

SLATES GO SMASH

LEAGUE OF AMERICAN WHEELMEN ELECT OFFICERS

President Willison seems to be interested in staying off the election while the League delegates largely seem to be interested in getting a chance at him as soon as possible.

Baltimore, Feb. 11.—All the slates which the league politicians have been fixing up with so much care for the past three days, were smashed today by the election of Sterling Elliott of Massachusetts, as president of the League of American Wheelmen.

The next round of the league today reinstated Charles M. Murphy, a class B rider. It is said that Titus had made a statement which exonerated Murphy, but implicated himself and Cabann more deeply than ever.

As soon as the convention reassembled in the afternoon an attempt was made to elect officers. President Willison failing to secure a postponement of the election, claimed the right to submit a report which, he said, had an important bearing on the election of officers.

Archibald C. Willison and Sterling Elliott were placed in nomination. A ballot having been taken it was announced that Sterling Elliott of Missouri had received 194 votes to 73 for Willison, of Maryland, the present incumbent.

First vice president—Charles E. Kosum of New York. Second vice president—A. C. Morrison of Wisconsin. Treasurer—E. S. Hartwell of Colorado.

The convention then took the question of selecting a place for the '96 meet. Both Louisville and Toledo sought the honor. After several non-binding ballots the roll was called and Louisville was selected by a vote of 96 to 78.

Adjourning was taken until 9 o'clock tomorrow morning. BOOKS ARE NOW READY Old Settlers of 1872 and Prior should call and leave their record.

The books of the Old Settlers' association have been placed at Kendall's undertaking establishment where all persons coming to Sedgewick county as early as 1872 are asked to call and register their names, also when they came to the county and by what kind of conveyance.

DAY FOR DUMPING

DEALERS GET READY FOR THE APPROACHING HOLIDAY.

Resides the Bear Influences Make a Large Showing of Themselves—Lower Cables and Larger Northwesters and Local Receipts—Good Weather for Wheat—Last Week's World's Shipments Largely Overestimated—Market Hammered, in the Face of the Visible—Corn Active, Oats Quiet, Both Lower.

Chicago, Feb. 11.—Tomorrow being a holiday created a disposition among grain and provision traders to even up and probably caused considerably more wheat to be dumped on the market than would otherwise have been done.

The closing showing a loss of 3/4 cent since yesterday. Corn 1/2 cent, oats 1/2 cent and pork had advanced 1/2 cent to 25 cents, 5 cents and 7 1/2 cents respectively.

In wheat the early influences were rather bearish, the chief of which were the lower cables and large northwestern receipts as well as local. Liverpool was quoted 1/4 penny easier and northwestern receipts were over 100 cars greater than the same day last week.

The market, too, was influenced some by the fact that the first arrivals of a large line purchased in horshorn by many elevators and the weather indications came more favorable, warm and fair conditions being indicated, and prices lagged back.

May wheat, which closed yesterday at 65 1/2 cents, opened with sales at 65 1/2 cents, fell to 65 1/2 cents, advanced to 65 3/4 cents and at noon was 65 1/2 cents.

Although Bradstreet's report over 2,000,000 bushels closed yesterday at 25 1/2 cents, the available supply last week, some of the big traders hammered the market during the last hour and drove the price of May down to 25 1/2 cents, that being the closing price.

Corn was fairly active and lower, influenced by sympathy with wheat and by expectations of larger receipts on the improved condition of country roads. May opened at 23 1/2 cents and finally closed at 23 1/2 cents.

The weather indications came more favorable, warm and fair conditions being indicated, and prices lagged back. May wheat, which closed yesterday at 65 1/2 cents, opened with sales at 65 1/2 cents, fell to 65 1/2 cents, advanced to 65 3/4 cents and at noon was 65 1/2 cents.

WALLER GOES FREE

SUPPORT IS ABSENT

Professional Dealers Liquidate in View of the Holiday and the Foreign Selling Contributions to the Depression—Local Banking Circles Opine that the New Loan Will Not Land Above Seventy Millions, Net, in the Treasury—Sterling Exchange Firmer—Large Purchases of General Electric Bonds.

New York, Feb. 11.—The stock market today was considered to reflect the absence of support from prominent financial houses whose interests in the new government loan have been liquidated.

The speculation opened irregular and fairly active, but a sagging tendency soon developed on liberal sales of the strangers, high priced industrials and international shares.

A rally occurred about 11 o'clock under the leadership of General Electric and the Gould shares, in which the first named rose 3/4 per cent, Manhattan 1/2 per cent, and Missouri Pacific, Tobacco and other prominent shares 1/4 per cent.

The purchases of General Electric were on a large scale and were for the most part credited to Boston. The ostensible influence is the reported acquisition of the company's controlling interest, as for example, in connection with the electrical experiments on the Brooklyn bridge and the reported proposed change of motive power on the Manhattan elevated lines.

The street had believed that the stock had fully discounted any existing unfavorable conditions. Subsequently officials of the company charged the circulation of the rumors to a London source. No definite statements are obtainable in relation to the export report of the company's condition.

The stock subsequently rallied 1/2 per cent and closed 1 1/2 per cent lower on the day. The final hour was characterized by a resumption of pressure against the market and values receded to the lowest of the day.

Manhattan was conspicuously weak, declining 4 1/2 per cent, and closing at 108 1/2 per cent. Other important losses were in New York Central, in which the stock subsequently rallied 1/2 per cent and closed 1 1/2 per cent lower on the day.

The final hour was characterized by a resumption of pressure against the market and values receded to the lowest of the day. Manhattan was conspicuously weak, declining 4 1/2 per cent, and closing at 108 1/2 per cent.

BALE HEADS

YOUR REDEEMER LIVETH!

Baldness is a Disease, and is Cured by Danderine, Nature's Own Remedy.

Scientific research reveals the fact that all diseases of the human scalp are caused by microbic infection. The scalp becomes impregnated with these parasites through the use of filthy hair brushes and combs usually found in hotels and other public places, where they hang year after year until worn out without being cleaned.

This microbe inhabits what is known as the second skin. Where the hair roots are imbedded the skin is divided into three layers; therefore they are in the middle skin and receive an effect on its blood and tissue, robbing it of its vitality and causing the hair to become dry and brittle, lose its color and come out.

But your fingers through your hair when it is in this condition and observe the dried-up condition of the roots. Now pull out one that has not become affected and observe the difference.

Some cause the scalp to dry up and peel off. This is called dandruff. Others cause the scalp to throb, alternating with a very itching, or a burning, waxy substance forms, finally developing into sores, causing the hair to drop out and turn gray.

The hair cells become weaker with each successive growth. The second hair does not grow so long or coarse as the first, and so on until nothing is left but fuzz. Finally the fuzz becomes so fine that the assistance of a microscope is necessary to see it. This is baldness in its worst form.

The hair cells and roots are not destroyed as many suppose, but are depressed as it were. To prove this notice that when the hair comes back after being pulled out.

The only obstacle is these devouring microbes. With them removed the scalp is free to grow again. Danderine is recommended and guaranteed for these afflictions. One application is sufficient to restore the scalp to its normal state. It is in fact a dressing, will produce twice the natural growth of hair.

KNOWLTON DANDELIN CO. Guthrie, O. T. is in fulfillment of a promise by Professor Slesinger to contribute the proceeds of a concert given in his honor to the support of the biological laboratory at the college. The object is one that commends itself to all our citizens, of every party and church, as highly worthy of their patronage, while the talent and skill of the generous musician are widely recognized. This benefit concert ought to draw crowded houses.
