PROMINENT FOLK OF CITY SAID TO OWN TENEMENTS

Mayor Fern's Name in List of Those Held Responsible for Conditions

Mayor Joseph J. Fern and other prominent persons of Honolulu, as the owners of what are considered the "bad" tenements of this city, are held responsible for the conditions which exist in those places by the civic affairs committee of the Honolulu Ad Club which met yesterday at its regular luncheon in the Young hotel. Reporting on an investigation of the status of these homes where so many of the people of this city live, the committee is gradually exposing the names of those who own the buildings and the first 16 were announced at the club luncheon.

Dr. Dai Yen Chang, the young Chinese who started the movement by a speech at the club several weeks ago, in which he appealed for some improvement of the conditions, is found to be among the owners of the "bad" tenements.

Professor Vaughan MacCaughy of the College of Hawaii, as a member of the committee of which H. E. Vernon is chairman, gave the names of the owners of 16 of these buildings and the location as follows:

Tsu Horita owns tenement on King street opposite Kalakaua avenue. The J. A. Magoon estate owns tenement on the Magoon block on South and Queen streets.

The F. Colburn estate owns the land on which a "bad" tenement stands on Punchbowl and Queen streets. L. Ah Leong is the lessee and the government is at present acquiring the property.

The J. A. Magoon estate owns the tenement in the Wrigley block at King and South streets. The Kapuni estate owns the tenement at the Territorial stables on King street opposite Kawaiahao.

Yoe Yan owns the tenement on Kukulua and River streets.

The River Mill company, of which Dr. Dai Yen Chang is president, owns the tenement on River and Pauahi streets.

L. Ah Leong owns the tenement on King and Liliha streets.

The Beckley estate, for which Mrs. Emma Nakulua is trustee, leases the land holding the tenement on Liliha street near King to the Pang Fong company.

Y. Ah Yin owns the tenement on Dowsett lane and King street.

L. Ah Leong owns the tenement on Aala and King streets.

The Allen estate leases the land on which the tenement on Aala and Kiewit street stands to Yang Chiew Kieu.

J. J. Fern owns the land on which the tenement on Vineyard street opposite Kaula lane stands and leases it to Carl On Tai.

Dai Yen Chang is owner of the tenement on Aala and King streets.

Camp 2 is leased by the Kaula Lane Lodging company, but is gradually being demolished and replaced by cottages.

TO ENLARGE STAFF OF ORDNANCE DEPOT HERE

Orders received recently from the war department to enlarge the staff of the Hawaiian ordnance depot from 30 to 75 men were made public today by Maj. Charles G. Mettler, Hawaiian ordnance officer. With this increase in the working force of the depot it will be necessary to enlarge the present building plans, and \$6000 extra has been provided by the war department for this work.

TOG TALKS by Janet Walker

The term "Philippine" embroidery is applied very generally in reference to all work from Manila and thereabouts. In fact, this term covers a portion of Manila embroidery too, as a considerable part of the Philippine work resembles the Portuguese style of needlework, and the Filipino workmen have become real artists in copying all manner of patterns and styles of handwork. Their patterns are very beautiful, and there are few women who have lived in Honolulu or visited here who have not purchased one or more of these exquisite pieces.

We might really say that our troubles begin with the purchase of a waist or dress of this handwork; as possessing one does not solve the difficult problem of how to make it. Unfortunately the makers of these embroideries seldom vary the general outline of their patterns. Year after year the waists have the same lapels, the same button-holed fronts with a little piece on each side for cuffs, and the collar embroidered so close to the fronts that one has to make a yoke over the shoulder lines in order to place the embroidery down where it may be seen.

Many women feel that it is not necessary to use additional trimmings, the handwork is so lovely in itself. As a beautiful gown must be given certain deft touches in order to bring out lines and curves—and all accessories to harmonize—just so much do these embroidered pieces require—of dainty laces and medallions. It seems a pity to cut them, yet frequently charming smart waists may be turned out instead of old-fashioned "Mary Kate" affairs by cutting into and separating some of the embroidery.

