WHAT NEWSPAPERS IN BERLIN ARE PRINTING

(Translated.) The "Berliner Tageblatt" publishes a very interesting article by Professor Sellisch, commenting upon the recent supreme court decisions, which state that a German residing abroad does not lose his German citizenship after an absence of 10 years even if an entry into the German consular registers has not been effected, provided, however, that he visits Germany during this period. Even if a German citizen has acquired citizenship in a foreign country, his German citizenship is preserved by a visit to Germany before the expiration of this

10 years period. The only exception to this is made in the case of the United States of America, where in accordance with the Pancoft treaty, the acquiring of American citizenship results in the absolute loss of the German citizenship.

In accordance with the recent municipal regulations concerning the distribution and furnishing of provisions, the city council of Berlin has ordered that pure wheat may be used in the baking of white bread, and 25 percent wheat may be added to rye-bread. It has been ascertained that the supplies of wheat are very ample.

The general assembly of the merchants association, which has organized the "Leipzig Messe," has been a through success, even during this year; not less than 15,000 buyers had been present. The assembly adjourned expressing the hope that the next "Messe" to be held during the coming spring would be preceded by peace after a complete German victory.

SOFIA, Bulgaria.—In spite of the fact that the Bulgarian government is face to face with a decision in regard to the Macedonian question, and in spite of the fact that everyone realizes that the time is near when this question will have to be settled by more than diplomatic conversations, there is nothing noticeable in all of Bulgaria which resembles the slightest nervousness or excitement, and the capital of our country presents its usual peaceful appearance. The local foreign office gave the following declarations to representatives of the Associated Press:

The Bulgarian government is about to reply to the government of Serbia. Since no declaration of Serbia's policy has been received so far, we can be guided only by the confidential information recently supplied us by the Quadruple Alliance. In the meantime our negotiations with Turkey are progressing and the prospects of a speedy and satisfactory settlement of all points of difference are splendid.

The Duke of Mecklenburg-Schwerin is at this time at Constantinople and Sofia, where he is conducting the negotiations in regard to the Balkan problems. There is no change in conditions expected during the next week.

(Continued from page one)

ters from Mr. Larrison later during the week.

Review of Water Situation.
"We have certain forest reserves which are presumed to protect our water supplies. They are far more limited than they should be. For the most intelligent analysis we can make, we will assume the average rainfall over all the Forest Reserve area is 180 inches per annum, and in comparison we will also assume 126 inches per annum to be a closer estimate. Make your own choice as to correctness of either.

"Rainfall in gallons per acre per year at 120 inches is 3,258,514 gallons, at 180 inches it is 4,887,771 gallons.

Oahu Forest Reserves.
"Ewa of Nuuanu valley, (note) 28,550 acres; Tantalus and Makiki, government, 565 acres; Kalihi valley, government, 330 acres; Nuuanu valley, government, 2100 acres; Manoa valley, government, 780 acres; Kalawahine, government, 255 acres; Palolo valley, government, 910 acres; other areas, government, 1970 acres. Total area forest reserves, 35,520 acres. The government owns but 6471 acres of the reserve Ewa of Nuuanu valley.

"Total annual precipitation on forest reserves at 120 inches is 115,742,417,280 gallons; at 180 inches is 173,613,625,920 gallons.

"In 1904 an investigation was made of the amount of water pumped from underground sources and the following facts were disclosed. Up to that time there had been no diminution, but an increase.

"Pumped from underground sources, daily and annually, year 1904—Daily, 144,000,000 gallons; total for year, 169,200,000,000 gallons.

"Evidently there is more water pumped from the artesian sources than falls on the forest reserves, hence the balance and surplus must be derived from the remaining 347,200 acres comprising the island of Oahu.

The Waialeale Tunnel.
"This tunnel draws its water supply from the main forest reserve. The flow from the east portal at its greatest discharge was 46,000,000 gallons daily. The flow from the southern portal was 17,000,000 gallons, but is reduced to 12,000,000 gallons daily.

"The inflow to the southern section was so sudden it may have been caused by tapping the eastern source. As the sections are but 900 feet apart and but two months more work is required for completion, the accurate data will soon be at hand and at your service.

"Two years should be allowed for nature to disclose the quantity and permanency of this tunnel supply. The Waialeale tunnel is a great and costly experiment, which cannot be duplicated by the territory or the county, hence I urge you to refrain, for the present, from tunnel or high elevation boring experiments.

"I emphatically disapprove of the \$20,000 for a water survey.

