

RUN IN EVEN TIME

BASSO III PERFORMS AN UNUSUAL FEAT AT CLEVELAND.

In the 2:30 Trotting in Three Straight Heats, Each in Exactly 2:16-Larabee Wins the 2:30 Stake Race in Fast Time-Sunland Clay Wins the Third Event-Spirited Racing at Oakley-Annie Bishop and Lechniar Sweep Places-Starters Brown Wins Distinction-Mudlarks at St. Louis-Sporting News.

Cleveland, July 29.-The Grand circuit meeting at the Cleveland Driving park opened today under favorable auspices. The attendance was between 7,000 and 8,000 and the day was an ideal one for the trotters, the sun being obscured by clouds and the temperature just right to get good speed out of the horses.

The 2:30 class stake race for 3-year-olds was won by the favorite, Larabee, in remarkably fast time in straight heats. In the 2:30 class, Nomies and Let of Waranoka were the favorite in the pools, but the brown stallion Basso III took the race in three straight heats, all of which were made in exactly the same time after a hard fight with the two favorites.

Sunland Clay, the favorite in the 2:30 class, had no difficulty in winning against the big field. Summaries: Three-year-old stake, 2:30 class, trotting, 2:16, Larabee, 2:16, 2:16, 2:16. Fred Kohl won first heat, 2:16, second, 2:16, third, 2:16. 2:30 class, 2:16, Larabee, 2:16, 2:16, 2:16. No others started.

Class 2:30 trotting, purse \$2,000. Basso won three straight heats, 2:16, 2:16, 2:16. In each heat, Larabee was second in three heats. Summaries: Trotting, 2:30 class, 2:16, Larabee, 2:16, 2:16, 2:16. Sunland Clay won three straight heats, 2:16, 2:16, 2:16. In each heat, Larabee was second in three heats. Summaries: Trotting, 2:30 class, 2:16, Larabee, 2:16, 2:16, 2:16.

Freight Train Races. New York, July 29.-The worst upset of the day was in the first race at Brighton Beach today when Annie Bishop, the favorite, was defeated by Lechniar, who won in 2:16. In the second race, the favorite, Impediment, had no difficulty in winning, but allowed Laura Davis, at 6 to 1 to pass her. Summaries: First race, Annie Bishop, 2:16, Lechniar, 2:16. Second race, Impediment, 2:16, Laura Davis, 2:16. Third race, Impediment, 2:16, Laura Davis, 2:16. Fourth race, Impediment, 2:16, Laura Davis, 2:16.

St. Louis Races. St. Louis, Mo., July 29.-Mudlarks were hitched to the front and won each event. The torrents of rain which fell this morning converted the track into a Venetian canal through which the horses plunged and splashed. The attendance was small and the sport tame except for several close finishes. The mud horses came in looking like balls of mud. Summaries: First race, Mudlark, 2:16, Laura Davis, 2:16. Second race, Mudlark, 2:16, Laura Davis, 2:16. Third race, Mudlark, 2:16, Laura Davis, 2:16. Fourth race, Mudlark, 2:16, Laura Davis, 2:16.

Kansas City Races. Kansas City, July 29.-The feature of the day at Exposition park track was the work of Starter Brown. The four races were started so quickly that each batch of horses did not stay at the post more than two minutes. But the favorite, Hannah Kern, 2 to 1, in the second race, won. The other events were won by second choices or long shots. Summaries: First race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Second race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Third race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Fourth race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59.

Cincinnati Races. Cincinnati, July 29.-The track at Oakley was fast and the racing spirited. Summaries: First race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Second race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Third race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59. Fourth race, Hannah Kern, 2 to 1, second, Alice Truitt, 5 to 1, third, Time 1:59.

Walker for Silver Men. St. Louis, Mo., July 29.-The silver men held their own way in the primary held here today. The delegates to the silver convention met August 5. In twenty-seven of the twenty-eight wards of the city the advocates of the gold standard had down and allowed 16 to 1 Democrats to walk away with the delegation.

New York Dry as a Bone. New York, July 29.-The city was absolutely dry yesterday, not a single rain cloud being seen. The club houses even were closed up.