Waists To make a really "smart," separate waist of a Philippine pattern, resolve immediately to cut away the button-holed front edges; they can be used in making pretty cuffs. This would bring the embroidery too near to the closing so extra material should be inserted to make the waist front, joining it to the waist with Val lace or hemstitching. Insertions of net are very good to trim, but net is fully as expensive as lace, when the labor and the cost of hemstitching is figured in.

Another way of introducing this extra front is to alternate clusters of tiny tucks and lace. The cuffs can also be used as vestees, and they make a very effective trimming. Looking up and deciding upon waists shown in the catalogues of waist manufacturers, is a very good plan to follow for patterns. Something lacy in the lingerie type should be selected and followed as closely as possible. If the embroidery interferes with the running of lace or clusters of tucks cut the embroidery away from the material and whip it over the lace or tucks. This can be done very easily when heavy work constitutes the pattern. When daintier designs of needlework are used, they are more difficult to cut around, but

SALTS FINE FOR ACHING KIDNEYS

We Eat Too Much Meat, Which Clogs Kidneys, Then the Back Hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders. You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders. Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications. A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.—Adv.

corner Lunallo and Alapai streets. Those who have not been notified by phone or verbally will kindly ring Madame Lester, 6251 office, or 3875 residence, for invitation. Take Punahou car to academy.

Frock of Philippines embroidered batiste. Two waist patterns were used to make this effective afternoon gown. The charming hat of black velvet has a facing of blue figured "vasey willow" silk to match the coloring of the sash.

lace run right over the design and the pattern cut out entirely beneath it will make a waist more attractive. Sometimes when part of the embroidered fronts are cut away the little pieces can be used for trimming the back. When lace is used for a trimming the sleeve should be joined to the waist with lace.

A smart white dress can be made from one waist pattern by introducing a part of the embroidery as a skirt trimming. The circular chain-stitched line that is used in marking the neck line of the collar can be ripped out and the square or curved collar used to advantage to make a short yoke-panel in the front or back of the skirt. The cuffs make cunning pocket flaps and can be inserted lengthwise or crosswise in the folds of the skirt.

WOMAN TOPPLES FROM CAR WHEN CONDUCTOR AND SOLDIER MIX IT

Because the conductor of a Waikiki street car made some alleged sniping remarks last night, Private A. Smith of Fort De Russy, climbed back to the car to remonstrate, got kicked in the face, it is said, and in the ensuing excitement, Mrs. W. L. Mossman fell off the car backwards and had to be taken to the emergency hospital.

At the police station Private Smith lodged a complaint of assault and battery against Conductor O. R. Allison. Mrs. Mossman was treated at the hospital for a scalp wound, an abrasion of the left elbow and strained muscles of the neck and jaw. Smith's story is that, as he alighted from the car near Fort De Russy, the conductor said something insulting to him. Smith climbed back to the car and wanted to know what the conductor said. Allison then kicked him in the face, Smith alleges.

When the discussion was at its height, Mrs. Mossman became excited and tried to get off the car backward. She was taken to the hospital along with Smith and several witnesses in the patrol wagon.

BUCKEYE CLUB HOLDS ELECTION OF OFFICERS

Officers for the ensuing year were elected at a meeting of the Buckeye club held Tuesday in the parlors of the Young hotel. The club is composed of natives and former residents of the state of Ohio, and a large number were present at the meeting last evening. The following officers were elected: President, George A. Andrus; vice-president, Mrs. Carl Andrus; secretary, Miss Margaret Herenden; treasurer, Dr. W. G. Rogers.

W. A. Bowen presided at the meeting, and submitted the reports of the secretary and treasurer which were approved. Prof. Vaughan MacCaughy of the College of Hawaii, and Mr. Cannon of the G. A. R. Post, addressed the members. A vocal solo by Mr. Andrus and a piano solo by Miss Parrish of Punahou, completed the program.

