

LAWLESS BANDS.

OUTRAGEOUS WORK BY NEW MEXICAN MOBS.

A Reign of Terror Inaugurated in the Vicinity of Las Vegas.

Peaceable Citizens Shot, Houses Looted, Buildings and Crops Destroyed by the Marauders.

The Deeds Done Under a Communitistic Plea—Official Report to the Interior Department—Troops Likely to be Sent to the Region—Van Brunt Makes a Confession—Crime News.

WEATHER BULLETIN.

WAR DEPARTMENT, WASHINGTON, D. C., July 15, 8 p. m.—Forecast until 8 p. m. Wednesday:

For Missouri and Kansas—Showers, southeasterly winds, warmer.

WASHINGTON, July 15.—The secretary of the interior has received from Agent Lewis, now in New Mexico, a circumstantial account of the outrages committed in the territory in the last few months by "white raps." This lawless mob, the writer says, consists of several hundred Mexicans who, armed, masked and mounted, almost nightly parade through the country for thirty miles around Las Vegas, destroying crops, houses and bridges, shooting and terrifying citizens upon the plea that the land belongs to "the people" and that they are under pay for their labor.

The writer describes minutely twenty-five distinct acts of violence and asks that the government take cognizance of the matter and furnish relief to the terror-stricken people. Hundreds of miles of fences have been cut and carried away, houses looted and burned, hay stacks and agricultural implements broken up and destroyed. Several people have been shot and several wounded, and a number of railroad bridges, burned and other damage committed.

The secretary has referred the papers in the case to Governor Prince, of New Mexico, for a full report. He has also asked the governor to suggest a remedy in case he finds the situation such as to require action by the government. It is not unlikely that troops will be sent into the territory to protect the lives and property of the people.

IF YOU HAVE HEADACHE PRESTON'S "HED-AKE."

VAN BRUNT MAKES A CONFESSION.

NEWTON, Kan., July 15.—Isaac Van Brunt, who was arrested on the night of July 4, charged with the murder of George Broer, of Richland, Kansas, has just made a full confession of his guilt. Since he was placed in the Harvey county jail Van Brunt has had various tortures inflicted upon him, many of which were proved to be false, and the officers have some doubts as to the truth of his confession. He says that he went to Broer's house on the night of July 4, and while Broer was getting supper, watched his chance and dropped strychnine in his food. He slept in Broer's room that night, awaiting the death of his victim. The next morning he went to the house and found Broer dead, covered him up and stole what things he wished from the house and then took the team and went away, traveling around until he was captured. He supposed that Broer had money in the house and that was the reason of the murder. He secured only \$1.50.

The county commissioner's today made an appropriation for the exhuming of the body of Broer, so that the stomach may be examined for traces of poison.

WINE AND STRONG DRINK SOMETIMES GIVES ONE A HEADACHE. BRADYEROTINE CURES EVERY CASE OF THE KIND.

AN INDIAN MARSHAL KILLED.

ATOKA, I. T., July 15.—Intelligence has just arrived that Jim Billy, an efficient and very popular Indian marshal, was accidentally killed himself last week in the Canadian country with his Winchester while he was hunting for a prisoner and a negro posse. The entire party will be arrested on suspicion of having murdered the marshal.

THAT TIRED FEELING DISAPPEARS, AND YOU FEEL ACTIVE AND STRONG AFTER TAKING HOD'S SARSAPARILLA.

ROBBERY OF \$10,000.

OMAHA, Neb., July 15.—Mrs. Floretta Russell, of Ottawa, Kan., who was on a visit to relatives in this city, was robbed of an indorsed bill for exchange for \$10,000 today by John L. Bush and James Hogan, who had followed her from Ottawa. She has sworn out a warrant for the arrest of the robbers.

IMMEDIATE RELIEF BY USING PRESTON'S "HED-AKE."

ARRESTED FOR FORGERY.

