Also orders sent to us from Town or Country, will be promptly attended to at our Shop on Congress street, east of Meyer's Drug Store, Tucson.

A. E. JOHNSTON, ARTHUR BORTON, October 9. 14-1

# THE CITIZEN.

SATURDAY, - - - JUNE 10, 1876.

## LOCAL MATTERS.

### The Santa Cruz.

We are in receipt of a letter from a party in the eastern States, asking various questions relative to Tucson, and its location relative to surrounding geographical features and objects. The writer speaks especially of the Santa Cruz river, of which he has seen frequent reference in THE CITIZEN, and he wishes to know whether Tucson is situated immediately on the banks of the river; if so, whether it lies all on one side or on both, and in the latter case whether there are one or more connecting bridges.

We are sorry that our poor little jokes about the Santa Cruz river should have misled any one abroad, in his ideas of that limpid stream. It is not a river, in the general acceptance of the term in the States. It is nothing but a large brook, rising in northern Sonora and running around the Santa Cruz mountains and into and through the valley in which Tucson lies. As it approaches the town its waters are led off into several acequias which irrigate the low bottom lands lying just west of Tucson, which latter is built on higher or mesa land stretching along the low lands. After irrigating the fields, the water runs together again in an irregular channel and flows into the nine mile water hole, northwest of Tucson. If the writer of the letter wishes to know all about the nine mile water hole, we would recommend him to write to Captain Whipple, who lives there and rules the destinies of that locality, and we have no doubt the Captain will fully post him thereon. As to the Santa Cruz, it is little but it is very valuable, and in this waterless region, the poor struggling river is an inestimable blessing. It grows the grain and runs the mills, and waters the stock and moistens the land and washes our clothes. Long may it flow.

### Hospitality to General Mariscal.

At a meeting of the Common Council of the village of Tucson last Tuesday evening, the subject of Gen. Mariscal's projected visit to Tucson was brought up, and in view of the kindly sentiments entertained for that distinguished soldier and statesman, the following preamble and resolutions were drawn up and adopted by the Council:

Whereas, it has been reported to this body unofficially that Gen. V. Mariscal, the Military Governor of the State of Sonora, in the Republic of Mexico, intends to visit Tucson in the latter part of this month, and understanding this visit is with a view of advancing the present commercial relations existing between the States, and rendering them still closer and more advantageous to all parties; and Whereas, it is eminently proper that the citizens of Tucson should meet him with the same cordiality and respect as is accorded to him by the people of the United States; and Whereas, it is the duty of the Council to extend to him the same hospitality and consideration as is accorded to him by the people of the United States; and Whereas, it is the duty of the Council to extend to him the same hospitality and consideration as is accorded to him by the people of the United States;

Resolved, That the hospitality of the city be and are hereby extended to his excellency and staff at such time as he may deem proper to visit us.

Resolved, That his Honor the Mayor be, and he is hereby requested to forward a copy of these resolutions to his excellency by order of the Council.

J. R. ALLEN, Mayor. C. H. MEYERS, Recorder.

MR. S. W. CARPENTER, the facile county recorder, has taken temporary charge of Mr. C. H. Meyers' drug store during the absence of the latter in California. His intimate friends are aware of the fact that Recorder Carpenter is an old and efficient hand at the apothecary business, having formerly owned and conducted a large establishment of the kind in Petersburg, Va. Looking in on him last evening we found him rolling some pills and interspersing the exercise with a low refrain, the words of the closing stanza of which were something like this:

O day from my breast corroding care, While I mix things in my little mortar, With my pills and potions and lotions for hair, My syrup of squills and my ointments rare All the patients and I and the learned doctor

Will recover and prosper and live on the square.

Then roll, brothers, roll with care, And cover the pills with a coat of sugar, For all must confess that none can compare. On fixing up drugs with the bold Carpenter.

JUSTICE C. H. MEYERS, accompanied by his wife and daughter, Miss Carlotta, left here on Thursday's stage for San Francisco. After a short stay in the Pacific metropolis, the parents will return here and the daughter will remain at school in San Francisco.

FOURTH OF JULY.—There will be a meeting at the court-house next Monday evening at 7 1/2 o'clock, for the purpose of arranging a programme and organizing for a proper celebration of the coming Fourth in Tucson. All should take an interest. The citizens generally are invited.