LITERARY SOCIETIES AT MILLS WILL INITIATE

The two literary societies of Mills school—the Damon Lyceum and the Alpha Phi—are preparing for an initiation of their new members on Saturday. The new members number more than forty, and a tough initiation is to be given them. The Kawaiahaio playhouse for girls has already been occupied, and the swimming tank will be in used by both societies.

This year each society has about sixty members, and with capable teachers in charge, the societies expect to prosper. The officers of the societies are: Damon Lyceum—Kiyochi Doi, president; Eddie S. C. Lee, vice-president; C. Umamoto, secretary; J. Tachibana, treasurer; Edward S. Ho, yell and song leader; M. Yamane, chief sergeant-at-arms; T. Okimoto, John Lyu, S. Hirotsu and Ah Chong Chun, assistants. Alpha Phi—Sumatsu Takemoto, president; Chang Kiong, vice-president; T. Shinaka, secretary; Choy Doo Whan, treasurer; Henry Lee, song leader, and Han Kee Chan, yell leader.

REPORTS ACCOUNTS OF ESTATE ARE CORRECT

Reporting that all accounts, including the inventory of the properties of the late Cecil Brown, as filed previously by Harry von Holt, administrator of the estate, were correct and in order, Attorney Marguerite K. Ashford yesterday submitted her accounting to the court, with a request that same be approved.

Attorney Ashford reported that expenditures of \$461.30 for the upkeep and maintenance of the estate pending administration were correct. She asked further that the sum of \$2154, the statutory commission, be allowed her.

Social Annoyance

From a hygienic standpoint social annoyance is getting serious, since the strain on both the body and the mind requires constant physical attention. Certainly nothing is more annoying to a refined person than offensive perspiration or body odors. Those who have used Tyre's Antiseptic Powder know it to be the one remedy which never disappoints. For general uses—dependable in all cases—it should be in every household.

Dr. M. E. Charlier, of the Faculte de Paris, France, said: "If there is a very unpleasant affection and hard to cure at that, it is surely these conditions." He also says: "there are to be found in the drug stores many preparations containing boracic acid and talcum. These preparations, generally used in a dried state, have the great inconvenience of clogging the pores of the skin. This is not the case with Tyre's Antiseptic Powder, as it acts as a deodorizing, stimulating agent. My attention was called to this fact while attending several cases of severe inflammation produced by Poison Oak. While no other remedy would give relief, Tyre's Antiseptic in the proportion of two teaspoonfuls to a pint of water allayed the intense pain in a comparatively short space of time."

This preparation is sold in boxes at twenty-five cents and one dollar, by the manufacturer, J. S. Tyre, Chemist, Inc., Washington, D. C.

NEW M'CALLISTER HOME NEARING COMPLETION

The new Puunui home of Mr. and Mrs. L. L. McCallister is rapidly nearing completion. The grounds and the interior decorations have yet to be modelled but the remainder of the palatial dwelling is practically ready for residence. The new home of ground on a high crest and commands a view of both the valley and hills and the ocean. It is expected that the house will be ready for occupation within a month's time.

TABLES TURNED WHEN BOARD TRIED TO FIND FAULT WITH CONTRACTOR

Mayor Joseph J. Fern and the members of the board of supervisors went out to survey the Manoa road work Tuesday afternoon with the evident intention of finding fault with the contractor but instead found that the fault rested not with the contractor but with the city and county itself. As Supervisor McClellan phrased it after the board decided to rectify certain errors in specifications and spend more money on the project, "I thought we were coming out here to soak the contractor but it looks like the city and county is being soaked instead."

At the meeting Tuesday night the board gave first reading to two resolutions, one appropriating \$3600 for storm ditches above Ferdinand avenue and a second appropriating of \$900 for storm drains through the property of Mrs. Annie K. Woolsey, Frank Andrade and the College of Hawaii. This was the direct result of the survey made by the board yesterday of the Manoa road work.

The first stop on the trip occurred at Damon street where the residents of Manoa claimed that the billow-like appearance of the road was due to improper and insufficient rolling of the sub-base. J. A. Balch of the Manoa Improvement Club informed Mayor Fern that on a check made by the club they had found that there was a shortage of more than 100 tons of asphalt on the Manoa road work contract.

