

HIS SKULL CLEAVED.

FOUL ASSASSINATION OF A SLEEPING MAN.

Two Children Lying on the Same Bed are not Even Awakened.

Six Hundred Dollars in the Pockets of the Murdered Man Not Disturbed.

The Bloody Axe Found—His Nephew Arrested on Suspicion—A Little Town Near Leavenworth the Scene of the Tragedy—Criminal Record.

WEATHER BULLETIN. SIGNAL OFFICE WICHITA, Kan., August 2.—The highest temperature was 97°, the lowest up to 7 p. m. 75°, and the mean 86.5° with brisk southerly winds, with warm, cloudless weather and stationary pressure.

For Missouri: Fair, except local showers in northern portion, slightly cooler in northwest, warmer in southeast portion; westerly winds.

For Kansas: Fair, clearing in extreme northern portions, southerly winds, becoming variable; winds cooler in northern. Stationary temperature in southern portion.

FULL OF MYSTERY.

A Man's Skull Split While Two Bedmates Slept.

LEAVENWORTH, Kan., August 2.—The little mining town of Brighton, five and one-half miles southwest of here, was the scene of a mysterious murder. Uncle Jim Yainm, a well-to-do colored man, was found last night by his nephew, Paul Hetter, and a neighbor, dead in bed, his two children sleeping peacefully on each side of him. In the middle of Yainm's forehead slanting toward the right eye was a fearful hole from the sharp edge of an axe which had sunk deep into his skull, nearly cleaving the head in two. There were no signs of a struggle and tied up by a string of bills amounting to \$600 was found in the pocket of his trousers, which were lying apparently undisturbed on a chair near the bed. Young Hetter has been arrested on suspicion. This morning the blood stained axes were found. Yainm had had some trouble with his wife's father.

HUGE THEFT OF MINING STOCK. ST. LOUIS, Mo., August 2.—J. L. Mayer, who lives at 1523 Washington avenue, had stolen from his room last night \$40,000 worth of mining stock and a small amount of cash. Negotiations on the stock will be stopped.

PREPARING FOR KEMMLER'S EXECUTION.

ATKINSON, N. Y., August 2.—Recent developments have confirmed the truth of the statement that Kemmler, the condemned murderer, is weakening daily. The utter abandonment of all hope and the consequent realization of his wretched condition never came to him with such terrible force as last night. All night long the vision of his impending fate and his helpless eyes fixed on the ceiling and tumbled on his narrow cot, he cried aloud in despair, "I wish it were over." He insisted that his attorneys and his counsel utter loss of all power to control his fears were pitiful to behold. The cause of this sudden and uncontrollable despair was the noise of the prison in the adjacent room of the executioner, which the prisoner could not help hearing, through the doorway which connects his cell with the chamber of death. In the latter room were making a test of the death dealing apparatus before launching the fatal current through the body of Kemmler. In the next room were Ward, Dunston, Electrician Barnes, of Rochester, and a few others who had been invited to witness the test. C. F. Barnes, who has been employed to take charge of the electric apparatus, and who will probably pull the fatal switch, arrived on the 2nd Central train yesterday and returned to Rochester in the evening. His stay in town was made as secret as possible, and there was an evident fear at the prison that his visit would be found out by reporters. During the brief time in the city he did a great deal of work. The belt on the engine in the north wing was taken off, the pulley and connecting machinery and connected with the Westinghouse dynamo. Shortly after 5 o'clock the steam was turned on, and a thorough inspection was made of every belt and pulley. Then the room of execution was visited, and later a thorough trial was made of the apparatus which controls the fearful current. Everything was found to be in working order.

If you need medicine it is not safe to depend on the weather. Take Hood's Sarsaparilla now.

TO REMOVE GRANT'S REMAINS.

WASHINGTON, August 2.—At the close of Mr. George's speech in the senate this morning, Mr. Plumb offered the following concurrent resolution and asked that it be ordered to a committee: That Congress do resolve that the remains of the illustrious soldier and statesman, Ulysses S. Grant, to be interred in Arlington national cemetery and the president be requested to convey to the widow of this eminent man such delectable, tending to her on behalf of this nation, all necessary facilities for such removal and interment. Mr. Edmunds: "Why not pass it now?" Mr. Edmunds suggested: "I thought I would let it lie over until there is a larger attendance of senators to pass upon it." was Mr. Plumb's answer.

If you have headache try Preston's 'Hed-Ake'.

A NEW SCHEDULE IN IOWA.