ST. LOUIS, Mo., July 15.—Dr. N. W. Mitchell, pastor of the Broadway Presbyterian church, was arrested today on suspicion of forgery. He victimized nearly all the banks in the city and the money obtained amounts to something over \$2,000. Of this amount he has made good \$500. The banks are determined to prosecute him.

WHY SUFFER? PRESTON'S "HED-AKE" WILL CURE YOU.

A ROAD TO BE SOLD.

ST. LOUIS, Mo., July 15.—A dispatch from Little Rock says: The Central Trust company and the Mercantile Trust company, of New York, and the St. Louis, Arkansas and Texas railroad, today through their representatives appeared in the United States court and a decree for the sale of the road which runs through Missouri and the western part of Arkansas, was made.

CURES IN FIFTEEN MINUTES; PRESTON'S "HED-AKE."

WILL INCREASE THE CAPITAL.

ST. LOUIS, Mo., July 15.—At a meeting of the stockholders of the Missouri Pacific Railway company held here today it was voted to increase the capital of the company \$10,000,000 and the bonded indebtedness by the same amount.

BILLIOUS COMPLAINTS, CONSTIPATION, AND NAUSEA, ARE RELIEVED AND CURED BY AYER'S PILLS.

ARRESTED FOR MOONSHINING.

HUTCHINSON, Kan., July 15.—United States Marshal Cook arrested Harvey Hawk and Fred Carter for distilling moonshine whiskey this morning. They had their still in a dug-out on one of the side streets of this city.

MR. SEBASTY CARTER, NASHVILLE, TENN.: "AYER'S SARSAPARILLA CLEARED MY SYSTEM OF SCROFULA."

GOLD FOR EUROPE.

NEW YORK, July 15.—Heldbach, Kieckhefer & Co. have ordered \$1,500,000 gold for shipment to Europe.

IMMEDIATE, HARMLESS—PRESTON'S "HED-AKE."

TO SELL CUBA.

Alleged Negotiations for the Island's Purchase by the United States.

NEW YORK, July 15.—A Washington special to the Press says: Seniors Hipolyto Mura and Antonio Munoz, editors of a special commission from the Spanish government have visited Washington within the past few days. Their movements have been very mysterious. Tonight the Press correspondent discovered the mission of the strangers. It is a quiet diplomatic one to ascertain the feeling, both on the part of the government of the United States and of the Cuban residents here as to the possible eventual annexation of the island of Cuba to the United States. During their stay in New York, when they arrived last Monday, they thoroughly canvassed the views of the Spanish-American element in that city and found them almost unanimous in favor of annexation. Seniors Munoz in conversation with your correspondent said:

"Prior to our departure from Spain we were fully aware of the change in the Spanish cabinet, and Senor Canovas de Castillo has assumed the office of prime minister we may fully expect an almost complete and formal recognition of the legitimate element in Spain. The Republicans here or those who favor an overthrow of the monarchial rule, are most universally in favor of disposing of the island of Cuba to the United States."

"What price is set on the island?"

"That I am not prepared to say, as our negotiations have not yet reached that climate," was the reply.

"And do you think that \$100,000,000 would reach the limit?"

"Oh, no; not by any means."

"How about \$200,000,000?"

"I am almost positive that Spain would give this offer a very serious consideration. You see, the feeling which pervades the present Spanish government is a conciliatory one. It tends toward establishing perpetual peace with all nations. The object Spain has in ascertaining the disposition of the United States is to ascertain whether Cuba is that it sees a way to relieve its overburdened finances, settle its international disputes and place it more on a par with other European nations."

"What immediate effect on Spain would the cession of Cuba produce?"

"None in the immediate future. But with the money realized Spain would be placed in a position to secure a long projected alliance with France and the eventual absorption of Portugal and her manifold colonial interests. This project has long been cherished among the Republicans of Portugal and Spain. You may take my word for it that the present cabinet change in Spain is only the initiative of a thoroughly decided Republican movement in that country which is to take place in September or October. The queen regent is fully aware of the proposed movement, and from her, as well as the royal household, only a passive resistance may be expected."