The second stop was made at Hinnewell street and Kamehameha avenue where the board was shown a small square in the center of the street filled with rocks instead of having been filled with dirt. The third stop was at Kaala avenue park. The contractor agreed to level the park grounds and remove the stones and leave it in good order. Curbing errors and poor road surfacing on Vancouver highway and Oahu road were pointed out next. At Boris' place the board was shown a section of the road when the coating of oil has been insufficient to hide the rocks in the sub resurface.

A visit was also paid to the spot near Mrs. Annie K. Woolsey's place where the board decided on a move to appropriate \$900 for a storm drain so that the roads would not be washed away. At the next stop on Ferdinand avenue \$3600 was appropriated for a storm drain. At Hillside street and Kuahine drive a section was pointed out as poor pavement which the contractor agreed to fix.

The board then held a short session in the open with the Manoa improvement committee when both sides came down to bedrock. The Manoa men admitted that if the board fixed the Ferdinand avenue drain and the drains through Mrs. Woolsey's property and the road on Hillside avenue and filled the street squares with dirt instead of rock, and raised the curbing in places they would be satisfied.

Supervisor Petrie speaking for the board admitted that the work on the project had been ragged in places but further stated that it appeared as if the city and county had been to blame as much as the contractor because the faults surveyed were due to the fact that the specifications of the contract had not included work on these points.

Representatives of the board present during the survey were: Supervisors Mott-Smith, Bellina, McClellan, Petrie, Ahia and Arnold. J. W. Caldwell, J. N. S. Williams, F. Hons and J. A. Balch represented the Manoa Improvement Club. City and County Engineer A. S. Cantin was also present.

DR. BRADY SAYS:

Of appendicitis operations: "About 30% of such operations, we conclude, leave some after-trouble which the surgeon never hears anything about." For appendicitis, see a Chiropractor first. F. C. MIGHTON, D. C. Honolulu's Chiropractor 204-5 Boston Bldg. (Over May's).

Food Conservation

The Elks invite the public to join in the campaign for Food Saving. You can help by doing your bit in the home. Fill out the blank below and mail it to Box 616, Honolulu.

MR. JOHN A. HUGHES, Chairman Food Conservation Committee, Honolulu Lodge No. 616, B. P. O. Elks.

I hereby pledge that for the duration of the war the following rules will be observed in my household:

- (a) That one meal each day shall be served without wheat food.
- (b) That one meal each day shall be served without meats.
- (c) That no butter shall be used for cooking purposes when a satisfactory substitute is available.
- (d) That bread shall be sliced during each meal only as required for immediate consumption.
- (e) That at three meals each week at least one dish shall be served prepared from food unconsumed at previous meals.

Rich Milk thoroughly Purified

That in a sentence sums up Highlander Condensed Milk (full cream). There are very definite and real reasons for its superiority. First of all the milk is the world's finest. New Zealand's dairy conditions and legislation are the world's model—its dairy products top the world for the price because of their quality. Highlander Condensed Milk is prepared from the purest and richest milk of the specially selected herds in the rich dairying pastures of Southland. The cows are subject to Government inspection, and the milk is drawn from each cow under exceptionally rigorous conditions of cleanliness.

It is then immediately filtered and cooled at the dairies. Next it goes to the great model Highlander Condensaries—cleanliness personified. Here it is again filtered and subjected to a process which destroys all disease germs. Part of the water is removed by evaporation in vacuo, and a proportion of the finest No. 1A sugar is added.

Highlander Condensed Milk is full cream—the richest, purest milk, less part of the water. More economical than fresh milk—there is no water—use what is wanted, the remainder is available for further use. Hygienic, uniform, handy, always ready, it is cheaper, more reliable. For cooking it is far superior to ordinary milk—try it.

There are hundreds of recipes in the big 200-page beautifully illustrated Highlander Cook Book. Write for a FREE copy today—address "Highlander," Dept. "A," Fred L. Waldron, Ltd., Agents Honolulu.

HIGHLANDER Condensed MILK
