the statement as unwarranted and absolutely false.

The monument is being erected on the summit of Marshall Hill, which rises to a height of 25 feet above the level of the surrounding country. The monument is 25 feet high, and which overlooks the little valley of Coloma. It is a granite monument, and is a fine specimen of the art of the sculptor.