One Man in Five Dies. Madrid, July 29.-Advises from the island of Porto Rico states that vomitica has broken out among the Spanish troops stationed there. The daily mortality is 20 per cent of the cases.

Cholera Slays 25 Thousands. Yokohama, July 29.-Since the outbreak of cholera in Japan, 25,000 persons have been attacked with the disease and over 4,000 have died.

Reserve Men Get a Boy. "Do you want a boy?" he asked of the magnate of the office, standing before him cap in hand. "Nobody wants a boy," replied the magnate.

"Do you want a boy?" asked the official, now a boy. "Nobody wants a boy." "Well, say, mister," he inquired, "do you have to have a boy?" "The magnate collapsed."

"I'm sorry to say we do," he said, "and I guess you'd better what we want." -Detroit News-Tribune.

-Dr. Mary Harris Thompson, who has just died in Chicago, was regarded by many as the most eminent female surgeon in the world. She worked and studied under the famous Dr. Elizabeth Blackwell. She began the practice of surgery in Chicago in 1863, and ever since she has stood in the front rank of her profession. She was a prominent member of the American Medical Society, and was once elected the chairmanship of the division on the diseases of children. She was one of the promoters of the Women's Medical College and the founder of the Chicago Hospital for Women and Children.

Address: World's Dispensary Medical Association, No. 65 1/2 South Street, Buffalo, N. Y.

BETTER DAYS COMING

(Continued from First Page.)

cry was fallacious. The coin must be intrinsically worth its face. NOT A WEIGHT NOR MEASURE. Mr. Harvey said that money could not be based on weights and measures. The standard of value is not metals and under that standard it was more stable than a single standard. As a pendulum of the clock was made of two metals, to counteract each other the standard of money should be double, acting each on the other and preventing fluctuations. Free coinage in the United States would establish a party and then gold would be found here. The man abroad who had not gold would take its standard. It would prove itself stronger than Great Britain. France had promised to stand by the Mexican and South American with its coin, combined with gold and silver. Europe to recognize silver. Referring to Mr. Horv's reference to the pensioners Mr. Harvey declared that appeal to the old soldiers would not be successful. They were patriots and they would think of the want and suffering of the laboring man and would be forgetful of themselves.

Mr. Horv said that silver had had its day as the money of final redemption. It would continue, however, to be used as subsidiary money. Gold was the standard of the world and had come to stay.

MR. HERR'S METALLIC SOUVENIR. Mr. Horv then turning to Mr. Harvey said he wanted to reciprocate the courtesy of Mr. Harvey in presenting him with a silver dollar. Mr. Harvey said he would accept the present from Mr. Horv of the Chinese coins. He offered, however, a present of \$2 per month to the silver coin. The United States was the chief producer of silver until 1875. It was the most sacred metal of our country, and was the standard of the world. In 1875 it was struck down as Caesar was by the dagger of an assassin. The gold standard men had set up a standard founded on the crime as a standard for the moral of the nation. The metal in the coin given him by Mr. Horv symbolized purity, virtue and honesty.

GOOD TIME COMING. Taking up the closing argument Mr. Harvey said he wanted to encourage the dependent; to say to the man who contemplated suicide in his hopelessness to forego the deed. Relief was at hand and prosperity would again come to him and the nation. He declared that the growth of the money power came increased salaries and contentment. It was the same in all the other nations. In 1875, 17,000 bushels of wheat would pay the salary of the president, \$25,000; today it would pay \$50,000; bushels of wheat to pay President Cleveland's salary of \$50,000. Mr. Harvey then proceeded to denounce the president's foreign and financial policy and declared that the friends of silver were fighting the battle of the people of the world. On their success depended the liberties of the masses. Oppression had driven the liberty-loving into their last stronghold. There was nothing beyond except the islands of the Pacific. A second declaration of independence in the United States was needed and proceeded to recount the story of the signing of the Declaration of Independence in Philadelphia and the ringing of the bell by the old watchman with much dramatic effect.

It should be said that the attendance at the sessions of the discussion was by card and consisted of 150 persons. The capacity of the hall which was about 200. This space was generally fully occupied.

