Zablan Ane Estate	12.00

I hereby certify that the foregoing is a correct list of the Delinquent taxes for the Second Taxation Division, Islands of Maui, Molokai and Lanai for the year 1906 to the best of my knowledge and belief.

Signed, Wm. T. ROBINSON, Assessor, Second Division.

**American Forestry Honored Abroad.**

The Forest Service of the United States Government is to become a member of the International Association of Forest Experiment Stations. Other countries represented in the association are Germany, Austria, France, Italy, Russia, and Switzerland—the leading countries in the practice of scientific forestry. The purpose of the association is to standardize experimental work generally, so that the methods of investigation in each country will be uniform, and to collaborate in researches affecting two or more of the countries interested.

That the Forest Service should be able to enter this association on equal terms with the European countries thru whose researches, conducted for many years, a science of forestry has been built up is evidence of the rapid progress we are making in this science. Material development and the practical problems which it has presented have absorbed most of our energies, and our contribution to the world's progress along scientific lines has been in the field of invention and

applied science rather than in discovery and research.

The science of forestry has until very lately been altogether foreign to us. It is hardly ten years since the first attempt to introduce scientific forestry upon American soil was made, and the opening of the Cornell School of Forestry in 1898 was a pioneer step in American education. Nor was it possible in this field to import a developed science and start abreast of European investigators by borrowing their results. Both the natural and the artificial conditions which determine forest utilization are so different from those found abroad that a new science had to be built up from its foundations.

Americans may well feel proud of the rapid progress made. That such results have been secured is primarily due to the liberality and foresight of Congress, which has steadily supported and provided for the work by increasing appropriations as success has been attained and capacity for expanding usefulness has been proved. The country is fortunate in the outcome, for it is now in position to utilize wisely one of its greatest resources and to do what may be done to avert the national peril threatened by forest destruction. We have now a science and practice of forestry based upon American conditions, and are ready to enter upon the stage of higher scientific research with the other nations represented in the International Association.

Affiliation with foreign workers will materially aid us on the way toward further goals. Better and better methods of practical management can be devised as knowledge of the underlying scientific problems becomes fuller. The United States will profit also thru the criticism of its published results by the older and more experienced foresters of Europe since a part of the plan of cooperation is the mutual exchange and discussion of forest publications. The conventions of the association will give opportunity for the discussion of international problems, for personal contact with foreign leaders, and for promoting the feeling of fellowship among workers in a common field which helps to draw the whole civilized world together.

Foreign forestry will profit from our investigations, because no other

**THE FIRST DEPOSIT IS A MAGNET**

IT DRAWS to itself the small change which you formerly scattered. It starts a growing bank account and creates a fund which will finally make you independent. MAKE THAT FIRST DEPOSIT TODAY.

**Paint WITH A GLOSS**

makes porch chairs and lawn furniture bright and attractive. For a few cents and a little time you can make them as good as new.

**THE SHERWIN-WILLIAMS BUGGY PAINT**

was made originally for buggies, but its tough finish and bright colors make it also suitable for many articles for outside exposure where high gloss and strong colors are wanted. Put up in small cans.

SOLD BY **E. O. HALL & SON, Ltd.** HONOLULU.

**IT'S ALL IN THE LENS.**

About six months ago we sold two kodaks fitted with special lenses. The lenses cost more than the kodaks. But the work turned out by these two kodaks was so far superior to the ordinary that the owners became enthusiasts.

Others saw the pictures and ordered special lenses for their kodaks. As a result we have sold more Goerz and Zeiss lenses already this year than in all the years we have been in business. We have always recommended such an equipment but the price of the special lens made customers reluctant to try it. Since they have seen the advantage we are getting orders nearly every day.

If you want the BEST results get a Goerz or Zeiss lens. We have several very fine ones in stock and will quote prices.
