

FORTUNES IN TRIFLES.

POCKETBOOKS THAT COST MORE THAN THEY EVER CARRY.

Walking-sticks with jeweled heads—A Rage for Articles in New Kinds of Leather.

[From the New York Star.] Half the well-dressed women of New York carry pocketbooks that cost more money than they ever enclose. Just study the ponderous, metal-bound leather cases, which every woman grasps in her little fist when she goes shopping, and you'll learn something that few men have hitherto suspected. The practice of carrying the feminine purse high aloft in the list will not die out so long as this furnishes a chance to exhibit costly trifles in leather to a wondering world of men.

Nearly \$100 for a little bit of gold-bound leather that scarce fills the rosy palm for which it was made? That is the price. The leather is a gold-tinted lizard skin, with all the scales shining. The gold is richly chased. Everything within and without is costly and beautiful. Perhaps New York has not yet reached the point of making silk purses out of a certain material proverbially unfit for such use, but very pretty pocketbooks are made out of the polecat's skin. Odorous? Not in the least; the beast has been skinned. Its skin is beautifully grained, soft and pliant. A famous concern in this town has recently been making odd experiments in leather. The result is that the American rabbit, the American elk, the peccary, the reindeer, the anteater, the hedgehog, the monkey, the coon, the buffalo and even the elephant have yielded up their outer covering to gratify the whim of fair women. One may buy an elephant purse for \$20 or \$30. The skin looks like cork, being of neutral tint, with odd pin holes penetrating the surface. It is tough and marvellously durable. A few traveling bags have been made of it. They weigh a good deal when shaving-cases, brushes, combs and flasks have been fitted in, and they fetch rather more than \$250 apiece. Pocketbooks of buffalo skins are pretty, and the leather is extremely pliant, though stout.

All these new leathers have driven out the old-fashioned morocco. Everything must be expensively ornamented with silver or gold. The lizard skins come in twenty or thirty varieties. They are brought ready-cured from South America. They are big enough, by careful picking, to be made into small traveling bags. There is a popular notion that every scaled and mottled skin of that of a snake. As a matter of fact, snake skins are comparatively rare.

The last elephant skin used in New York was cured here, and very successfully. It went into pocket-books, notebooks, portfolios, traveling bags and what not. The thickest portions had to be split. It is so tough that it has to be worked with specially strong tools. When all the skin had been worked up and the great feet were made the pedestal of a unique umbrella stand. The great toes, looking like big and badly brushed teeth, had an odd appearance. The body of the stand is of brass, with a large elephant's head in front armed with the trunk of the animal. They never led in practice, peace or strife; their main duty was to hold up the world. They feared too much to make men march off to war.

The lion's arrogance and avarice, and And vainly strives to besting virtue. The stern enthusiasm of their life Impelled them on, and weighed poor nature down. Their many virtues, small as serpents, to watch his frown. But he who rules for faults shall resurrect Their many virtues, small as serpents, to watch his frown. They broke no compact, and they were true no slave. They served their order, no dumb throat; They trusted first the universal love. The first were to be justice and itself. The rule of law and the rule of will. They lived one to the last. Who would be freed They made up all to follow duty's law. They sought one truth that all the planet knows. They sought one truth that all the planet knows. The people may be trusted with their own.

O people's voice, when farthest thorns shall bear. When others own; when thoughtful rabbits know. When all are soldiers in the same face; raise: When priests in grand cathedral aires praise: The Pilgrim's vision is accompanied by her newly-hatched brood come out of the pines and scratch and peck her way along the sloping open space hunting food for her young, which clustered closely about her. The pheasant came very close to the edge of the precipice, and it seemed to me that she was placing her brood in a most dangerous position, when she turned as if to walk back with them to the pines. The instant she turned something like a shadow flitted across the top of the ravine, and a half second later I saw an enormous hawk clinging to the edge of the opposite wall by his fore feet, holding the pheasant between his jaws. The wildcat struggled for a moment to drag himself from the edge of the abyss to a sure footing on the top of the rocks, but his effort was in vain, and he came crashing down the face of the precipice, still holding the luckless pheasant in his jaws. He fell with a splash in the water, and lay motionless at the edge of the pool.

