

Ayer's Hair Vigor

What does it do? It makes the hair soft and glossy, precisely as nature intended. It cleanses the scalp from dandruff, and thus removes one of the great causes of baldness. It makes a better circulation in the scalp, and thus greatly promotes growth. And it stops the hair from coming out. But it never affects the color. Consult your doctor; follow his advice.

Falling hair is sometimes caused by impure blood or weak nerves. Then constitutional treatment with Ayer's Sarsaparilla is necessary. This local and constitutional treatment will surely bring prompt results.

Chairman Alexander of the House "Ship Trust" investigating committee, making public the first three volumes of the committee's proceedings today, declared they contained evidence that competition between coastwise lines had practically been eliminated and that all established lines from American ports were in "agreements."

Nobody knows how many more are undiscovered."

CASTORIA

for Infants and Children.

Physicians Prescribe Castoria.

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: 1st, The indisputable evidence that it is harmless; 2nd, That it not only allays stomach pains and quiets the nerves, but assimilates the food; 3rd, It is an agreeable and perfect substitute for castor oil. It is absolutely safe. It does not contain any opium, morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a medical journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—Hall's Journal of Health.