Senor Munoz added that Spain has about come to the conclusion that sooner or later she will lose possession of Cuba and that she will make the best bargain she can for its sale. He predicts that before the year 1890 shall have ended negotiations will have been entered into between Spain and the United States for the transfer of the island of Cuba to the latter. Senor Mura produced some documents which, he said, were originals from the government at Madrid. Being asked why it was that the Spanish minister at Washington knows nothing of this matter, he replied that there are many treaties which the ministers accredited to foreign countries are not made acquainted with, and this concerning the sale of Cuba is one of them.

THE "STANDARD" ON FREMONT.

LONDON, July 15.—The Standard says: The death of General Fremont deprives America of a romantic personality which it can not afford well to lose in prosaic times. His name will live in history.

CURES WHILE YOU WAIT—PRESTON'S "HED-AKE."

SPAIN'S CHOLERA RECORD.

MADRID, July 15.—The Gazette says that in the last two months there have been 451 cases of cholera in Spain. Of these 231 have been fatal.

EARNEST OPERATORS.

MEN WHO USE THE TELEGRAPH AS A MEANS OF EDUCATION.

The Best Telegraphers Get Out of the Business After a Few Years—Many of Them Prefer Medicine, Law and Journalism.

One-third of the telegraph operators of the country are continually preparing themselves for other professions, while the other two-thirds are continually thinking of doing so. Of the 100 men working on the regular night force in the Western Union main office thirty-six of them are either studying or working at something else. They are divided up as follows: Doctors, 8; lawyers, 6; ministers, 8; brokers, 3; actors, 4; theatrical managers, 3; real estate agents, 2; inventors, 1; manufacturers, 1; civil engineers, 1; authors, 1; commercial business, 1; electrical supply agents, 1; composers of music, 1.

The method of making the change is different from that employed by men in other walks of life. Operators never have fat places thrust upon them. This is because they never come in contact with leaders in the business world. So if they ever expect to get anything better they must reach for it. Most of the operators who desire change are men of families, consequently they have to marry discreetly and do considerable economical juggling. Being without any capital except their own energy and ambition they choose a profession. The two most in favor are medicine and law. The next thing to be done is to acquire it. But this isn't such an easy matter.

FAVORABLE HOURS OF WORK.

The only thing in their favor is their hours of duty. These are regular. Telegraph offices have three separate forces. The day force reports for duty at 8 a. m. and the night force reports for duty at 8 p. m. The regular night force relieves the day force at that hour; the all night force relieves the night force at 1:30 a. m., and is in turn relieved at 5 by the day force again. The regular night force is the most available, and the most army of engineers and mechanics in other ranks struggle upon it. They are given no extra privileges by the companies, but are subjected to the same stringent rules and regulations that govern the rest of the men. In fact, they have a harder time of it than the majority of the operators, because they are continually in the first class, and are consequently compelled to do the hardest work.

All these men who are striving to shake loose from telegraphy were originally company boys. The villages where they were born were small, and they learned telegraphy just for small for them, and they came to New York, where they could do better. Many countrymen, after spending several years in this city, enter colleges and graduate with honors. During the summer vacations they return to the city and work day and night. In this way they make enough money to run them through the college year. Dozens of such men flock to the city every summer after commencement and remain until the college opens in the fall again. As the summer season advances a few of the telegraph companies do their biggest business, they don't have any trouble in getting all the work they want.

The number of telegraphers who drift into newspaper work is also large. There is nothing in a paper which is any importance in this country that doesn't matter to the telegraphers upon its staff. In New York there are a score or more. These men were usually employed by the various press associations and newspapers as operators.

