## We offer \$1,000 for a disease germ that Liquozone can't kill; and most of the sick are sick because of germs. One bottle free

We have purchased more than a million bottles of Liquozone and given them free to the sick. During the past four months, we have spent over \$500,000 to announce and fulfill this offer. We have done this to convince the sick that Liquozone does what medicine cannot do, and we are willing to do the same with you, if you need it.

### What Liquozone is.

Liquozone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas—largely oxygen—by a process requiring immense apparatus and 14 days time. Each cubic inch of Liquozone represents the virtues of 1.25 cubic inches of the gas.

The result is a product which does what oxygen does, but in a way which does not exhaust the blood, the most essential element of life. But oxygen is a gas and unstable; while Liquozone is fixed and concentrated. It gets an excess of oxygen virtues into the blood, to go wherever the blood goes. The result is a vitalizing tonic with which no other known product can compare.

### Kills Inside Germs.

But the great value of Liquozone lies in the fact that it kills germs in the

body without killing the tissues, too. There is nothing else known which will do that. Any drug that kills germs is a poison, and it cannot be taken internally. For that reason, medicine is practically helpless in any germ disease.

Liquozone is so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and an excess of oxygen—the very life of an animal—is deadly to vegetable matter. Liquozone is certain destruction to the cause of a germ trouble, yet to the human body it is the most helpful thing in the world.

### Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.

# CREDIT

## Is a Necessity

Governments, banks, corporations, institutions, all seek credit with privileges of part settlements. Why not the housekeeper with her own institution? We don't believe for a moment that we grant you a favor in extending "charge" privileges. We appreciate your acceptance of our offer. It casts a mutual confidence and clear understanding over our relations. When you are doubtful about values, ask candid questions. We are an honest broker, and we would rather lose a sale by disappointing you with a fact than selling you by misrepresentation. The last named fault would be commercial suicide.
