

FRUIT TREES AND PESTS.

THE REGULATIONS FOR PREVENTION, TREATMENT AND CURE.

Disinfection of Grafts, Scions, Orchard Debris and Empty Fruit Boxes - Bulletin No. 53.

The State Board of Horticulture has issued the following regulations to prevent the spread of contagious diseases among fruit and fruit trees; and for the prevention, treatment, cure and extirpation of fruit pests and diseases of fruit and fruit trees, and for the disinfection of grafts, scions, orchard debris, empty fruit boxes, etc.

All purchasers who shall receive fruit in any box, sack or other package of any description, shall immediately upon receiving the same disinfect each box, sack or other package by subjecting it to boiling water or steam under pressure for a sufficient length of time to destroy all insects or germs attached to or contained in such box, sack or other package; and all such boxes, sacks and other packages shall be kept secure from infection so long as they remain in the place where disinfectant.

DISINFECTING OF FRUIT TREES, SCIONS, ETC. For the purpose of disinfecting fruit trees, scions, cuttings, grafts, etc., the following is recommended: Whale-oil soap (eighty per cent. strength), five pounds; water, four gallons.

Directions: Dissolve thoroughly soap in water and immerse the tree, scion, cutting or plant for at least two minutes, while the solution is still hot, for such length of time as will destroy all insects or germs.

PERNICIOUS (ASPIDOTES PERNICIOSUS) SCALE. Summer remedy for peaches: Potash, 14 pounds; caustic soda, 98 per cent., 8 pounds; lime, unslacked, 10 pounds; fish oil, polar or seal, 10 gallons.

Directions: 1. Dissolve the soda and potash by placing them together in about ten or twelve gallons of water. 2. Slack the lime in the barrel in two gallons of water; then add the fish oil to the lime and stir well until the lime and the oil have turned to a thick batter; then add the soda and potash, water, boiling hot, and stir well with a dasher for five minutes or more.

After pouring in the hot water, stir lively with a dasher until it is entirely dissolved; then reduce with cold water until sufficiently thin enough to pass through the strainer; then place in the tank and fill up with water; stir well and it is ready for use.

Summer remedy for pears and apples: Caustic soda (98 per cent.), 10 pounds; potash, 10 pounds; tallow, 40 pounds; resin, 40 pounds.

Directions: 1. Dissolve the potash and soda in ten gallons of water. When dissolved place the whole amount in the barrel (fifty gallon measure). 2. Dissolve the tallow and resin together. When dissolved, add the same to the potash and soda in the barrel, and stir well for five minutes or so. Leave standing for about two hours, then lift up with water, stirring well as every bucket of water goes in. Use the following day, one pound to the gallon of water; apply warm.

Winter remedy: Sulphur, 20 pounds; lime, 25 pounds; salt, 15 pounds. Directions: Take ten pounds of lime, twenty pounds of sulphur and twenty gallons of water; boil until the sulphur is thoroughly dissolved. Take the remaining fifteen pounds of lime and fifteen pounds of salt, and when thoroughly slacked, mix together and add enough water to make in all sixty gallons of solution; strain and spray warm.

BROWN APRICOT SCALE. Summer remedy: Caustic soda (98 per cent.), 1 pound; resin, 5 pounds; water, 40 gallons.

Directions: Boil caustic soda in one and one-half gallons of water. When dissolved, take out and lay aside one-half of the solution, then add resin to the remainder in the kettle. After the resin is dissolved, add slowly balance of soda solution. When thoroughly cooked, add water to make in all forty gallons of solution; apply warm.

WINTER REMEDY: Sulphur, 20 pounds; lime, 25 pounds; salt, 15 pounds. Directions: Take ten pounds of lime, twenty pounds of sulphur and twenty gallons of water. Boil until the sulphur is thoroughly dissolved. Take the remainder—fifteen pounds of lime and fifteen pounds of salt—and when thoroughly slacked, mix together and add enough water to make in all forty gallons of solution; apply warm.

BLACK SCALE (LENTANUM OLEA) ON OLIVE. Five gallons best kerosene oil, 150° test; one and one-fourth pounds good common soap, or one bar and a half of soap usually sold as pound packages; two and a half gallons of water. This makes the emulsion.

Directions: Boil oil, resin and caustic soda together in about ten gallons of water for about three or four hours, then add water enough to make in all 100 gallons of solution. Apply warm. Must be cooked well as per directions, to secure best results.

CADLIN (CARPOCAPSA POMONELLA) MOTH. For early-ripening apples and pears: Spray once with one pound of Paris green to 180 gallons of water, when just out of bloom.

For fall and winter apples and pears: Spray twice. First application as above; second application with one pound of Paris green to two hundred gallons of water. Use the Paris green without any additions, simply stirring the liquid continually and straining it before using.

WOOLLY (SCHIZONEURA LANGIERA) APHIS. Root form: Dress liberally with ashes, especially in loose localities, or use gas lime, about one and one-half shovelfuls around each tree in such a manner that it will not come in direct contact with the bark of the tree.

Branch form: Brush with kerosene emulsion, or resin solution, or spray.

MISCELLANEOUS.

For flowering shrubs or garden plants: Sulphur, one pound; lime, one pound; water, two gallons. Directions: Boil ingredients together one hour. Dilute one gallon of the mixture with three gallons of water; use more or less water according to the strength of the plant.

BORES. Guard trees from infection by placing a shake or board on the south and west sides of the tree, which protects it from sunburn; or give a coating of whitewash, containing some soap and sulphur. In removing a borer, smear the wound over with grating wax.

Remove the earth at the base of the tree and wrap up the trunk with stout paraffine paper, and pile up against the paper arched lime or ashes.

NOTE: Whenever beneficial insects or parasites are decreasing the spread of injurious insect pests, no spray or wash should be used, and the parasites should be colonized and taken care of.

I hereby certify that the foregoing regulations were this day adopted by the State Board of Horticulture.

ELLWOOD COOPER, President. Attest: B. M. LELONG, Secretary.
