

CANT PLEASE ALL

TOBACCO SCHEDULE HEARING DEVELOPS SO MUCH.

Growers, Importers and Manufacturers Before the Ways and Means Committee, the Last-Season Class Being Again Subdivided in Three Classes According to the Source of Product Handled, and Seemingly as Much at Variance Among Themselves as From the Other Main Classes—Abstract of the Day's Hearing.

Washington, Jan. 4.—The tobacco schedule of the tariff was thrashed over by the representatives of various tobacco interests today before the ways and means committee with great minuteness. Several branches of the business were represented, the native growers, the importers, and manufacturers using native goods, those using Havana and those handling the Sumatra product.

The National Association of Tobacco Manufacturers was represented by a large delegation, with its president, Moses Krahn of Cincinnati, for spokesman. The association asked for a rate of 52 1/2 cents a pound on all imported leaf tobacco, or not more than 55 cents on all unmanufactured tobacco, and 50 cents a pound, with 25 per cent ad valorem, on imported cigars.

The principal representatives of the growers were Michael Tobin of Baldwinville, N. Y., and J. H. Van Duser of Horseheads, N. Y. They asserted that the native growers had made no money under the Wilson bill and asked for rates higher than those of the McKinley act.

George J. Smith of Kingston, N. Y., spoke for the users of Sumatra tobacco and P. Ganby, formerly collector of the port of Tampa, Fla., for the manufacturers of the Cuban product. It was reported that only 5 per cent of the Havana tobacco used as wrappers had paid duty as such under the Wilson law.

Mr. Van Duser of Horseheads, N. Y., representing the growers of native tobacco, said that the tobacco growers were badly in need of relief. They had expended vast sums in warehouses, etc., and until the Holland syndicate, which employed coolie labor at 12 cents a day, should be allowed to annihilate the native leaf tobacco, they could not get on in this country.

Mr. Ganby, representing the manufacturers of Sumatra, said that the quality of the American wrapper leaf had not improved of recent years because there had been no inducement to growers to care for their leaves.

Mr. Van Duser of Horseheads, N. Y., representing the growers of the Chemung Valley, also asked for protection for wrapper tobacco. He admitted that \$200,000 worth of Sumatra tobacco was imported annually, of which 4,000,000 pounds were wrappers.

Mr. Ganby, representing the manufacturers of Sumatra, said that the quality of the American wrapper leaf had not improved of recent years because there had been no inducement to growers to care for their leaves.

GANG IS HALF GONE

TRAIN ROBBER FLYNN KEEPS KENNEDY COMPANY.

Landed Behind the Bars, He Tells the Story of the Two Blue Cut Hold-Ups After a Das Season of Reluctance—He and Kennedy, With Two Others Named, Did Both Jobs—Tells Where Swag Was Barred, Which is Found Accordingly—Cracker Neck's Reputation Maintained—Crime News.

Kansas City, Mo., Jan. 4.—Early this morning the detectives working on the Blue Cut train robbery case, brought in another suspect, arrested near Glendale, and who, they claimed, was John Kennedy, the leader of the gang now under arrest, on the night of the robbery. The officers at first refused to disclose the identity of the suspect, claiming that it would interfere with their plans in locating and arresting other men under surveillance.

Flynn's confession tells in minute detail how the two blue cuts of Chicago and Alton trains at Blue Cut were planned, with Kennedy as the arch-plotter. It gives the names of all the men in each of the affairs, tells how the money was divided, and how the train was held.

Mr. Payne endeavored to elicit an admission that the McKinley law had not been in force long enough to demonstrate the effects on the business of a 52 cent pound rate, but this the president of the manufacturers would not concede.

Mr. Tawney of Minnesota, asked if a very high duty on Sumatra would not drive the small manufacturers out of the business, to which Mr. Krahn answered that he could not definitely say.

THE NEW WAY

Physical Culture, Pure Food and Drink Have a Great Future in Passing Over the Country, and it Seems to Have Come to Stay.