TULLY, OCHOA & Co. received on the 5th per Meyer's train, 10,000 pounds of government freight, and on the 6th, per Quinlan's train, 1700 pounds of merchandise. They shipped, on the 5th, to San Carlos, 5000 pounds of salt.

E. B. POMBOY, United States Attorney, returned to Tucson on Tuesday last. He is accompanied by his wife, to whom he was married during his absence from here, in San Francisco, and they have taken up quarters in Dr. Lord's residence.

MR. D. G. SANFORD, from the Sonotta, was in town the first of the week. He looks like a satisfied farmer and says he has forty acres of the finest corn he ever saw on top of the earth.

L. M. JACOBS & Co. this week received per Salazar's train assorted merchandise to the amount of 25,000 pounds. They shipped 20,000 pounds of flour to San Carlos, the first of the week.

MESSRS. R. W. BEAGAN, C. G. MASON and W. H. LONG came in from Florence last Monday. They report the Silver King as still king and the mining prospect generally brightening daily.

E. N. FISH & Co. have shipped 6,000 pounds of assorted merchandise to Santa Rita this week, per Steel & Co.; also, 7,000 pounds of merchandise to Point of Mountain. The firm received 1000 pounds of merchandise the first of the week per Quinlan's train.

## Local Mining News.

Governor Safford and Mr. Thomas Ewing who returned the first of the week from the Globe district bring reports therefrom that ought to cheer the heart of the most inveterately despondent miner in the Territory. New discoveries are constantly being made in that district and of a fabulous richness. Masses of chloride of silver are being taken out of some of the claims. Dr. Vale and two partners have discovered a mine from which they brought to Florence lately, two pieces of nearly pure metal, one weighing 90 and the other 60 pounds. It is estimated that these pieces will yield at least seventy per cent of pure silver. At the depth of twelve feet the lode carries a strata of pure chloride of silver, six inches thick. Other parties are taking out of their claims quantities of the same rich ore. One man is reported to have taken out \$2800 in one day. The Champion company had 250 pounds of ore smelted at a rude Mexican furnace which yielded 35 pounds of pure silver, and 8 pounds of silver were afterwards taken out of the slag. The Itesco company have a lead of ore at the bottom of their shaft, worth over \$1000 per ton. The Silver King company, Pioneer district, continue to take out large quantities of ore for shipping to San Francisco. This ore will yield over \$1000 per ton. The company has already shipped to San Francisco over \$100,000 worth of ore, and from this time forward can easily ship, if teams can be procured to transport it, \$50,000 worth of ore per month. They had, lately, on the dump, second class ore, worth on an average \$300 per ton, to the value of \$150,000. It will be remembered that the Silver King company offered, not long ago, to sell this mine to a San Francisco company for \$200,000. This latter company sent out an expert to examine the property and report. The expert's name was Bowie, and he parted his hair in the middle. His penetrating glance took it all in at first sight and he reported that the mine was not worth a continental. His company paid this sage \$3000 for his services and he bilked them out of one of the best mining investments ever offered on this coast. When will capitalists learn to send practical and experienced men, and men of good sense, to examine mines.

Mr. J. W. Hopkins returned this week to the Trench mine. When he came up from there last week, he brought in a handsome piece of silver bullion, from a four days' run in the Trench furnaces, weighing 20 pounds. The ore from this mine averages at present some \$35 per ton in silver, and also gives from 500 to 600 pounds of lead to the ton. It costs about \$21 per ton to work. There are two tunnels now going and it is the intention of the company to enlarge their works and prove this mine to be what it is, a fine paying property. The Trench is one of the ancient mines, having been worked by the Jesuits in olden times. In the old shaft where they are now working they have lately found buried some stone axes and hammers. This is rather strange as the marks of the steel drills and tools of the civilized workers are all around.

### Arrivals and Departures.

For the week ending Saturday, June 10. Per Arizona and New Mexico Express Company. Arrivals: Mrs. Aubrey, S. W. Reagan, W. H. Long, C. Y. Mason, E. B. Pomroy and wife, J. M. Flynn, T. P. Nicholson.

Departures: Judge French, A. Latham, Wong Tai, J. S. Douglas, B. W. Reagan, H. W. Long, C. Y. Mason, F. L. Austin, H. Simon, E. Araiza, Jacob Schreiber, C. H. Meyers, wife and daughter, T. P. Nicholson, O. A. Wells, H. Allen, J. M. Flynn.

