LONDON COMES INTO THE MARKET EXTRAORDINARILY.

Wellington. From the Daily Journal. A fire alarm was sent in from the Fifth ward yesterday afternoon at 5:45 o'clock, as a result of the careless playing with fire on the part of some youngsters. Gus Finner's barn on South Washington avenue was entirely destroyed. A portion of the building burned was on the property of George B. Dean, next to him. The loss was not very heavy. The fire was started by some boys who were playing with a bonfire near the barn. When the gamins realized what they had done they ran away like deer without giving an alarm. One of the boys who was responsible for the fire, when last seen was running past the round house for dear life, with one shoe off and without hat or coat. The barn was a small affair, and contained nothing of much value. There was no insurance.

Captain M. J. Mahan died at his home in Sedalia, Mo., yesterday afternoon at 1 o'clock. His son, D. P. Mahan, of this city, received a telegram yesterday morning calling him to his bedside, as he was dying. In the afternoon another telegram was received stating that Captain Mahan had passed away. D. P. Mahan left last night over the Santa Fe for Sedalia. The cause of Captain Mahan's death was not stated in the telegram. He was very old and the loss of his wife some time ago had been heavily upon him. Grief over her death no doubt hastened the end. The funeral will probably be held tomorrow. Captain Mahan was well known in Wellington, this place having been his home for a number of years. He was highly respected by all who knew him.

Sherriff Jackson arrested Jack Hastie, Jr., and John Jackson last Saturday on trouble arising out of the violations of the state fish laws. Hastie and Jackson had promised, with the other persons implicated in the charge, to pay a fine of \$10 and costs if the prosecution would dismiss the case against them. They failed to keep their promise and Saturday the county attorney ordered their arrest. They were afterward released on their own recognizance and told to appear before Justice of the Peace J. M. Ready tomorrow. The matter will probably be settled by the fine and costs being paid.

From the Daily Courier. This morning while handling a 22-caliber rifle in George Mack's barber shop on East Ninth avenue G. A. McLean accidentally shot young Mack in the hip. The bullet struck the hip bone and ranged downward, making only a flesh wound. Dr. Pilscoe was called and indicated the bullet without much difficulty. Mack will be laid up probably for some time, but no serious results are feared.

A jolly picnic party went down to the Silliman farm Friday, consisting of the Sunday school classes of Mrs. T. H. Harold and Mrs. H. E. Silliman of the Baptist Sunday school. They went down on a hay rack, intending to come back by the light of the moon, but the shower drove them home and gave them a good sprinkling, which was good Baptiste they objected to. The members of the classes present were: Roy Gordon, Charlie Glass, Howard Wooley, Henry Phenic, Roy Harold, Lester Lampert, Sherriff Lierman, Thelma Brown, Mabel Drury, Helen Mann, Lucy Wood, Minnie Maddux, Kirtie Gibson, Amy Silliman and Nina Harrod.

The remains of Engineer Gordon, who was killed in the New Castle, Col., wreck will arrive here tonight from Salida, Col. If the ladies of Arkansas City desire to make a success of the Lyceum club they should attend the meeting at Mrs. Hill's Tuesday night.

Jesse Pressnell is here from Texas. Mr. Pressnell is a cattleman and was here several years ago. He and Dick Hatfield were going to fight a duel at one time.

Henry Sprinkler let his pocketbook with it full of money Saturday night. He notified the marshal that he had been robbed but a little later found his book and money in his coat pocket in the store of Duff & Repp.

BACK TO THE FATHERLAND Must Go Karl Kruger and His Wife, Under the Immigration Laws. Washington, Sept. 13.—Some time ago the state department referred to the treasury department certain representations to the effect that the board of supervisors of Kossuth county, Iowa, had discovered that Karl Kruger and wife, two Germans who immigrated to this country within the year, were public charges of the county. The secretary of the treasury investigated the matter and found the report to be true and directed their return to Germany. This will be done at the expense of the immigration fund. Immigrants having become public charges within one year after landing from causes existing subsequent thereto, are liable for their return.

Washington, Sept. 13.—Captain Shoemaker of the revenue cutter service, today promulgated regulations of the treasury department in relation to the movement of vessels on the St. Mary's, Michigan, river. The regulations facilitate the safe navigation of Sault Ste. Marie river and are wholly different from those used in 1895. They are published in the instance of Captain E. Davis, of the revenue cutter service, and are in accord with the wishes of the Lake Carriers' association and others interested in the navigation of those waters.

