

FOR WORKING AT NIGHT

L. F. Duggan Fined \$100 in Police Court.

BUILT TELEPHONE LINES

In South Part of Town.

L. F. Duggan was fined \$100 in police court yesterday afternoon, for doing electrical construction work within the city limits without a permit from the city electrician.

The Missouri and Kansas Telephone company were arrested about 11 o'clock yesterday morning for putting on poles and stringing wires in the alley between Main and Water streets.

The Missouri and Kansas Telephone company were arrested by the city with cutting the poles and stranding the wires during the night, and the witnesses examined by the court seemed to bear out these statements.

The men arrested yesterday besides Mr. Duggan, were Ben Herbert, Arthur McLeary, E. F. Perry, Tom Webb, Hugh Nichols, J. H. Snyder and Wm. Pedigo.

All of the men were taken to the police station and locked in the jail and kept there for more than an hour, until Judge Stanley showed up, when the men were arraigned and then released on their own recognizance to appear at 4 o'clock yesterday afternoon.

When court was called, Ernest Shields, who lives at 82 South Water street, testified that when he went to bed Monday night no poles were erected in the alley back of his home, but when he got up at 4 o'clock on Tuesday morning he found that block and in the next block and wires were strung on the poles.

He thought there were ten or fifteen men working in the alley. He stated that he recognized Mr. Duggan and Pedigo, who seemed to be superintending the work.

C. W. Ferguson, who appeared for the defense, did not ask the last any questions when City Attorney Helm was through questioning him.

E. D. Davis, who lives at 519 South Main street, stated that no poles were set up the night before, but when he arose yesterday morning there were a number of poles set in the alley, both north and south of his house, and two wires were strung on the poles.

Some of the tools the men used were leaning against his barn when he went to feed his horse. He saw ten or fifteen men working at the poles about a quarter past 4 o'clock.

Freeman Van Zandt lives at 517 South Main street, and when he arose yesterday morning he noticed twelve or fifteen poles standing in the alley that were not there the night before.

The poles extended for two blocks. He also saw the men put up one of the wires and pointed out Mr. Duggan and Mr. Pedigo, both of whom seemed to be superintending the work.

J. H. Shields, who lives at 82 South Water street, was the last witness called. He noticed the poles lying on the ground Monday evening, but they were standing yesterday morning when he got up. He talked with Mr. Pedigo about the poles and the gutter in the alley, but Mr. Pedigo had one of his men clean out the gutter.

He thought that about ten men were working putting up the poles and wires, and that the work was done during the night.

The defense had no evidence to offer, and Mr. Ferguson made a short argument. He claimed that the wires were not connected, and that it was not electrical construction work. His argument was completely rejected by the building of lines that carried power and light from which fire might originate, and that a telephone line did not carry an electrical current, but was worked by a magnetic current from which there was no danger of fire.

Helm told great stress on the fact that the company had worked the men during the night, and at hours when most laborers were asleep, and refuted the arguments of the attorney for the defense.

Judge Stanley, after a short review of the evidence, fined Duggan \$100, and the defense immediately gave notice of an appeal. The other cases were continued until 9 o'clock this morning.

Each of the men have demanded a separate trial, and the case will probably drag in police court for a day or two.

In the meantime the police are awaiting orders from the city attorney to tear down the poles and wires put up yesterday morning. Chief Burt stated yesterday that if the city attorney would order it, he would send out his men and take down the wires and poles in the alley, but he could do nothing until the attorney ordered them to do so.

IF A MAN LIE TO YOU

And say some other false statement, kation, oil or alcohol, better to get as much as Eucaly's Asthma Cure, tell him thirty years of marvelous cures of piles, burns, boils, corns, feline, ulcers, cuts, scalds, bruises and skin eruptions prove it's the best and cheapest. 25c at Gehring's pharmacy.

FORMER WICHITA BOY

Rosecoe Wallace Married at Galena, Ill.