"The legislature appropriated by Act 36, \$5000 for a commission for this purpose, and it is a part of the duties of the Division of Hydrography to make these investigations, and it has been ordered to perform this duty. Their appropriation is \$25,450.

Extension of Nuuanu Water System.
Reservoir No. 4.—I have been familiar with this reservoir since its inception to now.

It is but two hundred feet in elevation above Reservoir No. 3, hence all arguments in its favor as a source of water power are ill-considered.

The most experienced reservoir men in the territory believe it will not retain water above a very moderate level. It is admitted it now leaks. If any experimenting is to be done, confine it to the return catchment ditch estimated to cost \$8,000.00.

The condition of the interior of Reservoir No. 4 is quite alarming with the mud and vegetation as exposed to contamination unguarded in every particular.

A suggestion has been made that the reservoir could be filled several times yearly by tapping the head waters of Manoa valley at about the 1100 feet level so as to, by tunnels, deliver it into No. 4.

I directed Mr. Larrison to investigate and his report is submitted herewith. It will be a surprise to know the annual run off averages only 530 million gallons or less than one and a half millions daily, and that 10,200 feet of tunnel would be necessary besides other heavy expense.

I am opposed to the expenditure of \$23,500.00 to divert water that naturally should flow into Reservoirs No. 3 and No. 2, that it may be stored in doubtful No. 4 and furnish unreliable power.

Reservoirs No. 1 and No. 2.—These can be materially enlarged and water

AD MEN DECIDE ON CAMPAIGN TO ADVERTISE ADS

Will Show People that Publicity Does Not Increase Cost of Article to Buyers

INDIANAPOLIS, Ind.—The executive committee of the Associated Advertising Clubs of the World, meeting here in September, gave consideration to a mammoth campaign to advertise advertising—to show the public the economic value of advertising from the public's standpoint.

Oddly enough, advertising has never been advertised to the public, and one of the results is that at least a great many people have asked, "Who pays for advertising?" and have even blamed advertising with increasing the cost of things.

The facts are, as businessmen who have studied the problem have learned, that advertising, by increasing the amount of business the advertiser is able to do, has decreased the proportion of fixed business charge to the sales, so that the advertiser, quality considered, is able to sell for less than would otherwise be possible—provided, of course, his advertising is done wisely.

The campaign, which will run an advertising mediums of all kinds, will undertake to show the public the facts in the case.

Another important action was the acceptance of applications from the strong Ad Clubs of Cleveland, Buffalo, Detroit and Rochester, N. Y., for affiliation with the Associated Advertising Clubs. Through this action, practically every important city in the United States has representation in the A. A. C. of W., which exists to improve advertising, both through the education of advertisers to use better skill and through realizing the ideal of absolute truth in all advertising everywhere.

The A. A. C. of W. now has a membership of nearly 12,000, embracing practically every leading advertising man in this country, and many in foreign countries.

A Japanese boy riding on a dray in South street near Kawaiahao late Saturday afternoon jumped off the vehicle and ran in front of an automobile driven by Fred Harrison. The fender of the machine struck the boy, knocking him down and bruising his face. Mr. Harrison took the boy to the Queen's Hospital.

protected as to quality. The sides can be wrapped and fixed.

To secure the extra power the drop of 70 feet from No. 3 to No. 2 the 400 feet of pipe could be laid to connect No. 3 with the main pipe. To this there can be no objection.

General Remarks.—The tunnel source of water supply cannot be intelligently passed upon until the Waialeale tunnel has been in operation several years.

We may be forced to various valley catchment schemes of water supply in view of the tremendous drain on our resources.

Manoa Improvements.
I am in favor of any well devised and executed scheme that will keep water mains out of the roadways and within sidewalk areas. The \$5,000.00 or even more suggested would be well expended and I hope serve as a model.

Present Sewer Pumping Station.
From the facts ascertained on our recent visit to the outfall pumping station, I believe, as stated at the time, the expenditure of \$5,000.00 as proposed is wise and urgent, and I authorized it to be made so far as my authority went.

Trunk Line on Queen Street.
This at an approximate cost of \$8,000.00 would seem quite necessary and I approve.

Repairs and Improvements.
This item of \$3,000.00 or more I leave entirely to your judgment.

Puunui Extension.
From the gumbo character of the soil, these sewers are very necessary. The two points I would make are to keep all sewers and their connections out of the roadway; and next plan for the future connections to gravity outlet. Puunui needs surface drainage badly and the relations of sewers thereto should not be overlooked.

