PARKEVILLE HYDROPATHIC INSTITUTE.

A meeting of the Board of Managers of the Parkeville Hydropathic Institute, held 15th month 1850, Joseph A. Weller, D. D., was elected President.

Having made various improvements, this institute is now prepared to receive an additional number of patients; and from Dr. Weller's well-known and successful experience in Europe, (acquired under Vincenzo Praxinos, the founder of the Hydropathic system) and for several years past in this country, he is confident that the Parkeville Hydropathic Institute, (where he has had a long and successful experience) will be a blessing to the afflicted who find him an able and an attentive physician.

The domestic department being under the charge of a Steward and Matron, will enable the Doctor to devote to the patients whatever time may be necessary.

Application for admission to SAMUEL WEBB, Secretary. Office No. 55 South Fourth street, residence No. 10 Logan square, Philadelphia.

The main building is three stories high, standing back from the street about one hundred feet, with a semicircular grass plot in front, and contains thirty to forty rooms. The grounds around the house are tastefully laid out with walks and planted with trees, shrubs, &c. On the left of the entrance to these grounds is a cottage containing four rooms, used by male patients as a bathing house, with every convenience for packing, bathing, &c.; on the right of the entrance, about two hundred feet distant, stands a similar cottage, used by the ladies for similar purposes.

In the rear of the Institute, at the distance of one hundred feet, are three other cottages, some eighty feet apart. One of these is the laundry, with a hydrant at the door; the other two are occupied by the servants.

The hydrant water is introduced into these cottages as well as into the main building, and all the waste water carried off by drains.

THE WATER WORKS. Consist of a circular stone building, standing on the brow of a hill, surmounted by a large cedar reservoir containing five hundred barrels of water, from a never-failing spring of pure cold water in the side of the hill, by a hydraulic ram, a self-acting machine of cast iron, that is kept constantly going, night and day, by the descent of the water from the spring. The surplus water is carried down the reservoir to a fountain in the water-work yard, surrounded by weeping willows. In the first story of the water-works is a circular stone building, containing a large tank, which is a stream falling from a height of about thirty feet, and can be varied in size from half an inch to an inch and a half in diameter. Adjoining the douche room is a dressing room, with a marble table, &c.; the visiting douche (for the cure of piles, &c.) is one of the most complete contrivances of the kind, being entirely under the control of the patient, and which he can regulate at will.

There are many other appliances, which can be better understood by a personal examination. mar 24—1f

IRISH EMIGRANT SOCIETY.

Office, No. 1 Read Street, New York.

In consequence of the great number of complaints which have for a long time been made by Emigrants, of frauds committed upon them in the sending of money to their friends in Ireland, and to aid and protect the Emigrants, the Irish Emigrant Society established a fund, deposited in the Bank of Ireland, upon which they draw drafts, payable to order, and thus the losses of the Bank and the persons residing out of the city, by enclosing in a letter the sum they wish forwarded, with the plainly written direction to whom and where it is to be paid, will have the same result as if they had sent the money themselves.

There is a great advantage in purchasing the Society's drafts—that the Bank has a branch in each of the principal towns in Ireland, and thus the losses by discount, and otherwise, are avoided.

The Society keeps an office at No. 22 Spruce street, to which Emigrants can apply to obtain situations for which they are fitted.

Orders from employers in the country, stating the services required, the wages, and the cheapest mode of conveyance, and giving a respectable reference, will meet with prompt attention.

The Society will be thankful for all circumstantial and satisfactory information, and will endeavor to procure and commit to Emigrants, and will endeavor to procure and commit to a remedy. GREGORY DILLON, President.

NEW PICTORIAL WORKS.

AMERICAN GIFT BOOKS FOR 1851.—Agents are wanted for the sale of the following new and beautiful works, (retail price, \$2 50 per vol.) A new and complete PICTORIAL HISTORY OF CHINA AND INDIA; with a descriptive account of those countries and their inhabitants, from the earliest period of authentic history to the present time. In which the editor has treated not only of the historical events, but also of the manners, customs, religion, literature, and domestic habits of the people of those immense empires.

The embellishments are about two hundred, and of the first order, illustrating whatever is peculiar to the inhabitants, regarding their dress, domestic occupations, manners, mode of agriculture, commercial pursuits, arts, &c. They are accurate, and each one has been made expressly for the work.

The volume forms a large octavo, containing between five and six hundred pages, printed in the best style, and on good substantial white paper. It is furnished to agents, handily bound in muslin, gilt, or leather, as the purchaser may prefer, at a very liberal discount, when quantities of not less than twenty copies are ordered at one time.