The Galena, Ill., Republican-Register has the following article on the marriage of a Wichita boy. Rosecoe C. Wallace was born in this city and his father, John Wallace, was once deputy county clerk of Sedgewick county. The Galena newspaper says:

The home of Mrs. Emily J. Kinneer, on West Main street, was the scene of a pretty wedding at 9 o'clock Wednesday evening, the principals being the daughter, Grace Elizabeth, and Rosecoe C. Wallace, son of Mr. and Mrs. John A. Wallace. The attendants were all charming and comprised colors, amix, and roses, the prevailing colors being pink and white.

Dysentery

Is a dangerous disease, but can be cured. There is a remedy that never fails. It has been used in thousands of cases of dysentery with perfect success. It is called Chamberlain's Colic, Cholera and Diarrhoea Remedy.

It is equally valuable for children and when combined with Chamberlain's Colic, Cholera and Diarrhoea Remedy, is pleasant to take. Price, 25c and 50c.

MISS VIRGINIA GRANES

Tells How Hospital Physicians Use and Rely upon Lydia E. Pinkham's Vegetable Compound.

"DEAR MR. FISHAM:—Twelve years continuous service at the sick bed in some of our prominent hospitals, as well as at private homes, has given me varied experiences with the diseases of women. I have nursed some

MISS VIRGINIA GRANES.

President of Kansas Association, Waterbury, N.Y. most distressing cases of inflammation and ulceration of the ovaries and womb. I have known that doctors used Lydia E. Pinkham's Vegetable Compound when everything else failed with their patients. I have advised my friends and friends to use it and have not to hear of the first failure to cure.

"Four years ago I had falling of the womb, from straining in lifting a heavy weight, and knowing of the value of your Compound I began to use it at once, and in six weeks I was well once more and have had no trouble since. I am most pleased to have had an opportunity to say a few words in praise of your Vegetable Compound, and shall take every occasion to recommend it."

MISS VIRGINIA GRANES.—4000 North 1st street, Waterbury, N.Y.

Lydia E. Pinkham's Vegetable Compound has stood the test of time, and has cured thousands.

Mrs. Pinkham advises sick women free. Address, Lynn, Mass.

The palms were grouped in the vicinity of the sitting room. In the dining room, the guests were seated at a long table covered with a white and pink carnation and amaranth.

The guests were the immediate relatives and were thirty in number. They were admitted at the door and shown to the dining room by Miss Emily Kinneer and Miss Malvern Wallace. They were received by Mrs. Kinneer and her daughters, Mrs. Lefgren and Mrs. Shannon, and Mr. and Mrs. Wallace. When the time for the ceremony arrived, Miss Nellie Griffith played smoothly the wedding march from Lohengrin. There then entered the bridal party, comprising Blanche Irene Shannon, a lovely little girl, dressed in white, with pink hose, slippers and ribbons, as ring bearer, Miss Myrtle Griffith as maid of honor, Miss Florence Morrison, bridesmaid, Charles Kinneer, the bride's brother, as groomsmen, and the bride and groom.

These took their positions in the spacious parlor doorway with its dainty environment. The group made a charming picture. The bride in her gown of white silk mullin, on train, trimmed with real lace, presented a lovely appearance. She carried Queen's roses. The bridesmaid wore white India Mulla, trimmed in pink and her bouquet was of pink roses.

The dress of Miss Griffith, the maid of honor, was pink mullin and her roses were of the same color.

The bride is admitted by a large circle of friends for her many fine personal qualities, she received her education in the city schools. She has been employed at Hart's store and proved herself useful and capable. She is a member of Grace church.

The groom is a Kansas product and grew up in Wichita, where he received his education. He has lived in Galena, the last six years. He is a member of the firm of Wallace Brothers and is an enterprising and popular. He is a member of the Crescent club.

Mr. and Mrs. Wallace will reside with the groom's parents for the present, but it is their intention later to procure a home.

Low Rates to Atlantic Coast Points. July 2 to 9, inclusive, the Nickel Plate Road will sell tickets to Portland, Me., and return, at one fare for the round trip. It will be to your interest to obtain rates that will cover the round trip.

TOURISTS FOR THE MOUNTAINS

Fifteen of Them Left With Colorado Flyer Last Night.