I think I have gone into the whole loan fund proposition sufficiently.

Sewer Systems.
Ultimately there must be several outlet or outfall sewers to the sea and beyond the reef.

These sewers must avoid the harbor area existing and probably extensive enlargement particularly to the west.

It is obvious that, if possible, gravity systems should be installed and pumping be confined to lower levels. This would mean intercepting sewers for present system. The sewer maps should show something of the possibility of such an intercepting sewer at a proper elevation.

I think you should appropriate for a preliminary investigation.

I add a letter dated October 1 by Mr. Larrison, which essentially confirms my personal investigations and conclusions.

I thank you for your unselfish public spirit in accepting this appointment, which carries no remuneration. Very respectfully,
LUCIUS E. PINKHAM,
Governor of Hawaii.

LOCAL AND GENERAL

Hawaiian Lodge, No. 21, F. & A. M., will hold a regular meeting tonight at 7:30 o'clock.

A meeting of the Catholic Ladies Aid Society will be held at the roof garden of the Young hotel Thursday morning at 10 o'clock.

The monthly report of the Hawaii Promotion Committee has been printed, setting forth the activities of that body during the month of September, and comprehensive plans for future activities.

Representing a total area of 153.73 acres and bringing receipts to the territory of \$2154.70, land patent grants for six homesteads on Maui and Kauai were signed by Governor Pinkham on Saturday.

A meeting of the Woman's Board of Missions will be held in Central Union church tomorrow afternoon, beginning at 2 o'clock. The meeting will be held in connection with the Women's Society in an all-day session with a basket luncheon at noon.

A meeting of the Honolulu Philharmonic, of which Prof. Carl Miltner is director, will be held in the Elks' hall, King street, at 7:30 o'clock tomorrow evening. Musicians and persons interested in maintaining a permanent musical organization in Honolulu are invited to attend.

The Chautauqua Circle will meet in the parlors of the Central Union Church at ten o'clock tomorrow. All who wish to take up the year's study are welcome. Topics for this American Year include an interesting review of American life, manners, and customs from the days of the first colonials, a survey of present day conditions and tendencies. A weekly review of current events—the "Story of the Week" in "The Independent"—completes the required reading of the course.

As the guests of the C. Brewer & Company, the Oceanic's local agents, Mr. and Mrs. A. B. Tarpey and daughter were entertained today with a motor ride around Honolulu and vicinity, while the Sonoma, on which they are bound for Australia, stopped here. The Tarpeys are intimate friends of A. B. Spreckels, one of the Oceanic line's principal stockholders. Passenger Agent D. H. Gilmore personally conducted the visitors around the city, in behalf of Brewer & Company.

SUIT AGAINST COL. SPALDING GOES TO TRIAL

With the plaintiffs seeking to recover \$56,602.39 which, they allege, is due them as the result of construction work done in Portland, Oregon, several years ago for a resident of the Hawaiian Islands, the case of A. M. Stuart and James C. Stewart, copartners doing business under the firm name of James Stewart & Company of New York, against Col. Z. S. Spaulding of Kauai, went to trial in Circuit Judge Whitney's court this morning.

Judgment in the sum of \$56,602.39 is asked against the defendant, together with interest at 8 per cent from February 3, 1911, and the costs of the proceedings. It is alleged in the complaint that, under a contract dated July 29, 1909, the plaintiffs were engaged by the defendant to construct a building at Washington and Third streets, Portland, Oregon, to be known as the "Spaulding building." The allegation is that the amount which the plaintiffs asked be adjudged them represents the balance due them after carrying out the contract.

Ed Gilbert, G. H. Carstey and H. Rowan of New York arrived in Honolulu last Tuesday to testify in the case. The plaintiffs are represented by the law firm of Frear, Prosser, Anderson & Mark. Attorneys Lindsay and Lymer are conducting the case for the defendant.

PYREX

Glassware for Baking

The latest invention. A hit with housewives everywhere. No glass heretofore produced could withstand the sudden changes of temperature incident to baking. Glass is easy to clean and shows the slightest trace of dirt plainly if the cleaning has not been thorough. Glass does not flake or crack like many other kinds of ware.

Pyrex ware is for Quicker, Better, Cleaner, Cheaper Baking. It has been tested and approved by GOOD HOUSEKEEPING INSTITUTE. Made in Bakers, Custards, Pie Dishes, Bread Pans, Shredded Egg Pans, Casseroles, Etc.

It is now on display at

W. W. Dimond & Co., Ltd.,
The House of Housewares
52-55 King St.