Probably the only man engaged in the telegraph business who has managed to get out of it is John Braut, an operator at 155 Broadway. He is a banker on quite an extensive scale. For twenty years he has worked for the Western Union in this city and loaned money to the boys. The majority of operators are usually getting their money long before pay days, which occur on the 15th and 1st of every month. Braut is his own boss and his own boss. He loans them a certain sum, depending entirely upon who the person is, for two or three months, and then he gets his money back. It is estimated that he loans \$8,000 in this way a month, and he is said to have accumulated a considerable fortune.

What Made Him Late.

School Teacher (severely)—You are half an hour late this morning.

Little Boy (who was "kept in" the day before)—Yes'm. It was late yesterday when I got home.—New York Weekly.

The Matrimonial Lottery.

Jinks—Winks married a woman of intellect. Didn't he?

Jinks—I don't know. Why?

Jinks—I notice he never has any buttons on his clothes.—New York Weekly.

Helping a Sparrow Fly.

In University place the other day, a boy picked up a sparrow which was unable to fly from having daubed its wings with fresh paint from some cornice. He was carrying it away in his hand when a poorly dressed man, who was warming his back in the autumn sun, held out his hand and asked for it. The bird was passed over, and the man took a very ragged handkerchief from his pocket and began wiping at the paint, saying, as he did so:

"That's the way of the world—go for a fellow when he's down. Fifty would give you my neck where one would give you a show."

He wiped away for a minute or two, and then continued:

"If somebody would give me an encouraging word and half a show, I could be a man yet; but somebody won't do it. It's easier to kick a man down hill than to boost him up. There, young chap, your wings are all right now. Go and be happy. Next time your nose smells fresh paint, you shoo it."

He gave the bird a toss, and it flew to the naked limb of one of the elms and then turned about and cried, "Peek! peek!" as if in gratitude.

"All right! All right!" replied the man, with a wave of his hand. "Perhaps you'll do as much for me some time."—New York Sun.

The Smallpox Microbe.

Dr. Sicaud, of Bozaris, in a memoir handed in to the French Academie de Medicine for competition for the Alvarenza prize, announces that he has at last discovered the long sought for microbe of smallpox. He reports it to be a bacterium belonging to the class of cocci; round, with a transparent coat, unarticulated in the middle, while its edges are raised. This bacterium can be readily cultivated on gelatine that has been sterilized by bicarbonate of mercury. It can be found at the base of smallpox, not only in the pustules of the skin, but in the mucus of the bronchial tubes and in the blood as well. It is likewise found suspended in the air of rooms containing smallpox patients, and if water be allowed to stand in such rooms in open vessels, it soon contains the smallpox bacterium. However, when animals are inoculated with cultures of this bacterium, although they manifest uneasiness, the symptoms are entirely transitory, not at all serious, and, above all, show no relation to variola, either in its form or its effects.

Solomon's Temple Not Much.

Solomon's temple, as described in the Scriptures, would not now be regarded as a very imposing structure. It measured 107 feet broad, 50 feet and height 45 feet. The porch was 85 feet long and 18 feet wide. So, on the whole, you could not surpass many private houses of the present day, but it was looked upon as one of the wonders of the ancient world.—Chester.

A magnificent hair piece of waving ray gold with a round center in which two diamonds of the finest quality, each weighing more than half a carat, are set in gold and set with colored stones alternating diamonds.

A pretty ornament for a side comb consists of small open forms of gold, separated by diamonds or by three enamelled flowers, such as forget-me-nots, separated by diamonds.

A curious Indian necklace is made up of flat tablets of what looks like lead colored gold. This is a fossil insect ornament in gold and set with colored stones alternating diamonds.

The Carpenter Springs, Wis., Waiver. Are sold only in bottles—never in bulk. w w fri sun-t

THE GARRMAN WHO DEFEATED O'CONNOR FOR THE WORLD'S CHAMPIONSHIP.

James Stansbury, who defeated O'CONNOR recently on the Patuxent river for the championship of the world, it seems was in a scheme to keep that honor in Australia if possible. The same party who backed him are backing Kemp, and they decided to put Kemp against any Australian who wanted to run for the title and let Stansbury row O'CONNOR. Kemp defeated his two rivals Matterson and McLean. It was the plan to have Kemp meet O'CONNOR should Stansbury fail to defeat him.