The Santa Fe depot last night looked like a metropolitan station and to some extent like a depot in a foreign country. That Colorado Flyer has changed the quality of things and the Colorado looks fashionable at 10 o'clock. Last night fifteen tourists were leaving for Colorado Springs and when tourists do not make things lively it is a cold day. There was some hurrying and scurrying about looking after luggage and checking it than one would see at a trans-Atlantic shipping station. The flyer is mighty popular and the tourists are not counting it in a way that is gratifying. It is like going to bed in Wichita and waking up in Colorado Springs for breakfast. The entire trip is made with you sleep. A great many Wichita people are going to the mountains and especially within the last few days when the weather is manifesting a disposition to be warm.

AGAINST THE COUNTY

Suite is Filed by Man Claiming Wages for Guarding Wounded Prisoner.

A petition was filed in the district court yesterday in which E. R. Barrett is bringing suit against Sheriff C. W. Simmons and the Sedgewick county commissioners for \$225. Barrett claims to sue him for guarding, beginning September 4, and about ending, being for capture of Officer Osborne. He says that he was hired to guard the prisoner while he was in Wichita hospital by Simmons, that he did guard him 33 days at \$10 a day, but has never received his pay. Dyer & Davis are his attorneys.

BIG WHEAT YIELD

H. Jorgensen Has 23 Bushel to Acre Wheat.

H. Jorgensen, a banker of Mr. Hope, has harvested 25 acres of wheat and is well pleased with the yield. Parts of the crop went twenty-five bushels to the acre, while the average was twenty bushels to the acre.

The Sedgewick county farmers are not only getting better wheat than they expected a few months ago, but they are surprised at the rapid growth of the corn. P. J. Conklin stated yesterday that in some fields every stalk has an ear on it.

IS SECURE IN HER POSITION

That Is What Illinois Capitalists Say of Wichita

WILL HAVE 75,000 PEOPLE

W. B. Brinton and C. S. Witmer Talk Business, Crops and Politics.

W. B. Brinton, president of the Peru Plow and Wheel Works at Peru, Illinois, and president of the National Shelters' Manufacturing association, and owner of the largest shelter plant in this country at Joliet, Ill., and C. S. Witmer, president of the Joliet Manufacturing company, were in the city yesterday and left over the Rock Island at 1 p. m. for Kansas City.

When the stock of the Van Zandt Implement company was enlarged and the name changed to the Peru-Van Zandt Implement company, these two men took all the new stock and they were here to attend the first meeting of the new company and close up the business.

Monday evening Mr. Van Zandt and Coler Sim got a carriage and drove them over the city to the city parks and yesterday Superintendent W. R. Morrison got out a special car and took them all over the street car lines of the city. When they returned from their car ride a reporter for the Eagle met them at the Hamilton and they sat under the awning in the cool breeze and talked about Wichita until Judge Suss came along and interrupted the conversation. The judge and Mr. Brinton were raised in Escalona, Illinois, and they talked about the girls and boys who were raised in the town and what had become of them.

"I am more than pleased with Wichita," said Mr. Witmer, "and I think there is no doubt that it will have 75,000 people in ten or fifteen years. There is no question about its becoming the greatest distributing center for farm machinery. I talked with one of the head men of the McCormick company the other day and he admitted to me that his company distributed more machinery from Wichita than it did from Kansas City."

"We have put our money in the new Van Zandt building in this city, and yesterday when we rode over the city Coler Sim told us what lots here and there could be bought for and we are going to send the money to buy a number of lots for an investment. We will buy them just like walking up to a roulette table and putting your money on the first number, only in this case I think the numbers are all winners. You cannot miss it in Wichita now investing in property at present prices and there is plenty of money in any of it. I am very greatly pleased with your Riverside park. It shows that you have had brains at the head of affairs of the city to secure such a magnificent park while property was cheap."

W. R. Brinton is somewhat of a politician as well as a manufacturer and capitalist. He has been for sixteen years treasurer of the state Democratic central committee. He said when he was first elected he promised the Democratic party that he would at least pay over the interest on all the money that came into the treasury. The party thought that was pretty good and he said they had been neglecting him ever since.

"Wichita suits me exactly," said Mr. Brinton, "and I am going to invest more of the money here. Wichita is bound to be the great distributing point of the southwest and we will be in it on the ground floor. There is only one thing that would ever hurt Wichita and that is a combination of the railroads against it and that is hardly probable because it will not be to the interest of the roads to do anything of that kind."

