LARSEN CHARGES GENEROSITY OF CITY IS ABUSED

Supervisor Says Patients Able to Pay Go to Hospital at City's Expense

Supervisor William Larsen said right out in meeting last night what he has been saying in private for several weeks—that patients are being sent to the Queen's hospital by the city and county physician, Dr. J. T. Wayson, without examination, either as to their physical condition or as to the state of their pocketbooks. And he gave a reason for it. He stated that it was done in an effort to discredit the emergency hospital physician.

When Dr. Ayer was made emergency hospital physician under Dr. Wayson trouble began, say members of the board. Charges and counter charges were made verbally before meetings of the health committee of the supervisors but never backed up by a written charge that could be presented to the board. There was a conflict of authority.

Then, the emergency hospital was made a separate department, under the jurisdiction of the sheriff, Dr. Wayson was to have nothing to say about it.

And he hasn't. But Larsen last night charged that he is sending every patient he can to the Queen's hospital in order to discredit the emergency hospital, for when the new institution was first established the city and county's bill at the Queen's hospital decreased remarkably.

Larsen alleged that many of the patients sent to the Queen's hospital at the city's expense are admitted on telephone application to Dr. Wayson. And he said some of the persons sent to the hospital as indigents and treated at the city's expense are well able to pay their own expenses.

He asked for an investigation of his charges and sat down and voted against an appropriation of \$2000 for hospital expenses for the city's indigent sick. Nothing was done on his request for an investigation and the appropriation was passed. It is needed to carry the fund through the beginning of the next fiscal period, July 1. The appropriation for this half year has been exhausted.

CITY AFFAIRS AND SUPERVISOR NOTES

Payrolls passed.

Consideration of the amendments to the purchasing agent ordinance was postponed.

There was a little informal talk on the proposed bond issue last night, but no action was taken towards pushing it.

A plan to charge \$5 for the use of the city ambulance for private purposes was referred to the police committee.

The inspection trip of the mayor and supervisors around the island planned for Sunday has been postponed for a week.

Next meeting of the supervisors will be Friday night. The city engineer promises to have some sidewalk ordinances and a call for bids for the Beach Walk project ready to submit.

Installation of water meters in the business district will cost the city about \$500, as voted last night, but it will all come back into the treasury as a charge is made for each meter.

The \$300 asked by the city attorney for investigation expenses was voted on second reading last night after a further examination of the facts by the finance committee. There was some question at the last meeting as to whether it could properly be voted.

An ordinance regulating the slaughter of swine and cattle was introduced and referred to the police committee, as Supervisor Horner, chairman of that committee, who introduced the ordinance, wanted to amend it so as to include poultry. Supervisor Hollinger contended that it should properly go to the health committee, but he was overruled when it came to a vote.

A request by Supervisor Horner for more benches in the parks was met by Supervisor Hollinger, chairman of the park committee, with the statement that there was no money to buy them. He asked Horner to remember his request and vote for the appropriation for them and for more playground equipment when the budget comes up for consideration next month.

Final award of the contract for the improvement of Lusitana street was made to the Lord-Young Engineering Company. This was merely a formality, as work has been in progress on the project for several weeks. The contract specifies that the company is to accept bonds in place of cash for

Like Dancing?

If so, come to Phoenix Hall this evening to the dance given by Young Erin Society.

GAS COMPANY TO BE HEARD NEXT MONDAY

Further hearing of the Hawaiian Electric Company before the public utilities commission has been postponed until the commission's auditor has completed the filing of data on which he is now at work. The hearing of the Honolulu Gas Company, which was set to begin yesterday, but which had to be postponed on account of the other hearing, will begin next Monday at 1:30 o'clock.

Information sought by the company will include detailed statements of the capital and character of the plant, financial statements such as profit and loss, running expenses, and amount, nature and source of income.

How the plant is operated with respect to the safety of the public and of the plant's employees, working hours of employees and other subjects considered necessary by the commission will also be taken up during the hearing, which began yesterday afternoon.

COMPLAINTS AGAINST WAIKAEKA-SCHOOL ANSWERED BY KINNEY

Answering a complaint that the Waikae-ka school, this island, is "six miles from anywhere," that the only access to it is over a railroad track and that the government should not compel children to attend under these conditions, Henry W. Kinney, superintendent of public instruction, calls attention to the fact that, where primitive conditions used to prevail, the government now has provided adequate instruction in pleasant and well equipped quarters. He also

points out that the people in the district invariably use the railroad tracks as a thoroughfare and that it is hardly more dangerous for the children to use the tracks when they go to school than on other occasions.

It was decided to accept the offer of the polo association to erect a comfort station in Kapiolani Park, on a site chosen by the park committee, and credit the city's ten per cent of the net earnings of the races there against its cost until paid for. The site chosen is under the banyan tree between the tennis courts across from the public baths. The tennis players have been clamoring for a comfort station there for some time, according to John Wise, the superintendent of the park.

After a long dispute as to the facts between Supervisors Arnold and Hollinger a resolution appropriating \$500 for the public baths passed first reading. The baths are about \$370 behind and need the \$500 to carry them through until July 1, the beginning of the next fiscal period. Part of the money is to be used for the purchase of refreshments, cigars and tobacco to be sold over the counter. The proceeds go into the city treasury, not into a fund with which more goods can be purchased. Hollinger says that when the books are balanced July 1, it will be found that the baths have at least broken even, if not made money. The greatest profit is derived from the rental of bathing suits.

PRIVATE FACTORIES FOR U. S. MUNITIONS

No one can conceive of a government, whether it be our own or any other, which can, through taxation or otherwise, construct and maintain in time of peace a plant which will be qualified to turn out enough munitions to supply the fighting line in time of war, says Howard E. Coffin, in World's Work. This means that even though we have Government-owned plants—and the ideal thing would be to have several of them scattered through the Middle West—but even though we have them to act as educational institutions and to act as clearing houses for specifications and blueprints, in the last equation, in any future war in which this country is engaged, it is going to be the privately owned manufacturing plants of this country which must feed the guns that will save the nation.

If we can have Government-owned plants they will come in as assembling plants and as clearing houses for specifications, tools and skilled munition workers. But we must not overlook the fact that congressional action toward the establishment of Government-owned plants may be on a false basis. As I see it, one of the greatest dangers of this country at the present time is that through the passage by the houses in Washington of bills creating a larger army, an increased navy and a few munition plants, the country may sit down and fold its hands and say "We are prepared." As a practical working out of industrial organization for national defense, we purpose to give the private plants of this country small annual orders for munitions.

Green bugs are reported to have infested the fields of several counties of Kansas.

England has refused the request of the state department that goods of German origin contracted before May 15, 1915, be permitted to pass the blockade lines.

WHILE extensive renovations and improvements are being made at our old location, we will serve our patrons next door, 908 Fort St.
