U.S. Gov. experts report that oils correctly refined from asphalt-base crude "distill without decomposition" (do not break up and lose their lubricating value under cylinder heat) and "are much better adapted to motor cylinders, as far as their carbon-forming proclivities are concerned, than are paraffine-base Pennsylvania oils."

Motorists who use Zerolene, an oil scientifically refined from asphalt-base crude, back up the experts with reports such as these: "Covered over 16,000 miles without adjusting valves or cleaning out carbon."—"The carbon taken out of this car in 50,000 miles amounted to less than an ounce." Zerolene is for sale at dealers everywhere and at service stations and agencies of the Standard Oil Company.

ARMY & NAVY COAST DEFENSE FORTS TO FIRE HERE NEXT WEEK

All Armament is in Readiness For 1916 Target Practise; Each Big Gun to Shoot

One week from tomorrow the big mortar batteries of Fort Ruger will boom in annual target practise, and on August 16, a week from Thursday, the big 12 and 14-inch rifles at Fort De Russy will belch forth their thunder. The occasion is the annual target practise of all forts of the coast defenses of Oahu.

August 14 to 18 is the date of the first practise, and additional practise will be held from August 22 to 28. All the armament of each coast defense fort on Oahu is in readiness for the practise, according to Capt. Charles G. Nether, ordnance department, armament officer of the Hawaiian army district.

Following the first practise, which is under the direction of the War Department, a second practise will be held, following no set rules but fired in accordance with directions from the coast defense commander. Col. Alfred M. Hunter of Fort Kamehameha, who is commanding officer of the coast defenses of this island.

Within a few days advertisements will be placed in Honolulu newspapers by Col. Hunter warning residents in the vicinity of the big 12 and 14-inch rifles at Fort De Russy to keep the doors and windows of their houses open on firing dates.

The second practise will be for the purpose of trying out the armament and working out local problems in coast artillery work, devised by Col. Hunter.

First of the forts to hold annual practise will be Fort Kamehameha, which will fire next Monday, August 14. Ruger fires August 15, De Russy August 16 and Armstrong, the mine fort guarding the harbor entrance, holds mine firing target practise the next two days.

GUARDSMEN WILL USE 6-INCH GUNS AT FT. DE RUSSY

So pleased is Major Joseph B. Douglas, C. A. C., of Fort De Russy, with the fine target practise record made by the men of the 1st Company, C. A. C., National Guard of Hawaii, in their sub-caliber target practise last Thursday night, that he has decided to allow the guardsmen to hold this practise every two weeks, following the conclusion of coast defense target practise by the regulars this month.

Capt. G. K. Larrison, commanding the 1st Company, C. A. C., National Guard of Hawaii, made this announcement today, and said Major Douglas has expressed himself as delighted with the efficient showing made by the guardsmen. The guns used in this practise will be the 6-inch rifles, fitted with sub-caliber bore throwing projectiles about an inch and a half in diameter.

DIX WILL COME FRIDAY; TO TAKE PRIVATE MOUNTS

At daylight Friday the U. S. army transport Dix will arrive from Manila and Japan, says a radio received by the depot quartermaster from the vessel.

The Dix has 7532 tons of coal aboard, most of it for Honolulu. She will dock at navy pier No. 2, and will be here for 10 days, sailing for her home port, Seattle, after unloading.

From Honolulu the transport will take 18 to 20 horses, private mounts of army officers. These include two horses owned by Capt. E. A. Hickman, commanding Field Company E, Signal Corps, now on the border, having left last month from Fort Shafter on orders from the War Department.

Sunday morning the U. S. army transport Logan is due to arrive from San Francisco, bound for Manila. She will take 650 tons of bunker coal here.

HAWAII IS LEFT OUT OF DIVISION PLANS

That the War Department will assist the states in organizing, maintaining and equipping engineer troops of the National Guard is stated in a circular issued by the chief of engineers, U. S. army, and received here.

In the plans of the War Department, however, the Territory of Hawaii has been left out. The states have been organized tactically into 12 militia engineer divisions, but Hawaii is not included in any of them.

The circular calls attention to the need for more engineer officers and soldiers in the organized militia, and says plans should be formed for securing 650 engineer officers and 16,000 engineer soldiers in the 12 National Guard divisions.

NEW ACT MAKES PAYROLL \$5000 PER MONTH MORE

Increase Only 1.5 Per Cent as Army Spends Close to \$400,000 Month in Pay

Promotions of Oahu army officers under the National Defense Act have increased the payroll of the Hawaiian Department about \$5000 a month, it was learned today by inquiry at the pay office of the quartermaster's department.

This is not a large increase, however, as the expenditures of the pay office for pay of officers and enlisted men, plus the cost of supplies of various kinds, now range between \$385,000 and \$400,000 a month. The increase consequently is not more than one and a fifth per cent.

The act of June 3 promoted large numbers of army officers in the Hawaiian Department, and the consequent increase in pay because of these promotions ranged from \$40 to \$75 a month per officer, according to rank.

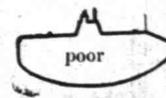

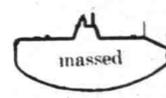

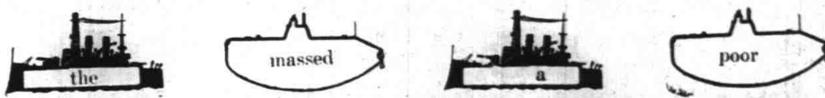

Because the 1916 appropriation expired two months ago, when the fiscal year closed, and Congress has had to extend the old appropriation one-twelfth twice since then, there will be a delay of five days in paying off the troops of this department in August, according to the pay office. Payment will be completed this month by August 20. It is usually finished by the 15th of every month. Last month there was also a delay, due to Congress having to pass a joint resolution extending the old appropriation one-twelfth, to cover July.

In 1912 there was a slight delay here in paying troops of the department and some officers, because Congress failed to pass the army appropriation bill promptly. The new bill, providing for the ensuing year, down to June 30, 1917, is now under consideration in Congress, and it is believed it will be passed before the close of this month.

Should it not be it may be necessary for Congress to pass another joint resolution appropriating a sum to cover the difference between the cost of paying officers and men in August, 1916, over the expense in August, 1915, before the National Defense Act with its increased salaries and many promotions, went into effect.

IMMIGRATION STATION CHANGES BUSINESS HOURS

Beginning today the U. S. immigration station is open for business at 8 o'clock in the morning and close at 3:30 p. m., instead of from 9 a. m. to 4:30 p. m.

Can you speak personally to everyone who passes your store?

No, but your *show windows* can tell every passerby what you have to sell and tell him in the most effective manner.

But if your show windows are dark at night the man on the street will not "hear."

If they are poorly lighted they will only "whisper."

But light your windows brightly and they will "SHOUT" your message so that all may know.

Let us tell you how to make your show windows your best salesmen — by proper, efficient and inexpensive illumination.

Phone us today. There is no obligation.
