Price's Cream Baking Powder is everywhere the acknowledged standard, the powder of the highest reputation, greatest strength, and absolutely pure.

It renders the food more healthful and palatable, and using it exclusively you are assured against alum and other dangerous chemicals from which the low-grade powders are made.

Dr. Price's Baking Powder is sold on its merits only—never by the aid of lotteries, gifts, commissions or other schemes. The entire value of your money comes back to you in baking powder—the purest, most economical made.

NOTE.—Alum baking powders are low priced, as they cost but three cents a pound to make. But alum leaves in the bread or cake glaucous salts, sulphuric acid and hydrate of alumina—all injurious, the last two poisonous.

SHORTAGE OF \$40,000

Is Estimated to Be Found in Accounts of Mr. Young.

Louisville, Nov. 28.—It is believed in official circles that the alleged discrepancy in the accounts of former City Treasurer Stuart R. Young, who committed suicide last night, will be between \$100,000 and \$200,000. The experts and the committee appointed to examine the books of the treasurer's office were not at work today. One of the experts

stated that it would be several weeks before any official report of the condition of the books could be made, as it would be necessary to check Young's accounts for the entire term of his incumbency, four years.

The only facts known at present regarding the accounts is that between the indicated balances are the actual balances in the two banks in which the funds of the city are deposited—there is a discrepancy of about \$48,994. Young was assistant postmaster in this city during the administration of President Cleveland, the postmaster being Charles P. Weaver, who was mayor of Louisville at the time Young was city treasurer.

Lawrence Young, of Chicago, brother of the dead man, arrived in the city today. Former Mayor Charles P. Weaver under whom Young served as treasurer, says he went to Young yesterday morning and asked him if the rumors regarding the alleged shortage were true and that Young denied there was anything wrong with his accounts.

United States Transport Sinks to Bottom in Philippine Waters.

Manila, Nov. 28.—The United States transport Wright has been wrecked in the Straits of Zamboanga. She will probably turn out to be a total loss.

The Wright struck on an uncharted rock at the entrance of San Justino and sank in fifteen feet of water. To raise her will require wreckage machinery which is not available here.

The United States Transport Wright, formerly the A.S., was originally a frigate, and was presented to the government by some patriotic woman of Boston when the Spanish war broke out, to be used as a hospital ship. Later she was fitted out as a dispatch boat and was sent to Manila to be used by General Wood. More

Seymour Bell Explains America's Trade Monopoly.

TEA AND SCOTCH WHISKY

Is Growing Need In These United States.

London, Nov. 28.—Sixteen reporters and six British business men gathered this afternoon, in response to the London Chamber of Commerce's general invitation to hear Seymour Bell, the commercial agent of Great Britain, in the United States, expound his views on American trade competition.

He said that all America wanted from abroad was daily getting smaller, that Great Britain was being cut out of even this small portion of the market by France and Germany. Mr. Bell attributed this to Great Britain's backwardness in using labor saving and automatic machinery. He declared that the working classes of Great Britain must be educated up to them, and be convinced that their use was essential, before Great Britain could compete with America.

Mr. Bell also said there was no doubt that the reciprocity movement in the United States would result in the removal or reduction of many of the duties now enforced, but it would be in the case of articles in which the United States was quite safe from foreign competition.

Mr. Bell said there was a growing need for tea and Scotch whisky in the United States. The statement disclosed the fact that India and Ceylon tea merchants had entered into a pooling arrangement for the purpose of promoting the sale of their brands in the United States. The commercial agent denied the statement that American wheat was inferior to Portland cement.

One of the few merchants present declared that the American trade was completely ousted from Central and South America.

Discussing what became of old men in America, Mr. Bell said that a man 6 years of age and over had had hard work to get any position there, and that this was one of the most serious features in the future American business life.

Scotch whisky, it was also said, was now being made in New York and exported in large quantities to South America. Mr. Bell reassured his hearers that there was no prejudice against British goods, only they could not expect them to be bought, when, as in the case of agricultural machinery, the American article was lighter, more durable and cheaper.

Nor could the colonies be blamed for patronizing America in preference to Great Britain in this branch of machinery. He praised the specialization adopted by American manufacturers and concluded with declaring that while nothing which could not be remedied existed to prevent Great Britain from holding her own, her manufacturers must get more modern machinery, and compel their employees to use it.