BUKLEN'S ARNICA SALVE. The Best Salve in the world for Cuts, Bruises, Swellings, Burns, Scalds, Pains, Sores, Tetter, Chapped Hands, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by Charles Lawrence and G. Gehring.

WAS A HOT FIRE. A Hot Time Down in the First Ward Yesterday Forenoon. Walter Gilles, a 13-year-old boy who was playing ball with a group of boys in Thomas Shaw's house, came very near causing as much of a conflagration yesterday as Mrs. O'Leary's famous cow did some years ago. The ball, caught fire from matches, Walter Gilles was playing with and in a very short time the fire department had all it could do to prevent the spread of the flames. With all their efforts the fire spread to Mrs. Allen's residence near by. The loss altogether is estimated at \$2,500.

CARD OF THANKS. I hereby tender my sincere thanks to my friends who so willingly and ably assisted in saving my property in the burning of my barn yesterday. Also to the noble firemen who faithfully performed their duty as firemen. I heartily appreciate all that was done. THOS. SHAW.

CITY IN BRIEF. Ole Beauchamp of El Dorado spent Sunday in the city. Mrs. J. Davis of St. Louis is the guest of her sister Mrs. Hirsch. Readers will find interesting local news on page six of this morning's issue. The McCall house on North Market has been occupied by Mr. W. C. Blackard. The First Presbyterian Sunday school infant class will be given a picnic today. Miss Dula Pense of this city is entertaining her friend, Miss Bertha Ayers, of Oakville. Louise Lease, the daughter of Mrs. Lease, likes to be told that she takes after her mother. All orders against the school fund will be paid at the Sedgewick County bank today. Mrs. Justin Jordan and daughter of Chicago are visiting the family of Mr. Samuel Bowman. They return home Wednesday. The county commissioners of Shawnee county were in town yesterday looking at the court house with a view to building one like it.

Cut Your Wisdom Teeth on CLIMAX PLUG.

(Continued from First Page.)

A party of campers who have been out to the Walnut for several days camping, were returned from a visit from Miss Kate Wiggs of this city. George Lynch, John Williams, Phil Ahearne, W. Sendebach and John Kearns have returned from a visit from Miss Kate Wiggs of this city. Mrs. Claude Forrest, who has been visiting her mother, Mrs. Dines, on South Main, for the past seven weeks, left yesterday for Ashland, Ky., where she and her husband will make their future home.

Mr. "Harry" Crum, who is visiting at Goulda Springs, writes home to her husband that the Arkansas river flood has backed up, and the Saratoga of Sumner and all its fine habbling health giving waters are inundated.

Thomas Shaw, the music man, has our thanks for a box of fine cigars, as a token of his appreciation of our effort to save his home from the fire of yesterday. The kind of cigars he has aided Holmes in conveying the bodies in house several times remained and helped him (Chappell) in the work of cleaning and wiring the fire box.

A portrait and photo interview with Miss Inez Creditor appeared in last Saturday's Chicago Tribune. Miss Creditor explains her great run for the fire department; says she favors bloomers, and doesn't like Mrs. Lease's Syrian trousers a bit.

W. C. Edwards of Larned, the wheat king of Pawnee county, better known as Billy Edwards, returned to state, was at the Carey yesterday. His admiration for Wichita is well known, and it is a very difficult task for Billy to keep away from the city he so much enjoys a visit to.

Miss Emma Schaefer and her sister, Minnie, from Topeka are here stopping at William Hoesfeld's home, 1123 South Main street. They came here to be present at the surprise party given to Edith Hoesfeld on the occasion of her 15th birthday by the German Lutheran singing choir.

Visit Keenan of this city received a jug from old friends, Mr. and Mrs. Frank Cox of Morgantown, W. Va., last Saturday. They drove about the city and saw the buildings and trees that so artistically and uniformly arched the principal residential streets of the city.

The surf bathing seems to be the chief attraction at Goulda Springs. The swimming pool is about one hundred feet deep in the center, formed in Salt creek and is saltier than the briny water of the springs. The reason so many anglers in the past have complained of the lack of gamey qualities in the fish is that they have sought and captured them in still water. Every frequenter of the Roberval region knows that omananche taken in the quiet Lac a Jeune or Lakes Pemoka, Plonger, or Brochet, are as tame as any salted cod fish when compared with the furious brook-trout of the Grand Discharge.