### Chavez's Head.

At a midnight session of the Board of Supervisors of San Francisco, last Monday night a resolution was introduced by Mr. Macdonald allowing Henry Roberts to exhibit the head of the bandit Chavez. Mr. Strother jumped up and shouted that the resolution was too much "even for this Board." It was infamous to allow the exhibition of the head of a bandit or any other man. The resolution was defeated.—S. D. World, May 30.

Of course it was defeated. The trembling and unprotected Californians hid under their bed-clothes and begged somebody to kill Chavez when alive, offering a large reward for such service. Chavez came to Arizona, was killed for breakfast, and his head carried back to California. Now that their precious lives are safe the brave Californians not only refuse to pay the reward but won't let their savior get up a side show to pay expenses. It is a great pity that the slayer of Chavez hadn't thrown the head at that man Strother while he was shouting and hit him in the mouth with it. We venture to say if Chavez were alive and could have been turned loose in that Board of Supervisors, there wouldn't have been anything to "infamous" for them to do which promised safety.

PHILADELPHIA, May 16.—Diamonds said to be worth over ten millions of dollars were sent to this country as a part of Brazil's exhibit, and a great safe and a handsome show-case were prepared as their receptacles. By night a constant guard over the treasure. A regulation, however, prevents the transfer of the diamonds from the Custom-house to the Exhibition. A bond of double their value is required as a guarantee that they will not be sold in this country without the duty being paid, and the Brazilian Commissioners cannot comply. Don Pedro made, when here, some personal effort to arrange the business, but he was told that even Secretary Bristow had not the power to vary the rule.

The laziest man is on a Western paper. He spells photograph "fotograph." There have only been three worse than he. One lived in Kansas and dated his letters "Hworth," another spelled Tennessee "10ac," and the other wrote Wynandotte "YK."

The Champion company had 250 pounds of ore smelted at a rude Mexican furnace which yielded 35 pounds of pure silver, and 8 pounds of silver were afterwards taken out of the slag. The Itesco company have a lead of ore at the bottom of their shaft, worth over \$1000 per ton. The Silver King company, Pioneer district, continue to take out large quantities of ore for shipping to San Francisco. This ore will yield over \$1000 per ton. The company has already shipped to San Francisco over \$100,000 worth of ore, and from this time forward can easily ship, if teams can be procured to transport it, \$50,000 worth of ore per month. They had, lately, on the dump, second class ore, worth on an average \$300 per ton, to the value of \$150,000. It will be remembered that the Silver King company offered, not long ago, to sell this mine to a San Francisco company for \$200,000. This latter company sent out an expert to examine the property and report. The expert's name was Bowie, and he parted his hair in the middle. His penetrating glance took it all in at first sight and he reported that the mine was not worth a continental. His company paid this sage \$3000 for his services and he bilked them out of one of the best mining investments ever offered on this coast. When will capitalists learn to send practical and experienced men, and men of good sense, to examine mines.

Mr. J. W. Hopkins returned this week to the Trench mine. When he came up from there last week, he brought in a handsome piece of silver bullion, from a four days' run in the Trench furnaces, weighing 20 pounds. The ore from this mine averages at present some \$35 per ton in silver, and also gives from 500 to 600 pounds of lead to the ton. It costs about \$21 per ton to work. There are two tunnels now going and it is the intention of the company to enlarge their works and prove this mine to be what it is, a fine paying property. The Trench is one of the ancient mines, having been worked by the Jesuits in olden times. In the old shaft where they are now working they have lately found buried some stone axes and hammers. This is rather strange as the marks of the steel drills and tools of the civilized workers are all around.

### Arrivals and Departures.

For the week ending Saturday, June 10. Per Arizona and New Mexico Express Company. Arrivals: Mrs. Aubrey, S. W. Reagan, W. H. Long, C. Y. Mason, E. B. Pomroy and wife, J. M. Flynn, T. P. Nicholson.

Departures: Judge French, A. Latham, Wong Tai, J. S. Douglas, B. W. Reagan, H. W. Long, C. Y. Mason, F. L. Austin, H. Simon, E. Araiza, Jacob Schreiber, C. H. Meyers, wife and daughter, T. P. Nicholson, O. A. Wells, H. Allen, J. M. Flynn.

### Chavez's Head.

At a midnight session of the Board of Supervisors of San Francisco, last Monday night a resolution was introduced by Mr. Macdonald allowing Henry