"I supposed that the animal had been watching the pheasant from the bushes on top of the rocks opposite where the hawk had appeared with her brood, and at his opportunity had leaped across to seize her, but had misjudged the distance and fallen short, with the result so fatal to him."

"The whirl of the water brought the wildcat around in a short time to the side where I was standing, and as I was leaning down to examine him I saw a man with a gun scanning down the rocks. The man soon reached my side, and I then learned that he had shot the wildcat as he was lying across the chasm upon his prey. Sure enough, just at the base of the animal's brain was the hole made by the rifle ball. The hunter had been following the wildcat for some time and had lost track of him, but came near the edge of the ravine in time to see him make his leap and fall into the water. It was that which had stopped the animal short in the tremendous leap it had calculated on, or it would have cleared the space with safety and doubtless with ease. The wildcat was in reality almost in his death throes when he struck the water, and which he clung to with the clutch of death, and still held in his mouth when we dragged him out of the water. We measured the width of the chasm across which the wildcat had made his death leap. The measurement was forty-three feet."

THE PILGRIM FATHERS. [The following poem was read by John Boyle O'Reilly, at the dedication of the monument to the Pilgrims, at Plymouth, Mass., August 1. All these new leathers have driven out the old-fashioned morocco. Everything must be expensively ornamented with silver or gold. The lizard skins come in twenty or thirty varieties. They are brought ready-cured from South America. They are big enough, by careful picking, to be made into small traveling bags. There is a popular notion that every scaled and mottled skin of that of a snake. As a matter of fact, snake skins are comparatively rare.

How many are they who in life's gay morn, That limit their joys to the bounds of morn, And think that all is over when they rise, Their lot will be joy broken by strife. But where, my friend, do you find a rose, Whose violet bloom is kissed by rain, Which has not withered in some retrospect, And what we see as an ornament of grace Perhaps, may serve as the dirge for our corpse. For there's no joy beneath the sun But savors of joy, And the most bliss of which we know, Have not continuous joy.

Long life, may have blessings rich and rare; But it's but sorrow is fuller by far. And carries us soon to the home-land afar. So then 'tis not for us to ask, For lives of few or many years, But rather wish, as we journey along, To be shining lights in the vale of tears. M. S.

A WILDCAT'S AWFUL LEAP. It was Death, But Through No Fault of the Animal. "I've seen it disputed in the papers that a wildcat, or catamount, can make a leap of twenty-five feet," said a resident of Sullivan county, "and I would like to mention what I saw a wildcat do once. I was trout fishing on one of the upper tributaries of the Beaverkill, and had clambered down into a deep ravine to get at a tempting pool at the foot of a fall, where I was sure my casts would be rewarded by a good fish. "As I was sitting at the bottom of the ravine I happened to glance up to the top of the rocks opposite me, and saw a hen

SACRAMENTO PUBLISHING CO.

THE DAILY RECORD-UNION. THE SUNDAY UNION. THE WEEKLY UNION. A NEW DEPARTURE. A SPLENDID SEVEN-DAY PAPER. THE SUNDAY UNION also sent to all WEEKLY Subscribers. NO INCREASE IN PRICE. The Leading Papers CALIFORNIA. They are the pioneer journals, which, from early years in the history of the coast, have maintained the Front Rank in Journalism, Having every news facility with the San Francisco Leading Dailies, and sustaining the FULLEST PUBLIC CONFIDENCE. The only papers on the coast, outside of San Francisco, which receive the full Associated Press Dispatches and Specials. IN ALL RESPECTS THE BEST ADVERTISING MEDIUM ON THE PACIFIC COAST. Clean in all Departments, and therefore pre-eminently THE Family Journal, The Best Paper for the HOMESEEKER, for the Merchant, Farmer, Mechanic, and all who desire the full news of the day presented in a cleanly manner.

THE WEEKLY UNION, WITH THE Sunday Union. Has the largest circulation of any paper on the Pacific Slope, its readers being found in every town and hamlet, with a constantly increasing list in the Eastern States and Europe. Special attention will be given to the publication of truthful statements of the resources of California and the entire Coast; Best methods of Agriculture, Fruit and Vine Growing. They will go to greater lengths to build up California than any paper on the Coast. ALL POSTMASTERS ARE AGENTS. Sacramento Publishing Co., SACRAMENTO, CAL.