"Do the Democrats have about as good a show to carry Illinois at the next election as they do to carry Kansas?" asked the reporter.

"I do not think Illinois is as surely Republican as is Kansas. Chicago is a great factor in Illinois and nobody ever knows exactly how the vote will there. The city is so large that it is hard to tell how the vote will go. Of course, we have some local scraps in our state, but we are going to nominate either Dave Hill or Oliver for president and give the Republicans a whole lot of trouble in the next national election."

"When you come to the Republican party I think that Mark Hanna is the greatest business man in politics. If the people were to allow me to select the next president I would appoint Mark Hanna to the place and let him try it for four years more. He has a wonderful business capacity, and while I am a Democrat I think Mark would make a great president."

"No, I did not believe very much in the free coinage of silver, but I was in for it and I yielded my private conviction to the judgment of the party and voted for Mr. Bryan. I do not believe that will be a question in the next presidential campaign. I think the Democratic party will be wise to drop that issue for the present at least."

"We are going from here to Kansas City, but we will be in Wichita frequently

now that we have interests here and hope to have more investments in the city. I want to travel through Kansas in daylight so that I can see the crops. We are interested in the crops as well as the farmers. This is a part of the great corn belt and I like to see the corn growing. People talk about cheap corn if the crop turns out all right. The day of very cheap corn in this country is a thing of the past and it will never return.

"Did you notice how corn hoarded in Chicago yesterday? There is a demand for the corn even at these high prices. People used to think that all that corn was fit for was to feed hogs, but there is a large demand for it now outside of hog feeding. It is being more and more used by the people for food and there is going to be a demand for all the corn that this country can raise at good prices. The farmers are learning the value of corn and you will not see them in the future rushing it on the market at low prices. Right here is where they raise good corn, but of course it falls next year and the wheat in Kansas is the best in the world."

"I see you have a fine street car system and that is a good thing for any town. These people know how to develop a street car line. Mr. McKinley came to Danville, Illinois and bought the line there and Joe Cannon thought he did a smart thing when he sold it, but today the property is worth twice what McKinley paid for it. This company knows how to operate street car lines and it helps the town while doing a good thing for itself."

INCORPORATED

S. & M. STORE FILES ARTICLES, WITH CAPITAL OF \$15,000

Dir ctors to Hold Meeting and Elect Officers.

The S. & M. department store has filed articles of incorporation with the secretary of the state of Kansas, capitalizing the organization at \$15,000. There is to be 150 shares of stock at \$100 a share. The directors of the establishment are: D. E. Schmitt, Jacob Schmitt, Henry A. Martin, Henry Schmitt, Henry A. Schmitt and Jacob J. Schmitt. They are all related and live in the west of Wichita. They are all in Wichita at the present time and Friday or Saturday will hold a meeting, at which time officers of the corporation are to be elected. A charter is ready to be filed as soon as matters mature.

The store is at present of good size and has made a great growth. The directors, through their officers say they intend to enlarge it into a regular city department store with everything on a greater scale.

SAVES A WOMAN'S LIFE

To have given up would have meant death for Mrs. Lois Cragg, of Dorchester, Mass. Her husband, who is a doctor, was unable to cure her of a severe lung trouble and she was about to give up. "I could scarcely breathe and sometimes could not speak. All doctors and remedies failed till I used Dr. King's New Discovery for Consumption and was completely cured." Sufferers from coughs, colds, throat and lung trouble need this and remedy, it never disappoints. Cure is guaranteed by G. Gehring's pharmacy. Price 50c and \$1.00.

NO LIGHTS TO SPARE

Councilman Burton Does Not Vie With Councilman McKee in Generosity.

Councilman Burton stated last night that a few changes would be made in the location of the lights in the Sixth ward. The light at the corner of Duane and Hillside avenue will be moved to the corner of Zimmerman and Tremont and the lights at the corner of Erie and Douglas will be moved to the corner of Patti and Zimmerman.