Washington, Sept. 13.—The president has sent notice that he will return from Somerset next Monday and a meeting of the cabinet has been called for Tuesday to discuss several topics which are regarded as requiring the executive attention and perhaps action at this time. On the list is the construction to be given discriminating duty section 22 of the tariff act; the scheme to be adopted for the improvement of San Pedro harbor, California; the adjustment of various questions of state that have arisen concerning Alaska and the gold miners, and perhaps the discussion of Hawaiian conditions. It is understood that the president will not remain in Washington more than a day or two next week, but will leave the city again in continuation of his vacation and will not return to the White House before the first of next October. It is believed that he will spend his time in New England.

PARNELL'S ANCIENT DEBTS His Brother Tries to Shift Part of the Burden to the Party. London, Sept. 12.—John Howard Parnell, elder brother of the late Charles Stewart Parnell and Parnell's member for South Meath, has written in reference to the so-called British fund, particularly that portion of the fund which is said to belong to the Parnell estate. He says that the 5,000 pounds sterling constitutes a political and not a personal debt; that it is one which should be repaid out of the general party funds, as it was borrowed by his brother from the National fund and spent for a political purpose. Mr. Parnell adds: "It is a disgrace to deprive my brother's property, and especially his creditors, of the money due."

WAR WITH THE TURKISHEN John Hill Seizes Turkey Upon the Answer of the Turkish Answer. London, Sept. 12.—At daybreak yesterday, following the repulse of the insurgents by General Youssouf-Beggs, who was attacked in the rear while moving along the Samarra ridge to prevent an attack on Port Rashid, the British commander dispatched a small column to recover some stores. This body of troops found the enemy in force, with thirteen standards but the British did not venture to attack the column.

General Hill is concentrating his force at Shabak today preliminary to making a final advance into the Midland country. The insurgents this morning captured the Bahargarti police post. Information from the frontier this afternoon shows that the Afridis are attacking the Samarra ridge in force.

London, Sept. 12.—The British war office has notified the answer of Afghanistan's London commercial agent that no war material or machinery for the manufacture thereof will be allowed to cross the frontier of Afghanistan during the present crisis.

"NAME" IS IDENTIFIED Her Seven Victims of the Newcastle Wreck Are Recognized. Denver, Colo., Sept. 12.—The woman killed and partly cremated in the Newcastle railroad wreck who had a watch engraved "Mamie" is identified as Mrs. Mary E. Johnson of Pomona, Cal. It is believed that the corpse clasped in her arms was that of her friend, Nellie Davis of Pomona. The charred remains of seven unidentified victims of the accident arrived in Denver today, and will be buried here.

NOT TO BE CHEAPER

UNCLE SAM'S STATISTICIAN FIGURES ON WHEAT.

He Concludes That the Present Decline From Recent Top Prices is Due to the Reaction of Vast Supplies Drawn Out and Thrown Upon a Higher Market and That the High Level Will Be Maintained Until the Crop of 1918 Shows Up, and Shows Up Well, at That European Figures.

Washington, Sept. 13.—The following relating to the wheat situation is an extract from the complete monthly report of Mr. John Hyde, the statistician of the agricultural department, which will be issued tomorrow:

High prices for wheat have for several weeks past been bringing out supplies quite freely, and increased supplies have in turn, reacted upon prices, causing some decline from the highest figures of August. The general tenor of the information gleaned from all available sources is not, however, of a character to warrant the expectation, or the fear, according as the matter is regarded from the consumer's or the producer's point of view, of any material cheapening of wheat until another crop is in sight with a prospect of ample stocks.

With the annual average European product of over 1,425,000,000 bushels during the six years from 1891 to 1896, inclusive, we exported an average of 166,378,272 bushels a year. This year the European crop, according to Bromhall's Corn Trade News, will, in round numbers, amount to 1,329,000,000 bushels, or 99,000,000 bushels less than the average of the six years in question. If we make the comparison with the figures given by Beerboom for 1897, the deficiency in the European crop is still greater, the figures, in millions of bushels, being: Average for 1891-1896, 1,425; crop of 1897, 1,145; difference, 110.

