COMMERCIAL ITEMS.

In a generally dull session on Saturday, there was a slump in the New Haven on the New York stock exchange, which was attributed to the withdrawal of the Morgan company as fiscal agents of the line.
Rates of insurance on dwellings outside of Honolulu have been reduced from 75 cents and \$1 per hundred dollars to 60 cents, with charges for deficiencies and exposures. The reduction gives much satisfaction on the island of Hawaii.

WHEAT ACREAGE, BRITISH EMPIRE, SHOWS INCREASE

According to statistics recently compiled, the wheat acreage under cultivation in Great Britain, Canada, Australia and New Zealand increased from 11,500,000 acres in 1901 to 20,000,000 acres in 1911, or more than 75 per cent. To Canada belongs the largest share of this increase in 1911 the whole area of the Dominion was only 2,723,000 acres, while this year it is estimated at 9,816,000 acres, an increase of nearly 260 per cent in twenty-two years. Great Britain and Ireland have about 2,000,000 acres under wheat cultivation; Australia's wheat acreage is about 7,500,000 acres, and New Zealand's about 350,000 acres. India has nearly 30,000,000 acres in wheat, or three-fifths of the entire area within the empire.
The average production of Great Britain is greater than that of the colonies or India, the yield there being thirty-three bushels to the acre. This, however, is far from sufficient for the wants of the mother country. It is worth noting, however, that the British market is drawing more on the wheat produced within the empire, and less on that grown in foreign countries, as the area increases. Of the total 192,000,000 bushels of wheat imported into the United Kingdom during the year ending August 31st, India supplied 40,000,000 bushels, Canada 36,995,000 bushels, and Australia, 28,317,000 bushels, while 77,000,000 bushels were procured from Russia, the United States and the Argentine Republic. In the case of Russia and the United States, it is probable that the home demand absorbs the greater part of the crop, but Canada and Australia have a decided lead in the wheat trade with the old country over the Argentine Republic, which, with its vast fertile plains, is perhaps the most formidable rival they are called upon to compete with. All other things being equal, however, the mother country naturally prefers to do business with her own dominions, and the day is perhaps not far distant when all the wheat required by the people of Great Britain, over and above what they raise themselves will be supplied by India and the colonies.—Associated Sun.