Mr. Burton is not willing to be as generous as Councilman McKee with the suburbanites on Fairmount hill and stated that though Mr. McKee might be willing to give up some of his money and rights for Fairmount, he would not be willing to part with a single lamp allotted to the Sixth ward.

If your brain won't work right and you need the strengthening and energy that only one, you should take Prickly Ash Bitters. It cleanses the system and invigorates both body and brain.

MEAT TRUST UP

Judge Harvey Is to Decide if One Exists in Wichita.

A beef trust case is now in the city court, and the question that has been worrying all the east is to be decided today by Judge Harvey. The case is that of John Cudaby vs. J. B. Hart and W. F. Schell for the payment of a bill \$287. The defendants in their answer to the petition declare that John Cudaby and Jacob Dold entered into an agreement to keep up the price of beef and thereby formed a trust that is unlawful. Hank A. Agers are the attorneys for the plaintiff while Judge Wall is for the defendants.

The case was finished up yesterday and taken under consideration. The evidence was all very interesting until it came to the point where C. F. Harrison, manager of the Cudaby plant, testified to give Mr. Harrison a commission to sell Mr. Hart's beef at a price to be determined upon a schedule of prices, but witness declared that no such meeting had ever been held. Judge Harvey's decision is awaited with interest, for if he decides against the plaintiff, it will solve the question that has baffled the east.

OWNS 2,880 ACRES

John Kiefer Has 2,000 Acres in Wheat—Buys More Land.

John Kiefer, of Garden Plains, has bought 160 acres a mile and a half west of Garden Plains, of the Keene syndicate, through the agency of Coler Sim for \$1500. Eighty acres of the land is sown in wheat. Mr. Kiefer now owns 2,880 acres of land in Sedgewick and Harper counties, and 2,400 acres of this land is in wheat. He stated yesterday that his wheat would average fifteen bushels to the acre.

PARTNERSHIP BEGINS TODAY

Firm of Vincent and Davidson Will Enlarge Their Establishment.

Yesterday John P. Davidson entered into partnership with W. A. Vincent in the lithographing company of this city. He has bought a half interest in this enterprising firm and will devote all his energies to it. He has been with the Kansas National bank and was preparing to take up the position of cashier at the Stock Yards bank, when the present deal was made. He is a man of business principles and strength, as is shown by the part record in the commercial life. That he and Mr. Vincent will build up the lithographing business with great proportions is not doubted.

Yesterday was a awful hot and a fellow who had not the good fortune to have a rubber collar, had to have a rubber one to keep his wet neck from getting over the only collar he had. It was only 82 degrees by the thermometer of the weather man, but it was a great deal warmer than this by the human gauge. In fact there has been two days warmer than yesterday according to the thermometer. June 28 on which it was 82 degrees and June 31 on which it was 84 degrees. The intense heat of yesterday was due to

your insides cool and healthy. To do it, use a medicine that is not offensive to the taste and not harsh and violent in its action. There is only one safe system-cleaner to take in the summer time, because it will not cause diarrhoea or griping, and that is

may he has done, he has done credit to his early connections. Promoting his own interests and, whenever he can, those of Wichita, he has played the part of a good citizen well.

The new partnership means much for the establishment. Already it has been enlarged, but to still greater proportions it is to reach. New machinery will be added and the capacity of the plant doubled. In every way, the lithographing company will be up-to-date. Take one of its latest machines, the envelope folder. Many do not know that there is a machine in this city that takes a piece of paper, folds it, gums it and brings it out ready for use. It is wonderful, and handles the flimsy paper as though human.

Do you want a sound liver, vigorous digestion, strong healthy kidneys, regularity in the bowels? Take PRICKLY ASH BITTERS. It has the medical properties that will produce this result.

CHAIR OF LATIN AND GREEK

In Lewis Academy to be Filled by Prof. Byrnes of Illinois.

The board of trustees of the Lewis academy has filled the vacancy in the faculty of the academy by the election of Prof. Lee Byrnes, Ph. D., to the chair of Latin and Greek. Prof. Byrnes has been connected with the "Lake Forest (Ill.) University for a number of years and comes to this city well recommended as a student of the ancient languages and also one of the finest teachers of the same.

ARM WAS POISONED

Sol Nighswonger Receives Slight Injury Which Becomes Serious.