DES MOINES, Ia., August 2.—The railway commission have revoked the schedule of joint rates promulgated by them June 19 and which was supposed to have gone into force July 4. In its stead they have issued a new schedule, which when a shipment is made over two or more lines in this state each road shall be entitled to 50 per cent of the local rate as provided in the tariff which goes into effect today. The railroads have bitterly opposed the former schedule and have refused to adopt it. The new schedule will be much more satisfactory to the shippers.

Bilious complaints, constipation, and nausea, are relieved and cured by Ayer's Pills.

THE PRESIDENT AND BLAINE.

CAPE MAY, N. J., August 2.—The president drove over to Cape May this morning and while waiting for Secretary Blaine to eat his breakfast, he held a reception in the corridor of Congress hall, after which in company with Mr. Blaine and General S. Ewell he drove back to his cottage at Cape May Point.

Chronic inflammation of the bladder. Is promptly cured by the Excelsior Springs, Mo., waters. 25¢ in bottles.

A RULING ON COPPER PRODUCTS.

WASHINGTON, August 2.—In response to an inquiry from the manager of E. Helen's smelter, Trinidad, Col., on the subject, the secretary of the treasury has replied that copper ore can not be imported in bond for smelting and exportation of the resulting matter or blister coppers without the payment of duty and that no drawbacks can be allowed on the exportation of copper matter or blister copper, as such products are not, in the opinion of the department, a manufactured article within the meaning of section 3,019 U. S.

Bradley cured Headaches for G. D. Wolstead, Wilson, N. C.

MISSOURI BAPTIST SEMINARY.

KANSAS CITY, Mo., August 2.—The board of trustees of the Missouri Baptist seminary located temporarily at Independence, Mo., received notice yesterday that a college site of seventeen acres of land would be donated to the institution by the citizens of Mason, Mo., provided a permanent location would be made there. The board has agreed to accept the offer and efforts will be made at once to erect a suitable building on the property. The trustees will have to look further.

A clear, soft, white skin, free from pimples, spots, freckles, produced by CUTICULA SOAP.

DECIDED NOT TO ACCEPT.

UTICA, N. Y., August 2.—At the meeting of the state regents of Colgate university, formerly Madison university, in June last, Rev. Dr. E. B. Hart, of Chicago, was chosen president to fill the vacancy caused by the death of the late President Dodge. It is learned that Dr. Hart has decided not to accept the position offered him, as he is much pleased with the chair of church history which he now occupies in Morgan Park Theological seminary at Chicago. The trustees will have to look further.

Stare cure—Preston's 'Hed-Ake'.

GRASS CAN NOT BE CUT ON THE STRIP.

ARKANSAS CITY, Kan., August 2.—Colonel G. W. Parker, special Indian agent, wired T. J. Morgan asking if it was allowable to permit persons to cut grass on the Cherokee strip, and received the following reply: WASHINGTON, July 31.—To Colonel G. W. Parker, special Indian agent, Arkansas City, Kan., cutting hay on the strip is not allowable. You will notify all parties engaged in this work to cease at once. Wire this office the order received, obeyed. T. J. Morgan, Commissioner.

Immediate, harmless—Preston's 'Hed-Ake'.

SUBSIDIES ACCEPTED BY THE ROAD.

SAN FRANCISCO, Cal., August 2.—The Southern Pacific railway company has accepted the offer of the subsidy of \$25,000,000, and the right-of-way to complete a coast line of the railway between Santa Margarita and Elwood, thus making a continuous line from San Francisco to Los Angeles. A convention of delegates from the coast counties will be held to make arrangements with the railroad company.

It cures headache only—Preston's 'Hed-Ake'.

SWINDLED AN EXPRESS COMPANY.

NEW YORK, August 2.—Clement J. Chandler, the treasurer, and William W. Chandler, Jr., the manager of the Erie Transfer company at the foot of Chambers street, this city, were arrested yesterday, charged with systematically defrauding the company. They spent the night at police headquarters. It is estimated that they have succeeded in swindling the corporation out of not less than \$10,000.

For a disordered liver try Beecham's Pills.

A HURDLE RACE AT CHENEY.

NORWICH, Kan., August 2.—The English of Hunymede are going to Cheney on the 8th to run a hurdle race on an other road, in the same place. They will enter five horses in the race, it will be exciting without doubt. It seems as though Cheney is to have a big day as all the Alliance orators will be there and many other amusement. The track for a steep chase consists of half mile in length with six jumps six feet high.

A BIG REVIVAL.

