Mrs. W. A. Polk of North Lawrence avenue is reported improving slowly. She has been seriously ill for several days.

JOBES BEATS JOHN

WICHITA BANKER BEATS THAT CARLISLE SCHEME.

Mr. Jobs of the Wichita National Bank Will Offer a New Banking Law—It Will Secure Depositors and Bring Money From Hiding Places—Bankers' Association Will Appoint Bank Examiner—Erroneous Ideas of Large Profits of the National Banks Exposed—Gives Figures to Prove His Proposition.

A. C. Jobs of the Kansas National bank is the inventor of a new banking system which will shortly be presented to western bankers for their inspection.

Mr. Jobs says that he has only found time to think over the outlines but that he will in a very short time have all the minor details of his proposed banking law completed.

Some Wichita men who are considered authority in matters relating to banking have examined the outlines of Mr. Jobs' system of banking and pronounce it superior to the Carlisle scheme.

Mr. Jobs is of the opinion that in all the banking laws recommended for passage in congress there is a fatal omission in failing to provide for the security of depositors.

Mr. Jobs says that no money should ever be issued without ample security for its redemption and all deposits of currency or coin should be used solely to protect depositors.

Under Mr. Jobs' proposed banking law the banks would be appointed by the associated banks. Each bank having put up a sum of money to secure the depositors in any one of the banks in the association that might fail all would be interested in a strict examination.

Mr. Jobs says that he does not think that any man who wished to do a safe banking business would want to be liable for the mistakes of any bank except his own.

Mr. Jobs says that the idea seemed to prevail here in Kansas that the national banks make a great profit on their circulation.

Mr. Jobs says that the fact of the matter is that there is no profit in the circulation of national banks.

Mr. Jobs says that the fact of the matter is that there is no profit in the circulation of national banks.

MUST HAVE GRAIN

GETTING READY TO SUPPLY THE SOUTHERN SEAPORTS.

Wichita Men Moving to Build a Great Grain Elevator—It Will Enable Farmers to Get More Money for Their Grain—Two Prominent Business Men Give Their Views in regard to It—Will Give Five Dollar Mortgage Bonds—Bonds Will be Received in Payment for Storage on Grain.

Wichita will have a great grain elevator. C. R. Miller tells just how the elevator will be built.

"Now we have a great scheme and it is bound to win," said Mr. Miller in a main street barber shop yesterday as he drew his chair up closer to A. W. Oliver.

Oliver turned in his chair so as to look more directly in the face of the Wichita capitalist and the reporter for the Eagle turned his northeast ear in that direction.

"If you want me to put up the money to make the thing go," said Mr. Miller, "we might just as well stop right here, but if somebody else is going to foot the bill I would not object to hearing it and more especially if it will benefit Wichita."

After consenting with Mr. Oliver that the scheme would not only be a good thing for the town but the men who would take stock in the enterprise, Mr. Miller proceeded.

"We must know that the grain men here have always claimed that a large grain elevator would pay. I have been told that at one time J. W. Hawn had 5,000 cars of grain on the docks leading into this city at one time, every car load of which would have gone into an elevator of that kind if one had been here."

"The grain men have time and again explained to me that a very large part of corn and oats raised in this country could be sold without loss at better advantage if it could be bunched in this city where it could be properly held and inspected."

"It is all right," said Mr. Oliver. "exporters at both Galveston and New Orleans have told me that they would like to have our grain sometimes if only it was in solid blocks without the cost of it."

"It is all right," said Mr. Oliver. "exporters at both Galveston and New Orleans have told me that they would like to have our grain sometimes if only it was in solid blocks without the cost of it."