Sol Nighswonger is in St. Francis hospital suffering from a poisoned hand and arm. He slightly injured his hand about a week ago while working around some harvesting machinery. Poison set in and spread to the arm. For awhile it was feared that amputation would be necessary, but fortunately that was not the case. The arm is now healing and Mr. Nighswonger will be out of the hospital in a few days.

WICHITA'S CHANCES SURE

A. W. Oliver Points Out What City Should Rely On.

A. W. Oliver has been visiting Wichita for the past three days and yesterday took a drive over the city. He is an old resident of this city and was not surprised of the change he took note of yesterday. He declares that Wichita is in undoubtedly a very prosperous condition and still continues so.

Of her chances of being a great city Mr. Oliver says:

"Wichita's facilities lie in her agricultural resources, her livestock business and her educational advantages. These should be built up and every energy exerted in this direction. Wichita is the city of the southwest without doubt and she has the resources to become a large city. In ten years I do not see why she will not have a population of 50,000 inhabitants. People who are now gaining good income in the small surrounding towns will naturally seek Wichita. They will want to give their children a good education and will come here to do it. There is no reason why this city should not have two or three more packing houses. In this and grain here is everything for her. Within a radius of 100 miles of Wichita there should be raised a million hogs a year and yet but few are killed at the packing houses here. I do not believe that Wichita can become a manufacturing town for it has not the cheap fuel. Unless some new motive power suitable for her is found, she must look to agriculture and livestock for her building material. The residence portion of the city is very fine, but the business streets have a ragged appearance, which it takes time to do away with."

PAYS \$1,750 FOR PROPERTY

Mrs. Miles Buys Ninety Feet and Six Room House.

C. W. McCoy yesterday sold for Grant Hubbard the property at 1111 East First street to Mrs. Mary E. Miles for \$1,750. The property has a frontage of ninety feet. On the lot is a six-room cottage.

Mr. McCoy also sold right lots on Ida avenue in Lincoln to Mrs. J. M. Hart for \$50 each. The lots were owned by the Bursell & Eno investment company. Mr. Macey expects to improve the property.

He eats heartily in the hottest weather when he uses PRICKLY ASH BITTERS. It keeps the stomach, liver and bowels in perfect order.

IS IN GOOD HUMOR

Weather Man Will Hold Reception This Morning.

The weather man reported of his wrath last evening and after afflictive the people with a very warm and sultry day, he sent a refreshing shower about 7 p. m. which cooled the heated atmosphere. For this reason he feels that he is entitled to the heartfelt thanks of the people and in order that all who so desire might see him personally when they think him for sending and weather, he will hold a reception in their section in the past twenty-four hours.

Yesterday it was awful hot and a fellow who had not the good fortune to have a rubber collar, had to have a rubber one to keep his wet neck from getting over the only collar he had. It was only 82 degrees by the thermometer of the weather man, but it was a great deal warmer than this by the human gauge. In fact there has been two days warmer than yesterday according to the thermometer. June 28 on which it was 82 degrees and June 31 on which it was 84 degrees. The intense heat of yesterday was due to

No Summer Bowel Troubles

Not for me! I'm safe from all of them and happy. The heat of summer causes organic matter everywhere to decay. All dead vegetable or animal matter rots if not kept on ice. All undigested food in the human body will ferment a hundred times as quickly in summer as in winter. Consequence—stomach, liver, bowels poisoned, thrown out of order—sour stomach, gases, colic, diarrhoea, dysentery, cholera, appendicitis, and in some regions yellow fever and the plague. Little children suffer terribly everywhere. What does good sense tell you to do? You can't keep the human body on ice, and the drinking of ice-cold drinks does more harm than good because it stops digestion and chills the internal organs. The proper thing is to keep all impure and unnecessary matter out of the body every day, not give it a chance to sour and decay in the stomach and bowels, and poison the blood and the whole body. In this way you will stop all hot, feverish conditions, and keep your insides cool and healthy. To do it, use a medicine that is not offensive to the taste and not harsh and violent in its action. There is only one safe system-cleaner to take in the summer time, because it will not cause diarrhoea or griping, and that is