Stansbury was born in the Schoolhouse district 22 years ago, and for the past two years he has been recognized as a very promising sculler.

Jan. 15, 1887, he won the Lake Baffins handicap race, with 49 seconds start, defeating Kemp and Matterson, who fouled after rowing half the distance.

July 13, 1888, he rowed Henry Searle for the championship and 6500 a side, and was defeated.

In September, 1888, he was defeated in a three-cornered race by Beach.

Dec. 15, 1888, he was defeated in the great aquatic carnival.

A Brilliant Showstop.

E. N. WILLIAMS is the brilliant showstop of the Chicago Players' league team. He played during the season of 1889 in 47 games, was 123 times at bat, made 10 runs and 41 base hits. His average was .367. His individual fielding record was 48 put outs.

NEED WILLIAMSON.

Only 130 assists, 55 errors out of 211 total outs. His average was .545. Ned is as big as John L. Sullivan, he is lively on his feet and is one of the best fielders and longest throwers in the profession. He is a good batter and a great favorite with Chicagoans. The picture from which the cut is made was kindly loaned by Nick Engle, the great baseball enthusiast.

BILLIARDS.

The last match that Schaefer won from McCreery in San Francisco has added an extra bit of luster to the Wizard's cap. The terms were that Schaefer would play 750 points to McCreery's 500, with the additional odds of a single discount. Five hundred dollars a side was the stake. The crowd was so great that it was difficult to arrange means of playing the game. When at last it did begin about 11 p. m. Schaefer was right to work with runs of 164, 227 and 300, eventually making 750 to 193 for McCreery. The winner's average was 112.

An Unsuccessful Turk.

Mr. Howland, of W. B. Stone, tells the following good story on himself as an instructor of the operations of the Turkish merchant at grasping an opportunity, despite an apparent warning: "I happened to drop into a house in Cairo merely out of curiosity. After I had looked at a number of things without finding any that suited me I happened to notice an old rug which lay on the floor and which had some good points. My experience told me that the rug was worth at the utmost \$5. I asked the old fellow how much he wanted for it, and he once concluded that I wanted it badly and asked \$12.

DRS. TERRILL & PURDY.

DOCTOR TERRILL. DOCTOR PURDY.

154 N MAIN ST., WICHITA, KAN.

Cures diseases of women heretofore abandoned by the profession. Such as fibroid tumors, displacements, enlargements, prolapsus, etc., by the use of electricity, according to the methods elaborated by his great French Surgeon Apostol.

NERVOUS DISEASES.—Dr. Terrill wishes to call the attention of those suffering from nervousness, paralysis, nervous prostration, etc., to the wonderful curative effects to be derived from electricity when scientifically applied, and desires to state that he makes the application of electricity in nervous diseases a special feature of his practice. The doctor has the finest fifty diamond carbon cell battery ever seen in the west and all the appliances especially adapted to the treatment of all nervous and seminal weakness, which he quickly and permanently cures by the aid of electricity.

CATARH.—Every case of catarrh is curable if properly treated, regardless of what others have said. Many cases cured by a single treatment.

PHLEBS.—Fistula and all venous diseases cured; no knife, no pain; a cure guaranteed.

Uterine Strictures quickly and permanently cured; no cutting or pain; no money until cured.

CHRONIC DISEASES.—Bronchitis, asthma, hay fever, all throat and lung troubles, facial neuralgia, skin and blood diseases, etc. Syphilis absolutely cured. Doctor Purdy was late professor of surgery in the Wichita Medical College and Surgeon to St. Francis Hospital, having relinquished the above positions in order to devote his entire time to his specialties.

PHLEBS.—Fistula and all venous diseases cured; no knife, no pain; a cure guaranteed.

Uterine Strictures quickly and permanently cured; no cutting or pain; no money until cured.