It is the living and struggling for existence in a mad swirling current that brings out the devilish quality and electric energies of any race of fish. So, if the Maine fisherman wish to find the landlocked salmon in perfection, let them seek him in no calm, stagnant ponds or pools. One of the very best spots to fish, if one does not mind traveling a rough country to reach it, is Sebago lake, in Piscataquis county, Me. It is a lovely sheet of water, thirteen miles long by about four and a half wide, fed by two spring brooks, the Wilson and the Ship pond. It is surrounded by densely wooded ridges, and its water is as cold as ice and the old-time custom has been to fish in the deep, quiet coves of the lake, but the place to find fun is in the swift water inlet. As soon as the ice is broken and goes out, the sport begins, and continues all through June. After that the fish take to the pools and deep spots in the two brooks and are sluggish and disinclined to bite.

Three or four pounds is the average weight of these beautiful fish, though occasional prizes tip the beam at seven and eight. When the salmon are "first run" i. e., come up out of the deep places in the spring, they are an extremely dark greenish color. Shortly after their play in the rapids has begun, their sides and bellies take on a silvery white tone, and the black shadows show sharply. They have then become fighters. All the winter's sloth has been shaken off, and the landlocked salmon are ready to give battle to all comers.

They hunt and feed on the smelts, which are very numerous and plump, and so respond better to the efforts of the bait caster than to those of the fly fisherman. At the very mouths of the brooks, however, and above, in the basins below the high falls, the fish run and jump for fly during this month. The killing bait are the young smelts, or, failing them, small shiners of not more than three inches in length. Use light but strong tackle, about such as you would carry for black bass. A light salmon, single strand, nine-foot leader, and a No. 3 sprout hook, without swivel or sinker, is good rig.

Though some of the old guides always hook the minnow through both lips, it is easily demonstrated that the bait lives longer if only hooked through the upper lip. The once popular hooking in the back under the dorsal fin has been entirely discarded. With your boat or canoe securely anchored in the swiftest current, let out plenty of line, say from a hundred to a hundred and fifty feet, and let the eddies carry the bait as they will. Do not, however, have too much slack, for when the salmon seizes the bait you must be able to strike. There are many rock points from which the angler can take good fish without any boat, but it is more difficult to bring the fish to net.

The fly fisherman will find the dark Montreal and the professor the taking feathers here for June fishing. He will find, too, that the fish in the lake prefer bait, and his best sport will be had along the rivers. The ship pond stream contains some very pretty riffs.

THE PHYSICIAN'S CASE. "You have a severe case of indigestion," said the physician to his new patient. "You should be very careful to eat only warm food, as it promotes the flow of gastric juice. Avoid cold drinks and that sort of thing. I am afraid you aren't sufficiently careful about your diet, and what your employment is?" "I'm professional fire-eater and hot potato swallower at the Universal Music Hall," Boston Traveler.

BLEW HIS FACE OFF

(Continued from First Page.)

jected to chemical tests to determine whether the blood is from a human being. A chemical test has been made of the blood stained wood of the dissecting table found in Holmes' private office by Professor Denton. He says the stains are blood but he cannot tell whether it is human or animal. EVIDENCE CARRIED AWAY. Although the police believe that their diggings and searches at the Holmes building in Englewood have been rewarded by a large amount of evidence, crimes committed by Holmes, many people believe that since his arrest many things have been taken away from the place. This belief received a more concrete confirmation by a story related tonight by J. F. Foley, a driver for an express company. One day last April Pat Quinlan called at the office. Foley said he had watched some moving done. Foley was ordered to take a wagon to the Holmes building.

When the wagon arrived Quinlan planned around continually to see if any one was looking. When he thought no one was watching he would bring something out. He said he saw a large chest, some old clothing and five or six large bundles of old lead pipe. He was ordered to drive to O'Connor's docks. Arriving there Quinlan shipped the things to some point in Michigan, going with them.