PURCELL, Ok., August 2.—One of the greatest revival movements that ever struck this country is now in progress in the Lappin Grove, near here. Rev. B. E. Shawhan, the Winfield evangelist, is in charge. The altar is crowded and hundreds of people are in attendance.

Cures while you wait—Preston's 'Hed-Ake'.

ARIZONA'S POPULATION.

TUCSON, ARIZ., August 2.—The returns of the census supervisor show the population of Arizona (not including the Indians) to be 57,490. The principal cities are Tucson 5,383, Phoenix 3,115, Prescott 1,843.

Preston's 'Hed-Ake' is a specific for headache.

Cures in fifteen minutes; Preston's 'Hed-Ake'.

RAILWAY BRIEFS.

There were 1,600 miles of track built in the United States up to July 1, 1890, as compared with 1,480 miles the first half of 1889. The Prisco line boasts of a tramp who has passed the time for four years 'counting the ties' on that road. He is known as 'the Senator'.

The first practical step in the erection of the great Pan-American railroad was taken when ground was broken recently near Brownsville, Tex., for the Carpus Christi and South American railroad.

A southern newspaper says that an oak tie coated with creosote will last from eighteen to twenty-six years. The fact remains, however, that the average life of wooden cross ties is only about eight years.

According to the annual report of the commissioner of labor, Carroll D. Wright, the number of employes on all the railroads of the country amount to 700,000. There are 1,518 different railroad corporations.

Why suffer? Preston's 'Hed-Ake' will cure you.

The New York Central recently paid to

the New York insurance company a premium of \$40,000 on two insurances of property in and near New York of \$4,505,000. This is said to have been the largest single premium ever paid.

Two gold spikes were driven recently in the last two rails of the Lehigh Valley railroad connection between the Lehigh and Schuylkill valleys at Remont, West Penn township, Schuylkill county, Pa. This line will bring Portville within four hours journey of New York.

A fireman says: "I know a little kink about lighting a headlight on stormy and windy nights. Take an old train order and curl it around on top of the lamp wick so as to be a portion of it striking up, and by dropping a lighted match down the chimney it will ignite and the headlight is lit."

The Rochester (N. Y.) Post-Express says that Thomas Connors, of Elmira, track inspector of the Rochester division of the Erie, is one of the best men in New York state. He began railroading in 1840 on the Delaware division of the Erie, and has since 1852 been foreman and track inspector on the Rochester division.

On the Central Pacific railroad the cylinders of the locomotives have been utilized to increase the supply of air to the wheels. This is done by reversing the locomotive when it is going ahead, thus causing the cylinders to act as air compressors, driving large volumes of air into the train pipes and reservoirs.

Immediate relief by using Preston's 'Hed-Ake'.

SCIENTIFIC SQUIBS.

The average width of the path of destruction with tornadoes is said to be little more than 1,000 feet.

Among the most ingenious inventions lately exhibited is a machine for drilling square, oblong or hexagonal holes, heretofore found to be impossible.

As far as experiments with car brakes have been carried there is found to be practically no difference between the different metals so far as their power is concerned, although their wearing qualities differ materially.

In some of the enduring tests of the Maxim gun in Germany, 34,000 rounds were fired from a single barrel, 20,000 rounds of cartridges with steel covered bullets being fired from a single barrel before the rifling was materially injured.

London Engineering says it need excite no surprise if before many years the first class Atlantic ships maintain an average speed of thirty to thirty-five miles an hour, and a four days' journey between Queens-town and Sandy Hook is probably now as all an impossible thing in the future.

If fails, money refunded; Preston's 'Hed-Ake'.

QUEEN AND GUNBOYS.

One of the curiosities found by the census enumerators in Madison county, Ga., is a boy 9 years old who has never been given a name by his parents.

A colored dentist at Macon, Ga., is said to use his fingers only in extracting teeth. They are strong as forceps, and he claims he can pull teeth faster and with less pain than any dentist using instruments.

A curiosity revealed at Holly Hill, near Dayton, Fla., was the loss of out of a couple of chicks by a cat from tags left in the nest by a hen that had got tired of waiting for them to do as had the other eggs.

and they are the cheapest and most effective methods yet devised for catching their prey.

The wheel shown in the illustrations consists of nine arms attached to an iron shaft, and these arms are strongly netted in groups of three at their outermost ends. The shaft is surrounded by a cone of wood, whose face and widest part is on the port side. The narrow part of the cone, or its apex, is at the end of a wooden trough. The wheel is pivoted on a galvanized frame, and can be raised or lowered out of or into the water at will by means of a block and tackle. The one here illustrated is attached to a scow, and of course is portable. Not all of them are so. Some of them are attached to piling built out into the river.