More attention is being given to articles of food and drink than heretofore, and the people are slowly learning that good health cannot be preserved under the present civilization unless the habits are of a more natural character. The apartment houses and hotels are now numbering their victims by the thousands, and bowing obsequiously to the stomach and bowel troubles that will not abate except by leaving off the habit.

One of the late discoveries is a pure food coffee, made entirely of grains and containing great quantities of nourishing properties, while it brews the exact deep seal brown color of Mocha and when cream is added, it takes the rich golden brown of Java. The taste is pungent and piquant, quite similar to coffee in fact so close to it in aroma and flavor that the coffee drinker, who has had trouble with coffee, will freely take on the new grain drink without hesitation.

It claims to be a direct and quick producer of new blood corpuscles by the natural method of good nourishing food taken in a liquid form. It is quite a bit less expensive than coffee and altogether its use appeals to one's common sense.

Beware of the fraudulent imitations of the original Postum Cereal Grain coffee. Inset on Postum.

Dr. Wesley A. Dunn, Editor of "Medical Current," Marshall Field building, Chicago, says: "I am highly pleased with it."

IT'S ALL THERE YET

THERE IS NOTHING THE MATTER WITH CRUSOE'S ISLAND.

Story of Its Destruction by a Convulsion of Nature has Been Built Upon the Slightest Foundations, It is Now Stated—Chilian Government is Sending Colonists Thither and the Schooner Which Flew Regularly Between Mainland and Island has Always Found the Island All Right—How the Story Started.

San Francisco, Jan. 4.—The story recently published upon the authority of Captain Powles of the British ship James Kerr, relative to the disappearance of the Island of Juan Fernandez lacks verification. Chilian papers under date of November 30 give accounts of the results of a scientific expedition recently dispatched to Juan Fernandez upon the government warship President Errazuriz. Furthermore, a large cannery for packing lobsters is established at Cumberland Bay, the only port on the island, and the last steamer from New York carried to Valparaiso, via Panama, a quantity of material for this cannery. It is therefore unlikely that the island has disappeared.

The Chilian government is sending some thirty families to the island as colonists and fishermen in order that the piscatorial resources of its surrounding waters may be developed. Every month a sailing schooner plies between Valparaiso and Cumberland Bay, so that communication has been made with the settlement since its alleged disappearance.

The Powles yarn originated during the early part of 1868, when a series of heavy earthquake shocks occurred on the mainland of Chili. Another Britisher called into Valparaiso with the news that he had seen when passing Juan Fernandez a column of smoke and his ship received a violent shock, and he thought Selkirk's island had been swallowed up. The Chilian maritime officials sent the transport Casma to the island, and as she returned in three days with a large consignment of both canned and live lobsters, there was proof conclusive of the existence of land.

Even the Women Have the Fever in Auckland. The influence of Hauraki mining revival has made itself more or less felt in all the big commercial centers throughout the colony, but nowhere, naturally, to the same extent as in the city of Auckland, which has the gold fields, so to speak, almost at its doors.

When Peenoyer Turns in the Other Half of His Salary. Portland, Ore., Jan. 2.—Mayor Peenoyer has just received, but conceals, his salary for the month of December. He is reported to have turned in only one-half of the salary allowed him by law, which is \$5,000, as he considered it excessive. He has subsequently proved his sincerity by officially turning into the city treasury one-half of his legal salary, which he declined to accept on the ground that the duties of his office were not worth it; and directing Auditor Cramer to have the other half, amounting to about \$1,250, of the order of Secretary Walpole, of the city board of charities, to be expended for the relief of the needy.

BEFORE long my throat was filled with large lumps formed in my neck, and a horrible ulcer broke out on my jaw, says Mr. O. H. Elbert, who resides at corner 22d St. and Avenue N., Galveston, Texas. He was three times pronounced cured by prominent physicians, but the dreadful disease always returned; he was then told that was the only cure. His hair had turned white, and he began to improve and two dozen bottles cured him completely, so that for more than six years he has had no sign of the disease.