That is, according to Beerboom's estimate of this year's crop, there is a deficiency of 110,000,000 bushels in European countries, as compared with their average product for the six years, 1891-1896, an average which includes the exceptionally small crop of 1891. To make up the deficiency, little help is to be expected from India, Argentina or Australia for months to come, and in so far as Europe will have to import a larger quantity than usual, she will have to draw it mainly from North America, and especially from the United States, the Canadian contribution being relatively small. Official returns for Ontario and Manitoba give for these two provinces an aggregate of 51,042,253 bushels. If the Argentine crop shall escape the ravages of locusts it seems likely to turn out unusually well, and from January, 1898, when the bulk of the harvest will be got in, Argentina that country may have more or less wheat to export, as the latest mail advices represent the crop as being in fine condition and the weather highly favorable. There are, however, many chances of serious damages during the next three or four months. The latest accounts from Australia indicate that the drought from which that country has suffered for the last two or three seasons has been broken, and that the wheat crop is giving good promise throughout most of the Australian colonies, but the area was narrowed by drought at seeding time, and, as stocks must be low, it is not likely that even with a full yield the crop will be one out of which any great amount can be exported for exportation. The present high prices would ordinarily tend to encourage the seeding of an increased breadth in India, should the weather be favorable this fall, but any inclination on the part of the poorer cultivators to take advantage of such favorable conditions will probably be in a great measure thwarted by the impoverished condition in which they have been left by the famine in the greater part of the wheat-growing districts.

But, leaving out of the fact that the burden of supply for Europe will fall more largely than usual on the United States, it is evident that there would, in any case, be a demand for a larger surplus than is to be expected out of this year's crop. If, to our average annual export for the six years, 1891-1897, we add a European shortage of 99,000,000 bushels, as figured out by Bromhall, we get a total of 265,378,272 bushels, and in so far as we fall short of supplying that quantity, Europe, as compared with an average year, must suffer a scarcity in her bread supply, except in so far as she can import it by drawing on the stocks that may remain out of previous crops.

The world's reserves have, however, been reduced in consequence of the short wheat crop of last year and a deficiency in some of the other important food crops will not tend to relieve the tension of the wheat market.

WHEAT LOWER AT NEW YORK. New York, Sept. 13.—The decline in wheat today left prices 5 cents below the highest point of last week, and 2 cents lower than they closed on Saturday. Speculative sales ran up to 4,900,000 bushels, which represented a moderate daily business. Weakness was encouraged by the mellow bushels increase in the visible supply, a fair addition to the local stocks, heaviness in all foreign markets and light exports. Local houses and foreigners sold most of the day, the latter taking a leading part. In the late afternoon there was some rallying on buying stimulated by the firmness in corn. December sold from 97.3 to 99.1-1/2 and closed at 98.

Corn was fairly active and weak, with late rally on covering. The crop outlook is offering less encouragement to the bull side than formerly. December ranged from 87 to 87.75, and was 1-1/2 lower than Saturday.

GRAIN AND PRODUCE MARKETS. CHICAGO. Chicago grain and produce markets furnished by R. L. Bostick, Commission Merchant, rooms 10-12 over Kansas National bank, Chicago, Ill.

Wheat—Sept. 13.—The condition of affairs as regards the fever was not materially changed from the former reports. Most of those sick were improving rapidly. The casualties of all were favorable. Late yesterday evening there were reported two new cases in the Desporte family, living on Oak street, out near the point. This made four cases in that family. One new case was reported yesterday by Dr. Harshbarger, Dr. Tackett reported yesterday three new cases. Dr. Tackett kindly showed your correspondent his list of patients and had on some fourteen cases of fever, nine of which he diagnosed as yellow fever, and this was concurred in by Dr. Gant, who had just made the round of visits with him. Dr. Gant further said that the evidences of yellow fever were as clear and distinct as those of the Bozarge family as he had ever seen in any case. The state board of health met in session here to arrange for the quarantine and to provide a county health officer. Dr. Bolton, the present officer being sick and unable to act. Dr. J. J. Harry of Mississippi City, was elected to the position.

ONE CASE AT MOBILE. Mobile, Sept. 13.—The board of health met today and on adjournment Dr. George A. Ketchum, its president, announced the statement that one case of yellow fever had developed this morning at the city hospital. The patient is a Norwegian sailor. No history of the infection was given.

NOT YELLOW FEVER. Jackson, Miss., Sept. 13.—Dr. J. H. Purnell, the Vicksburg yellow fever expert, who, after an investigation at Edwards, Miss., last night, found two cases of dengue fever existing there, proceeded to Palmettoche late last night and this morning reported that the sickness in Palmettoche was malarial fever and that there was no danger from that point.

FEVER IN NICARAGUA. Managua, Nicaragua, August 31.—Yellow fever has appeared at Leon in the western Nicaragua. Several natives have died of the disease recently and it is spreading.