The paddlewheel method of fishing can only be employed in the case of the river, and it is about the only method used in the region of the Dalles, above Portland. When in use the wheel is submerged about one-third of its diameter, and is slowly revolved by the action of the water. The salmon seek the lower end of the Columbia as its tributaries from the latter end of March until about the middle of June in great numbers. They encounter the wheels in swimming up stream, and are by them lifted out of the water, thrown against these cones and these slide into troughs, down which they glide into the roostacles prepared for them. In the height of a good season a well located wheel will frequently catch from six to fifteen tons of salmon in twenty-four hours. It does seem rather a big thing to catch such large individual weights, but that is the way it is done on the Columbia, and the salmon there caught are the best and finest flavored in the world.

English writers, since 1822, have written frequently for the reviews and magazines on social, ethical and religious subjects, and is also a prominent leader of the anti-vivisection movement in England.

Portugal has a female bull fighter. Her name is Clotilde Mejarick. She has practiced for bull fighting only since last April 1, yet is wonderfully expert in the arena. Her debut in Oporto she killed two bulls, and a week later in Lisbon she killed two more.

Mrs. Dorothy Stanley's last act as an unmarried artist was the sale of her picture of 'Street Arabs at Play' to a great soap selling firm for a pictorial advertisement. She expressed her willingness that the picture should be used for that purpose if it were not changed in any manner.

Miss Alita Proctor Otis, the editor of Saturday Review, has her bread-and-butter day love for dolls. Mrs. Senator Platt is another devotee of the doll, and in one corner of her Fifth Avenue hotel parlor is a small stand, where a group of talking doll babies sit with staring eyes and parted lips.

The Duchess of Cleveland is a first rate artist. She is the owner of a house in Grosvenor place, London, which contains a great many beautiful paintings which were the work of the proprietress. These include a most charming portrait of the late Duchess of Westminster in the lovely days of her early youth.

Helen Mathers, the author of 'Cherry Ripe' and other successful novels, has never written anonymously, or employed her pen in journalistic work of any kind; no inducement will make her take up her pen when she is not in the mood; yet she once wrote two three volume novels in six months and made \$10,000 out of them.

ROYAL FLUSHES.

The sultan is described as a thin, pale, black haired man with a sharp eye. He is 48 years old.

Queen Victoria has given \$200 to a fund raised for the purpose of putting a steamer on the Victoria Nyansa.

The king of Belgium requested the honor of contributing best man for Stanley's wedding, and named Comte Daroché for that honor.

Emperor William has declared that the first birthday of Count Von Moltke shall be kept as a national holiday. The famous strategist was born Oct. 29, 1800, at Parich, Mecklenburg.

The Princess Dolgorouki is one of the most accomplished amateur violin players in Europe. She is also pretty, having a fair complexion, delicate features and the refinement of the best Slav type. She dies at sixty.

The prince of Schaumburg-Lippe, the father of the Emperor William's intended brother-in-law, is one of the richest of the German sovereigns. He possesses a very large fortune and vast estates in Bohemia, Hungary and Upper Austria, and is the owner of nearly the whole of his principality, which lies between Cologne and Berlin, and it contains an area of nine German square miles.

Caught by a Photograph.

Superintendent Theodore Voorhees, of the Central Hudson railroad, recently took up amateur photography as an amusement. One other day he turned the acquaintance to practical account. While making a tour of inspection he asked a locomotive engineer whether he drank. The man admitted that formerly he had looked upon the wine when it was red, the whiskey when it was bloody and the beer when it was frothy, but he had foregone such varieties and vintages and was now a teetotaler. "What have you to say to that?" queried the superintendent as he exhibited a "flashlight plate" to the astonished driver of the iron steed. The latter was dumb when the superintendent had captured him not twenty minutes before anchored in front of a bar "unloading a schooner." His "resignation" was accepted.

Some Figures from Montreal.

The revenue figures from the Canadian Post office are of interest as at the present time, when the tariff is a matter of general discussion. The customs receipts during June, 1890, were \$715,264.12 as against \$663,846.81 in June, 1889, a decrease of \$51,417.31. The total receipts for the month of June, 1890, were \$7,776,975.59 as against \$8,305,406.11 for the corresponding month of 1889, a decrease of \$528,430.52. The inland revenue receipts for June, 1890, were \$268,891.13, and in June, 1889, \$248,854.38, an increase of \$20,036.75. The receipts for the year ending June 30, 1890, were \$2,060,467.74, and for the year ending June 30, 1889, \$1,868,830.90, an increase of \$191,636.84, and an increase of \$409,381.70 for the year 1890.