Chappell in his talks with the police today brought into the case an accomplice of Holmes, known to Chappell as Richardson. The police are now looking for him. Chappell says he has aided Holmes in conveying the bodies in house several times remained and helped him (Chappell) in the work of cleaning and wiring the fire box.

The bricklayer who built the fire box in the basement was examined again tonight and says it was the queerest looking arrangement he ever saw. Holmes told him it was a retort for a glass bending process but the mason knew better as there was no place in which to put the glass. It could, however, be readily used for burning up parts of bodies.

LANDLOCKED SALMON. Splendid Sport to Be Found in Lakes and Streams of Maine. In point of gameness, quickness in taking the bait or fly, and savage fighting when hooked, the Canadian species has no advantage of the landlocked salmon of Maine. The reason so many anglers in the past have complained of the lack of gamey qualities in the fish is that they have sought and captured them in still water. Every frequenter of the Roberval region knows that omananche taken in the quiet Lac a Jeune or Lakes Pemoka, Plonger, or Brochet, are as tame as any salted cod fish when compared with the furious brook-trout of the Grand Discharge.

CURES THE TOBACCO HABIT IN 4 TO 10 DAYS OR MONEY REFUNDED.

Use All the Tobacco You Want 'Till Your "Craving" is Gone.

NARCO-CURE is the only remedy in the world that acts directly on the nerves and drives the nicotine from the system in from four to ten days. It leaves the patient in better health than before taking, and is warranted free from any injurious ingredients.

NARCO-CURE is popular because it allows the patient to use all the tobacco he wants while under treatment, or until the "craving" and "hankering" are gone. It is then to sacrifice to throw away tobacco forever.

NARCO-CURE is sold at the uniform price of \$3.00 a bottle, and one bottle cures. Money refunded if a cure is not effected when taken according to directions.

PROF. W. N. WAITE, Of Amherst, Mass., Chewed Tobacco for 46 Years, and was Cured by Narco-Cure.

If your druggist is unable to give you full particulars about NARCO-CURE, send to us for Book of Particulars free, or send \$5.00 for a bottle by mail.

THE NARCO-CHEMICAL CO., Springfield, Mass.

Some beautiful inexpensive materials for draperies and hangings in country houses are available. They are made of shadow pattern of iris, morning glory, dragon-fly, crabs, or seaweeds scattered over the surface. These are known as shadow cottons. A fabric with the weight and heavy soft appearance of chamois-skin is known as chamois cloth. It is a silk and cotton mixture with flower patterns on different colored grounds. One of these is a lot of the natural chamois color with masses of feathery chrysanthemums growing on it. A blue ground in the same stuff has an iris pattern. Imported used-up hangings and cushions for yachts as well as for cushions for piazza seats. -N. Y. Post.

Responsive Draperies. Some beautiful inexpensive materials for draperies and hangings in country houses are available. They are made of shadow pattern of iris, morning glory, dragon-fly, crabs, or seaweeds scattered over the surface. These are known as shadow cottons. Up to Date. The 25 that once through Tara's halls West bound, and now a friend. Now has a myriad of friends. A family full grown. And what old Tara falls asleep. At each such summer day. They meet on his laid pate and dance Tara's moon-bowls. -The Boston Herald.

OF GENERAL INTEREST. -The Broad river, in South Carolina, was so called by the whites. The Indian name was Eswan Huppeday, or "Dividing Line river," because it was the boundary between the Cherokees and the Catawbas. -Ergot is the product of the diseased seeds of the common rye. Instances have been known of men and animals being poisoned from the lack of caution in separating the diseased grains from the healthy when preparing the rye for food. -The curlew bell has been established in a suburb of Chicago, called Wheaton. It rings at nine o'clock p. m., after which it is unlawful for anyone under eighteen years of age to appear on the streets unaccompanied by parent or guardian. Its results are said to be extremely beneficial. -The women of Baltimore have formed a Good Government club with seven members. The purposes announced are to look after the economical and efficient management of the city affairs, to promote cleanliness, to establish cooking schools for the training of young women. -Chinese pheasants were introduced into various parts of Oregon a few years ago for game purposes. The birds have thrived wherever introduced, and this season has been especially favorable, so that there is every prospect of an abundance of sport in this line in the near future, when the restricted period expires. -When a young lion