DAUGHTERS OF EVE.

Rosa Bonheur is 67 years of age and her brush is still busy. For her last picture she received \$100,000.

Mrs. Patti is to receive a casket and the freedom of Swansea, Wales, at the National Antislavery to be held next year.

Providence, R. I., has a female pastor in the person of Mrs. Anna B. Street, who was the first woman to be ordained in America. Mrs. Daymacker, a native of Bombay, after receiving a medical education in Philadelphia is about to return to her own people as a missionary.

The Southern Pacific ocean has a monopoly in the person of Mrs. Emma Forsythe, a rich widow, who owns a goodly part of the island of New Britain. Mrs. Forsythe goes by the name of the White Queen.

One of the pretty California heiresses is Miss Grace McDonough, who will inherit a fortune of \$3,000,000 from her mother. She is a tall, stately girl, with a haughty manner, but a sweet and attractive face.

It is related that the late Marchioness of Ely was much admired in her youth by Cavendish, who would have married her had she been willing to leave the British court and her intimate friend, Queen Victoria, and her home in England.

RESULTS OF OUR SPECIAL SALE!

Many goods left on hand which we had expected to sell, and goods not specially intended for the occasion want out quick this week for odds and ends.

Colored Batiste Embroideries, we have about 300 yards of these goods, they are the most exquisite patterns, worked on the finest Batiste cloth. These goods are worth 20c to 30c, but we want to close out this corner and offer them at 5c, 7c and 9 cents.

By her will the late Mrs. Emily Pfeiffer, the well known English poet, bequeathed, with the exception of a few legacies, the whole of her personal estate of \$28,000 to charitable and educational establishments for women.

The latest description of Margaret DeLand, the Boston writer, represents her as a slender young woman plunging through the snow drifts of Beacon street with a market basket on her arm and her big dog at her side.

Mrs. M. Edith Howcott, of New Orleans, probably owns more real estate than any other southern woman. She has in her own right over 50,000 acres of selected timber lands in Louisiana and Mississippi, and is still buying.

Bertha von Hillern is still an ardent pedestrian, though most of her time is now devoted to work in her studio in the Virginia mountains. She is a devout Catholic, and frequently walks eleven miles to church and back again.

Francois Power Cobbe, the well known English writer, was born in 1822, and writes frequently for the reviews and magazines on social, ethical and religious subjects, and is also a prominent leader of the anti-vivisection movement in England.

Portugal has a female bull fighter. Her name is Clotilde Mejarick. She has practiced for bull fighting only since last April 1, yet is wonderfully expert in the arena. Her debut in Oporto she killed two bulls, and a week later in Lisbon she killed two more.

Mrs. Dorothy Stanley's last act as an unmarried artist was the sale of her picture of 'Street Arabs at Play' to a great soap selling firm for a pictorial advertisement. She expressed her willingness that the picture should be used for that purpose if it were not changed in any manner.

THE LATEST IN JEWELRY.

An odd conception for cuff links is a gold barrel with platinum hoops.

A pearl capped pin piercing a horn of plenty from which diamonds and rubies are issuing is a scarf pin of rare beauty.

A platinum fleur-de-lis in the center of a disk of gold flower work forms the pretty design of a pair of cuff buttons.

A lace pin that occupies a prominent position simulates in silver and enamel a bunch of elderberries and yellow daisies.

A two bar diamond shows to good advantage in a platinum mounting strung on a frail chain from a bracelet of twisted gold.

Parisian jewelers are having a brisk demand for a crescent shaped hairpin of gold having several stars containing gems clinging to the sides.

A diminutive street lamp post of gold, showing two sides, in each of which a diamond, a ruby and a sapphire are mounted, is an attractive scarf pin.

Quite an oddity in rings is one simulating the bit of a horse's bridle, curved in such a manner that the side levers formed the setting for an emerald.

Two crossed palm leaf fans, represented in yellow gold and showing the impudent face of a moonstone cherub peering between, constitute an artistic novelty in lace pins.

A diminutive rowboat of gold, laden to the guards with enameled violets and forget-me-nots, in which several diamonds are shown, was the lace pin worn by a seaside belle recently.

A presentation watch of recent make has the case elaborately decorated with a diamond and ruby pointer gazing
